Arthur Romano,2022-07-14 This book examines the role that community based educators in violence affected cities play in advancing Dr Martin Luther King Jr s radical nonviolent vision for racial and social justice This work argues that nonviolence education can help communities build capacity to disrupt and transform cycles of violence by recognizing that people impacted by violence are effective educators and vital knowledge producers who develop unique insights into racial oppression and other forms of systemic harm This book focuses on informal education that takes place beyond school walls a type of education that too often remains invisible and undervalued in both civil society and scholarly research It draws on thousands of hours of work with the Connecticut Center for Nonviolence CTCN a grassroots organization that presents an ideal case study of the implementation of King s core principles of nonviolence in 21st century urban communities Stories of educators life changing educational encounters their successes and failures and their understanding of the six principles of Kingian nonviolence animate the text Each chapter delves into one of the six principles by introducing the reader to the lives of these educators providing a rich analysis of how educators teach each principle and sharing academic resources for thinking more deeply about each principle Against the backdrop of today s educational system in which reductive and caricatured treatments of King are often presented within the formal classroom CTCN s work outside of the classroom takes a fundamentally different approach connecting King s thinking around nonviolence principles to working for racial justice in cities deeply impacted by violence This book will be of much interest to students of conflict resolution race studies politics and education studies as well as to practitioners in the field Monthly Index of Russian Accessions ,1968

Industrialisation of Soviet Russia Volume 4: Crisis and Progress in the Soviet Economy, 1931-1933 R. W. Davies,2016-07-27 The profound economic crisis of 1931-33 undermined the process of industrialisation and the stability of the regime In spite of feverish efforts to achieve the over ambitious first five year plan the great industrial projects lagged far behind schedule These were years of inflation economic disorder and of terrible famine in 1933 In response to the crisis policies and systems changed significantly Greater realism prevailed more moderate plans reduced investment strict monetary controls and more emphasis on economic incentives and the role of the market The reforms failed to prevent the terrible famine of 1933 in which millions of peasants died But the last months of 1933 saw the first signs of an industrial boom the outcome of the huge investments of previous years Using the previously secret archives of the Politburo and the Council of People's Commissars the author shows how during these formative years the economic system acquired the shape which it retained until the collapse of the Soviet Union in 1991 East European Accessions Index,1960 Frank Grant Richard
