The Material Life Of Human Beings Artifacts Behavior And Communication:

The Material Life of Human Beings Michael Brian Schiffer, 2002-01-22 In this ground breaking work the distinguished anthropological theorist Michael Brian Schiffer presents a profound challenge to the social sciences Through a broad range of examples he demonstrates how theories of behaviour and communication have too often ignored the fundamental importance of objects in human life In *The Material Life of Human Beings* the author builds upon the premise that the most important feature of human life is not language but the relationships which take place between people and objects The author shows that artifacts are involved in all modes of human communication be they visual auditory or tactile By creatively folding elements of postmodernist thought into a scientific framework he creates new concepts and models for understanding and analysing communication and behavior Challenging established theories within the social sciences Michael Brian Schiffer offers a reassessment of the centrality of materiality to everyday life [The Oxford Handbook of Light in Archaeology](#) Costas Papadopoulos, Holley Moyes, 2021-12-09 The first volume of its kind to address the impact and influence of light in different facets of archaeology from myth and ritual to houses and museum exhibitions Combines theory and methodology from archaeology anthropology architecture urban design art philology and computer science Arranged in a thematic structure based on uses of light in different spatial contexts to allow quick reference to specific aspects of light in archaeology Richly illustrated throughout Book jacket **Body, Dress, and Identity in Ancient Greece** Mireille M. Lee, 2015-01-12 This is the first general monograph on ancient Greek dress in English to be published in more than a century By applying modern dress theory to the ancient evidence this book reconstructs the social meanings attached to the dressed body in ancient Greece Whereas many scholars have focused on individual aspects of ancient Greek dress from the perspectives of literary visual and archaeological sources this volume synthesizes the diverse evidence and offers fresh insights into this essential aspect of ancient society Intended to be accessible to nonspecialists as well as classicists and students as well as academic professionals this book will find a wide audience [The Oxford Companion to Archaeology](#) Neil Asher Silberman, 2012-11 The second edition of *The Oxford Companion to Archaeology* is a thoroughly up to date resource with new entries exploring the many advances in the field since the first edition published in 1996 In 700 entries the second edition provides thorough coverage to historical archaeology the development of archaeology as a field of study and the way the discipline works to explain the past In addition to these theoretical entries other entries describe the major excavations discoveries and innovations from the discovery of the cave paintings at Lascaux to the deciphering of Egyptian hieroglyphics and the use of luminescence dating Recent developments in methods and analytical techniques which have revolutionized the ways excavations are performed are also covered as well as new areas within archeology such as cultural tourism and major new sites which have expanded our understanding of prehistory and human developments through time In addition to significant expansion first edition entries have been thoroughly revised and updated to reflect the progress that

has been made in the last decade and a half

The Oxford Handbook of Culture and Psychology Jaan

Valsiner, 2013-12-15 The goal of cultural psychology is to explain the ways in which human cultural constructions for example rituals stereotypes and meanings organize and direct human acting feeling and thinking in different social contexts A rapidly growing international field of scholarship cultural psychology is ready for an interdisciplinary primary resource Linking psychology anthropology sociology archaeology and history The Oxford Handbook of Culture and Psychology is the quintessential volume that unites the variable perspectives from these disciplines Comprised of over fifty contributed chapters this book provides a necessary comprehensive overview of contemporary cultural psychology Bridging psychological sociological and anthropological perspectives one will find in this handbook A concise history of psychology that includes valuable resources for innovation in psychology in general and cultural psychology in particular Interdisciplinary chapters including insights into cultural anthropology cross cultural psychology culture and conceptions of the self and semiotics and cultural connections Close conceptual links with contemporary biological sciences especially developmental biology and with other social sciences A section detailing potential methodological innovations for cultural psychology By comparing cultures and the often differing human psychological functions occurring within them The Oxford Handbook of Culture and Psychology is the ideal resource for making sense of complex and varied human phenomena

