Taking Sides James Wm Noll, 2007 This is a debate style reader designed to introduce students to controversies in education The readings which represent the arguments of leading educators and social commentators reflect opposing positions and have been selected for their liveliness and substance and because of their value in a debate framework For each issue the editor provides a concise introduction and postscript summary The introduction sets the stage for the debate as it is argued in the yes and no readings The postscript briefly reviews the opposing opinions and suggests additional readings on the controversial issue under discussion Back cover

My Activity Book Part 1 Chandan Sengupta, Copyright Chandan Sengupta All Rights Reserved This workbook is prepared for aspirants of Central Board of Secondary Education Worksheets from Olympiads and Talent Search Examinations are also there in this volume to accelerate pace of learning Some of the mathematical skills and competency components are specially addressed with greater attention to ensure enhancement of all those critical competencies This book is for aspirants looking for some more practices to enhance their mathematical skills and competence It can be used only after completing the text books and reference books recommended by the school of the fellow learner This book accommodates all possible streams of curriculum prescribed for the students belonging to the age group of 09 to 13 years It can even help them in gaining skills of tackling composite mathematical problems duly coined for addressing more than three

and more basic skills. Answers of individual problems are not included in this booklet. There exists a separate collection for fulfilling such purposes. Due to this reason, this handbook can be used by teachers and fellow parents for assessing achievement levels of their aspirants. This handbook provides ample scope of skill enhancement through offering series of test materials in which aspirants have to use more than one skill at a time. It will also improve the ability to think and work out own strategies of resolving mathematical problems. There are mathematical problems which require knowledge of more than one thematic area. Such problems are incorporated in the collections of Composite worksheets. In this workbook, such composite worksheets are more in number. For all students, it would be better if they acquire such skills in advance before moving through the composite worksheets. Other books in this series are as follows: 1. Handbook of Mathematics, 2. Creative Mathematics Book 4 Part 1, 3. Olympiad and Talent, 4. Aspirations of Mathematics, 5. My Own Book of School Mathematics. All these books are suitable for students of School stage having age group 09 to 13 years. Chandan Sukumar Sengupta
