The Modern Savage Our Unthinking Decision To Eat Animals:

The Modern Savage James McWilliams, 2015-01-06 Just Food author James McWilliams's exploration of the compassionate carnivore movement and the paradox of humanity's relationship with animals. In the last four decades food reformers have revealed the ecological and ethical problems of eating animals raised in industrial settings, turning what was once the boutique concern of radical eco freaks into a mainstream movement. Although animal products are often labeled cage free, free range, and humanely raised, can we trust these goods to be safe, sound, or ethical? In *The Modern Savage*, renowned writer, historian, and animal advocate James McWilliams pushes back against the questionable moral standards of a largely omnivorous world and explores the alternative: not eating domesticated animals at all. In poignant, powerful, and persuasive prose, McWilliams reveals the scope of the cruelty that takes place even on the smallest and supposedly most humane animal farms. In a world increasingly aware of animals' intelligence and the range of their emotions, McWilliams advocates for the only truly moral, sustainable choice: a diet without meat, dairy, or other animal products. *The Modern Savage* is a riveting expose of an industry that has typically hidden behind a veil of morality and a compelling account of how to live a more economical, environmental, and ethical life.

Why We Love and Exploit Animals Kristof Dhont, Gordon Hodson, 2019-11-08 This unique book brings together research and theorizing on human-animal relations, animal advocacy, and the factors underlying exploitative attitudes and behaviors towards animals. Why do we both love and exploit animals? Assembling some of the world's leading academics and with insights and experiences gleaned from those on the front lines of animal advocacy, this pioneering collection breaks new ground, synthesizing scientific perspectives and empirical findings. The authors show the complexities and paradoxes in human-animal relations and reveal the factors shaping compassionate versus exploitative attitudes and behaviors towards animals. Exploring topical issues such as meat consumption, intensive farming, speciesism, and effective animal advocacy, this book demonstrates how we both value and devalue animals, how we can address animal suffering, and how our thinking about animals is connected to our thinking about human intergroup relations and the dehumanization of human groups. This is essential reading for students, scholars, and professionals in the social and behavioral sciences interested in human-animal relations and will also strongly appeal to members of animal rights organizations, animal rights advocates, policy makers, and charity workers.

Meat Makes People Powerful Wilson J. Warren, 2018-02-15 From large-scale cattle farming to water pollution, meat more than any other food has had an enormous impact on our environment. Historically, Americans have been among the most avid meat eaters in the world, but long before that, meat was not even considered a key ingredient in most civilizations' diets. Labor historian Wilson Warren, who has studied the meat industry for more than a decade, provides this global history of meat to help us understand how it entered the daily diet and at what costs and benefits to society. Spanning from the nineteenth century to current and future trends, Warren walks us through the economic theory of food, the discovery of protein, the Japanese eugenics debate around

meat and the environmental impact of livestock among other topics Through his comprehensive multifaceted research he provides readers with the political economic social and cultural factors behind meat consumption over the last two centuries With a special focus on East Asia *Meat Makes People Powerful* reveals how national governments regulated and oversaw meat production helping transform virtually vegetarian cultures into major meat consumers at record speed As more and more Americans pay attention to the sources of the meat they consume Warren s compelling study will help them not only better understand the industry but also make more informed personal choices Providing an international perspective that will appeal to scholars and nutritionists alike this timely examination will forever change the way you see the food on your plate

Eating Animals Jonathan Safran Foer, 2010-09-01 Part memoir and part investigative report Eating Animals is a groundbreaking moral examination of vegetarianism farming and the food we eat every day that inspired the documentary of