Ancient Maya Teeth Vera

Tiesler, 2025-01-07 A study of Maya dental modification from archaeological sites spanning three millennia Dental modification was common across ancient societies but perhaps none were more avid practitioners than the Maya They filed their teeth flat or pointy polished and drilled them and crafted decorative inlays of jade and pyrite Unusually Maya of all social classes ages and professions engaged in dental modification What did it mean to them Ancient Maya Teeth is the most comprehensive study of Maya dental modification ever published based on thousands of teeth recovered from 130 sites spanning three millennia Esteemed archaeologist Vera Tiesler sifts the evidence much of it gathered with her own hands and illustrated here with more than a hundred photographs Exploring the underlying theory and practice of dental modification Tiesler raises key questions How did modifications vary across the individual's lifespan What tools were used How did the Maya deal with pain and malpractice How did they keep their dentitions healthy functioning and beautiful What were the relationships among gender social identity and religious identifications Addressing these and other issues Ancient Maya Teeth reveals how dental modification customs shifted over the centuries indexing other significant developments in Mayan cultural history

Where is Language? Ruth Finnegan, 2020-06-11

Language is central to human experience and our understanding of who we are whether written or unwritten sung or spoken But what is language and how do we record it Where does it reside Does it exist and evolve within written sources in performance in the mind or in speech For too long ethnographic aesthetic and sociolinguistic studies of language have remained apart from analyses emerging from traditions such as literature and performance Where is Language argues for a more complex and contextualized understanding of

language across this range of disciplines engaging with key issues including orality literacy narrative ideology performance and the human communities in which these take place Eminent anthropologist Ruth Finnegan draws together a lifetime of ethnographic case studies reading and personal commentary to explore the roles and nature of language in cultures across the world from West Africa to the South Pacific By combining research and reflections Finnegan discusses the multi modality of language to provide an account not simply of vocabulary and grammar but one which questions the importance of cultural settings and the essence of human communication itself Handbook of Research on the Facilitation of Civic Engagement through Community Art Hersey, Leigh Nanney,Bobick, Bryna,2016-12-05 Outreach and engagement initiatives are crucial in promoting community development This can be achieved through a number of methods including avenues in the fine arts The Handbook of Research on the Facilitation of Civic Engagement through Community Art is a comprehensive reference source for emerging perspectives on the incorporation of artistic works to facilitate improved civic engagement and social justice Featuring innovative coverage across relevant topics such as art education service learning and student engagement this handbook is ideally designed for practitioners artists professionals academics and students interested in active citizen participation via artistic channels *Rethinking Virtual Places* Erik Champion,2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed experienced and critiqued In *Rethinking Virtual Places* Erik Malcolm Champion draws from the fields of computational sciences and other place related disciplines to argue for a more central role for virtual space in the humanities For instance recent developments in neuroscience could improve our understanding of how people experience store and recollect place related encounters Similarly game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient In addition Champion provides a brief introduction to new and emerging software and devices and explains how they help hinder or replace our traditional means of designing and exploring places Perfect for humanities scholars fascinated by the potential of virtual space *Rethinking Virtual Places* challenges both traditional and recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place The Cambridge Handbook of Sociocultural Psychology Jaan Valsiner,Alberto Rosa,2007-06-04 This book first published in 2007 is an international overview of the state of our knowledge in sociocultural psychology as a discipline located at the crossroads between the natural and social sciences and the humanities Since the 1980s the field of psychology has encountered the growth of a new discipline cultural psychology that has built new connections between psychology sociology anthropology history and semiotics The handbook integrates contributions of sociocultural specialists from fifteen countries all tied together by the unifying focus on the role of sign systems in human relations with the environment It emphasizes theoretical and methodological discussions on the cultural nature of human psychological phenomena moving on to show how meaning is a natural feature of action and how it eventually produces conventional symbols for communication Such symbols shape

individual experiences and create the conditions for consciousness and the self to emerge turn social norms into ethics and set history into motion

Power Struggles Michael B. Schiffer, 2008 Laying the foundation for Thomas Edison the first electric generators were built in the 1830s the earliest commercial lighting systems before 1860 and the first commercial application of generator powered light in the early 1860s This book examines some of these early applications of electricity

