Taking Care Of Youth And The Generations:

Taking Care of Youth and the Generations Bernard Stiegler, 2010 The book presents a powerful reminder of adults responsibility for the development of long term attention and thus of maturity in children particularly in the face of the techniques of attention destruction practiced by the programming industries Bernard Stiegler Bart Buseyne, Georgios Tsagdis, Paul Willemarck, 2024-01-25 Honouring the memory of the late Bernard Stiegler this edited collection presents a broad spectrum of contributions that provide a complex and coherently articulated image of Stiegler's thought which reached beyond the boundaries of academic artistic and experimental techno scientific enclaves where it had been originally received Stiegler's philosophical work encompassed theorization social diagnosis planning practical and territorial experimentation politics and aesthetics In its wake the essays in this volume celebrate and explore the wealth of this multi dimensional legacy They examine the conditions of human life in general its foundational intermittence and carry forward Stiegler's post phenomenological unfolding of the distinctive spatio temporalities that weave together the epoch we call present Engaging closely with Stiegler's original impetus for the creation of technologies of care as well as of communities of knowledge and artistic practice **Feminism, Digital Culture and the Politics of Transmission** Deborah Withers, 2015-10-02 Feminism Digital Culture and the Politics of Transmission argues that despite the prevalence of generational narratives within feminism the technical processes through which knowledge is transmitted across generations remain unexplored Taking Bernard Stiegler's concept of the already there as its starting point the book considers how the politics of transmission operates within digital culture It argues that it is necessary to re orient feminism's political project within what is already there so that it may respond to an emergent feminist tradition Grounded in the author's work collecting and interpreting the music making heritage of the UK Women's Liberation Movement it explores how digital technologies have enabled impassioned amateurs to make archives within the first decade of the 21st century The book reflects on what is technically and politically at stake in the organization and transmission of digital artifacts and explores what happens to feminist cultural heritage when circuits shut down stall or become diverted **The Assemblage Brain** Tony D. Sampson, 2016-12-13 Once upon a time neuroscience was born A dazzling array of neurotechnologies emerged that according to popular belief have finally begun to unlock the secrets of the brain But as the brain sciences now extend into all corners of cultural social political and economic life a yet newer world has taken shape neuroculture which goes further than ever before to tackle the profound ethical implications we face in consequence The Assemblage Brain unveils a major new concept of sense making one that challenges conventional scientific and philosophical understandings of the brain Drawing on Deleuze and Guattari Tony D Sampson calls for a radical critical theory that operates in the interferences between philosophy science art and politics From this novel perspective the book is structured around two questions What can be done to a brain and What can a brain do Sampson examines the rise of neuroeconomics in informing significant developments in computer work marketing and the

neuropharmaceutical control of inattentiveness in the classroom Moving beyond the neurocapitalist framework he then reestablishes a place for proto subjectivity in which biological and cultural distinctions are reintegrated in an understanding of the brain as an assemblage The Assemblage Brain unravels the conventional image of thought that underpins many scientific and philosophical accounts of how sense is produced providing a new view of our current time in which capitalism and the neurosciences endeavor to colonize the brain

The Thought of Bernard Stiegler Ross Abbinnett, 2017-07-06 This book provides a comprehensive account of the work of Bernard Stiegler focusing on his thought on hyperindustrial societies and the development of technological systems through which the social economic and political life of human beings has been transformed Exploring the reciprocal development of technical instruments and human faculties in the digital informatic and biotechnological programmes of hyperindustrial societies the author develops Stiegler's idea of technology as a Pharmakon a network of systems that provoke both existential despair and unprecedented modes of aesthetic literary and philosophical creativity that can potentially revitalize political culture

The Past is the Present; It's the Future Too Christine Ross, 2012-06-28 The term temporality often refers to the traditional mode of the way time is a linear procession of past present and future As philosophers will note this is not always the case Christine Ross builds on current philosophical and theoretical examinations of time and applies them to the field of contemporary art films video installations sculpture and performance works Ross first provides an interdisciplinary overview of contemporary studies on time focusing on findings in philosophy psychology sociology communications history postcolonial studies and ecology She then illustrates how contemporary artistic practices play around with what we consider linear time Engaging the work of artists such as Guido van der Werve Melik Ohanian Harun Farocki and Stan Douglas allows investigation though the art as opposed to having art taking an ancillary role The Past is the Present It's the Future Too forces the reader to understand the complexities of the significance of temporal development in new artistic practices

Phenomenology of Practice Max Van Manen, 2016-09-16 Max van Manen offers an extensive exploration of phenomenological traditions and methods for the human sciences It is his first comprehensive statement of phenomenological thought and research in over a decade Phenomenology of practice refers to the meaning and practice of phenomenology in professional contexts such as psychology education and health care as well as to the practice of phenomenological methods in contexts of everyday living Van Manen presents a detailed description of key phenomenological ideas as they have evolved over the past century he then thoughtfully works through the methodological issues of phenomenological reflection empirical methods and writing that a phenomenology of practice offers to the researcher Van Manen's comprehensive work will be of great interest to all concerned with the interrelationship between being and acting in human sciences research and in everyday life Max van Manen is the editor of the series Phenomenology of Practice <https://www.routledge.com/series/PPVM>

