offered by this intriguing book is for schools across the country to focus on developing in students the skills of successful debaters. These are the skills so clearly lacking in contemporary society of listening and persuading through civil discourse backed by fact based evidence and reason. Resolved explains how one simple educational reform can help address the nation's political divide and at the same time help ensure that today's young people will actually enjoy learning and thus will have the necessary skills to lead productive and economically rewarding lives. The book offers practical ideas about a positive future for parents, educators, state legislators, business leaders, in fact anyone interested in how debate centered education can fundamentally change the country for the better.

Comparative Sociology of Examinations Fumiya Onaka, 2019-03-28. Contemporary societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East, the North and the South, tribal and mass society, ancient and postmodern civilization, and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition.