Lahav II: Households and the Use of Domestic Space at Iron II Tell Halif James W. Hardin, 2010-06-30 This volume focuses on the reconstruction of household organization during the Iron II period at Tell Halif It centers in

particular on one four room pillared type building located in Area F7 of Field IV and on its remains which were sealed in a massive destruction that eclipsed the site in the late eighth century B C E This study was first prepared as a Ph D dissertation for the Department of Near Eastern Studies at the University of Arizona Hardin 2001 and has since been amplified and embellished by further research Published here are the results of research deliberately designed by the author to provide for more complete recovery and detailed recording in the field of all artifacts and other remains within a special refined three dimensional grid matrix These data in turn established a framework for studying the formation processes active on the materials and for conducting a spatial analysis of the assemblages in the building Along with developing ethnographic and ethnoarchaeological inferences these techniques are used to identify activities activity areas and social organization related to the building ultimately defining an archaeological household consisting of the pillared dwelling and its occupants Finally these conclusions are also related to reconstructions of the Iron II period household suggested by Hebrew Bible sources

Fast-Forward Family Elinor Ochs,Tamar Kremer-Sadlik,2013-03-01 Called the most unusually voyeuristic anthropology study ever conducted by the New York Times this groundbreaking book provides an unprecedented glimpse into modern day American families In a study by the UCLA Sloan Center on Everyday Lives and Families researchers tracked the daily lives of 32 dualworker middle class Los Angeles families between 2001 and 2004 The results are startling and enlightening Fast Forward Family shines light on a variety of issues that face American families the differing stress levels among parents the problem of excessive clutter in the American home the importance and decline of the family meal the vanishing boundaries that once separated work and home life and the challenges for parents as they try to reconcile ideals regarding what it means to be a good parent a good worker and a good spouse Though there are also moments of connection affection and care it s evident that life for 21st century working parents is frenetic with extended work hours children s activities chores meals to prepare errands to run and bills to pay *How Things Shape the Mind* Lambros Malafouris,2013-07-12 An account of the different ways in which things have become cognitive extensions of the human body from prehistory to the present *A Prehistory of Ordinary People* Monica L. Smith,2021-11-23 For the past million years individuals have engaged in multitasking as they interact with the surrounding environment and with each other for the acquisition of daily necessities such as food and goods Although culture is often perceived as a collective process it is individual people who use language experience illness expend energy perceive landscapes and create memories These processes were sustained at the individual and household level from the time of the earliest social groups to the beginnings of settled agricultural communities and the eventual development of complex societies in the form of chiefdoms states and empires Even after the advent of civilization about 6 000 years ago human culture has for the most part been created and maintained not by the actions of elites as is commonly proclaimed by many archaeological theorists but by the many thousands of daily actions carried out by average citizens With this book Monica L Smith examines how the archaeological record of ordinary objects used by ordinary people

constitutes a manifestation of humankind's cognitive and social development. A Prehistory of Ordinary People offers an impressive synthesis and accessible style that will appeal to archaeologists, cultural anthropologists, and others interested in the long history of human decision making.

Technology, Literacy, and the Evolution of Society David R. Olson, Michael Cole, 2013-06-17 Inspired by the seminal work of Jack Goody, a historical anthropologist specializing in the study of social structure and change, *Technology, Literacy, and the Evolution of Society* gathers diverse perspectives of 20 distinguished historians, anthropologists, psychologists, and educators to address the role of technologies in social stability and change in traditional and modern societies. In this interdisciplinary text, scholars examine the ways in which local languages and cultural traditions, modes of production, and communication patterns of local knowledge and authority affect how people and cultures resist or accommodate demands for such change. With work from acclaimed contributors, this pioneering volume is the first analysis of the influence of Jack Goody. It provides a thorough look at the relations between societies of different practices, customs, and values, determining the mechanisms behind sociocultural stability and change. *Technology, Literacy, and the Evolution of Society* is intended for graduate students and academics in history, anthropology, psychology, sociology, and education, as well as academics and all others interested in pursuing the directions and implications of the work and influence of Jack Goody.

A Research Agenda for Border Studies James W. Scott, 2020-12-25 This innovative Research Agenda uncovers links between different levels of border-making processes, or bordering, from the political to the cognitive, and connects everyday processes and experiences of border-making to the wider social world. It addresses the question of how everyday bordering practices and discourses can be productively linked to different aspects of social relations.