the same name Bestselling author Jonathan Safran Foer spent much of his life oscillating between enthusiastic carnivore and occasional vegetarian For years he was content to live with uncertainty about his own dietary choices but once he started a family the moral dimensions of food became increasingly important Faced with the prospect of being unable to explain why we eat some animals and not others Foer set out to explore the origins of many eating traditions and the fictions involved with creating them Traveling to the darkest corners of our dining habits Foer raises the unspoken question behind every fish we eat every chicken we fry and every burger we grill A must read for anyone who cares about building a more humane and healthy world Eating Animals is a book that in the words of the Los Angeles Times places Jonathan Safran Foer at the table with our greatest philosophers *Eat This Book* Dominique Lestel, 2016-03-08 If we want to improve the treatment of animals Dominique Lestel argues we must acknowledge our evolutionary impulse to eat them and we must expand our worldview to see how others consume meat ethically and sustainably The position of vegans and vegetarians is unrealistic and exclusionary Eat This Book calls at once for a renewed and vigorous defense of animal rights and a more open approach to meat eating that turns us into responsible carnivores Lestel skillfully synthesizes Western philosophical views on the moral status of animals and holistic cosmologies that recognize human animal reciprocity He shows that the carnivore's position is more coherently ethical than vegetarianism which isolates humans from the world by treating cruelty violence and conflicting interests as phenomena outside of life Describing how meat eaters assume completely which is to say metabolically their animal status Lestel opens our eyes to the vital relation between carnivores and animals and carnivores genuine appreciation of animals life sustaining flesh He vehemently condemns factory farming and the terrible footprint of industrial meat eating His goal is to recreate a kinship between humans and animals that reminds us of what it means to be tied to the world

The Meat Paradox Rob Percival, 2022-03-03 Our future diet will be shaped by diverse forces It will be shaped by novel technologies and the logic of globalisation by geopolitical tensions and the evolution of cultural preferences by shocks to the status quo pandemics and economic strife the escalation of the climate and ecological crises and by how we choose to respond It will also be shaped by our emotions It will be shaped by the meat paradox Should we eat animals was until recently a question reserved for moral philosophers and an ethically minded minority but it is now posed on restaurant menus and supermarket shelves on social media and morning television The recent surge in popularity for veganism in the UK Europe and North America has created a rupture in the rites and rituals of meat challenging the cultural narratives that sustain our omnivory In The Meat Paradox Rob Percival an expert in the politics of meat searches for the evolutionary origins of the meat paradox asking when our relationship with meat first became emotionally and ethically complicated Every society must eat and meat provides an important source of nutrients But every society is moved by its empathy We must all find a way of balancing competing and contradictory imperatives It is essential reading for anyone interested in the origins of our empathy the psychology of our dietary choices and anyone who has wondered whether they should or shouldn't eat meat

Eat Like You Care: Gary L. Francione, Anna Charlton, 2022-12-08 *EAT LIKE YOU CARE* Gary Francione, 2013 **We Don't Eat Animals** Devin Gregory, 2020-04-19

Vegan children's book for our younger readers We don't eat animals but some people do This can sometimes be hard to explain to a child but let's give it a try **Eat Like You Care** Gary L. Francione, Anna Charlton, 2015 **Springer Mountain** Wyatt Williams, 2021

Restaurant goers in the southeastern United States have likely noted the phrase featuring Springer Mountain Farms chicken proudly displayed on their menu After working the restaurant beat for years in Atlanta restaurant critic and writer Wyatt Williams decided to find this fabled farm to see just what if anything made Springer Mountain chicken so special What he found instead was an elaborate marketing scheme After some digging and a few interviews Williams discovered that the Fieldale Farms Corporation owner of the Springer brand name sells millions of chickens from small family farms like Springer Mountain that don't really exist In fact Fieldale is a huge factory farm producing poultry packaged under several different brand names before shipment to supermarkets and restaurants After his Springer Mountain discovery Williams spent a year dedicated to understanding what it meant to work and live meat He moved to a chicken farm learned to hunt his own game worked on a slaughterhouse kill floor and even traveled to Alaska to partake in Indigenous traditions around eating whale Along the way Williams contemplated the ethics and meaning of killing something in order to eat it and how much work we do to divorce ourselves psychologically from that fact A mix of investigative journalism travel narrative and creative non-fiction Springer Mountain is not a polemic against nor a defense of meat eating What we learn from the author's journey is that our modern connection to animals is predicated on why and how we kill them that killing and eating animals is a human way of organizing and applying order to the world and that the human pleasure of eating meat is indivisible from the pleasures humans take in assuming control even over what lives and dies This book shows how mysteries springing up from everyday experiences can lead us into the big questions of life while examining the irreconcilable differences between humans and animals