Pedagogical Encounters in the Post-Anthropocene, Volume 2 Jan Jagodzinski, 2024-04-26 As a follow up to Pedagogical Encounters in the Post Anthropocene Volume I this book

addresses three major areas in response to the post Anthropocene Technology Neurology Quantum Each of these areas is broadly addressed in relation to the concerns that have arisen both theoretically and educationally As in Volume I the author terms these to be encounters as each area presents a particular problematic when addressing the phase change that the planet is undergoing where the anthropogenic labour of global humanity is contributing to climate change endangering our very existence Technology in education has been a significant development There is a concerted effort to review this development placing stress on the rise of learning machines and algorithms In the second encounter the vast literature on neurology is addressed especially neurodiversity and the various symptoms that have emerged in the post Anthropocene era The last section reviews issues related to quantum theory as this is fundamental to tensions between physics and metaphysics The volume concludes with the author's own pedagogical proposal for the future

Working with Young People Xavier Úcar, Pere Soler-Masó, Anna Planas-Lladó, 2020-02-28 *Working with Young People* offers a new outlook on social cultural and educational work with young people It utilizes the perspective of social pedagogy a theoretical and practical perspective that has been developing in continental Europe over the last 150 years in placing young people at the center of socio educational work and giving value to their decisions and actions The text supports youths process of personal construction within the framework of the community in which they live

Symptoms of Exit: Reflections beyond the Political Soumick De, 2025-11-01 The volume delves into the provocative terrain of escape as a mode of resistance Through a diverse array of studies encompassing political theology and artificial intelligence the author navigates the philosophical landscape of exiting established forms of knowledge and practices Drawing from a rich tapestry of Western thought from Carl Schmitt and St Augustine to Bernard Stiegler and Antonio Negri the volume engages deeply with the notion of forging new pathways beyond existing political paradigms The chapters present a fresh perspective on the dynamics of political transformation urging readers to reconsider conventional boundaries and embrace innovative approaches to social change By examining the intersections of philosophy politics and technology it invites readers to contemplate profound questions about liberation creativity and the potential for radical societal renewal It is an essential reading for scholars activists and anyone intrigued by the philosophical underpinnings of resistance and the quest for new horizons in political theory and practice

Plasticity in Motion Robert M. Foschia, 2022-09-23 *Plasticity in Motion* Sport Gender and Biopolitics argues that sport has a transformative power that when engaged with habitually can create bodies with the athletic ability to succeed at the incredible performances that captivate modern sports audiences Robert M Foschia draws heavily from the influential and extensive work of Catherine Malabou on plasticity the ability to shape and form and similarly argues that transformation is not always positive or infinite with the potential for accidents injuries and excommunications However sport as a discursive space often precludes any mention of these negative transformations asserting itself as pure potential and becoming often to the exclusion of the feminine What occurs if the feminine enters into this space Foschia intentionally integrates the feminine

back into hypermasculine discussions of sport opening a new realm of possible transformations to the ways we play watch and think about sports Scholars of communication media studies gender studies rhetoric and sports will find this book particularly useful

Getting HIV-Positive Youth Into Care Barry Leonard, 2000-03 *Getting HIV-positive Youth Into Care*, 1997

Youth participation, 1947

States of Shock Bernard Stiegler, 2015-02-18 In 1944 Horkheimer and Adorno warned that industrial society turns reason into rationalization and Polanyi warned of the dangers of the self regulating market but today argues Stiegler this regression of reason has led to societies dominated by unreason stupidity and madness However philosophy in the second half of the twentieth century abandoned the critique of political economy and poststructuralism left its heirs helpless and disarmed in face of the reign of stupidity and an economic crisis of global proportions New theories and concepts are required today to think through these issues The thinkers of poststructuralism Lyotard Deleuze Derrida must be re read as must the sources of their thought Hegel and Marx But we must also take account of Naomi Klein s critique of Milton Friedman and the Chicago School and her account of the shock doctrine In fact argues Stiegler a permanent state of shock has prevailed since the beginning of the industrial revolution intensified by the creative destruction brought about by the consumerist model The result has been a capitalism that destroys desire and reason and in which every institution is

undermined above all those institutions that are the products par excellence of the Enlightenment the education system and universities Through a powerful critique of thinkers from Marx to Derrida Stiegler develops new conceptual weapons to fight this destruction He argues that schools and universities must themselves be transformed new educational institutions must be developed both to take account of the dangers of digitization and the internet and to enable us to take advantage of the new opportunities they make available
