Mobile Networks and Management Kostas Pentikousis, Oliver Blume, Ramon Agüero, Symeon Papavassiliou, 2010-02-17
The First International ICST Conference on Mobile Networks and Management MONAMI was held in Athens Greece during October 13 14 2009 hosted by the National Technical University of Athens Through what we hope will be a long lasting series of events this new international conference aims at bringing together top researchers academics and practitioners specializing in the area of mobile network management Multiaccess and resource management mobility management and network management have emerged as core topics in the design deployment and operation of current and future networks Yet they are treated as separate isolated domains with very little interaction between the experts in these fields and lack cross pollination MONAMI 2009 offered the opportunity to leading researchers industry professionals and academics to meet and discuss the latest advances in these areas and present results related to technologies for true plug and play networking efficient use of all infrastructure investments and access competition MONAMI 2009 featured eight full papers and five short papers which were selected after a thorough peer review process based on their relevance to the scope of the conference and their technical merit The overall acceptance rate was 50% The contributing authors covered a range of topics in mobile networks and their management that are currently of high interest in the wireless research area *Network Tutorial* Steve Steinke, 2003-01-01
Network Tutorial delivers insight and understanding about network technology to managers and executives trying to get up to speed or stay current with the complex challenges of designing constructing maintaining upgrading and managing the network *Networking and Data Communications Laboratory Manual* Frances S. Grodzinsky, 1999 Designed for any introductory networking or data communications course This laboratory manual is designed for the purpose of enhancing the understanding of concepts discussed in a variety of networks and data communications texts This manual represents a work of dedication and collaboration by faculty from universities and colleges across the country Software for Computer Control 1982 G. Ferrate, E. A. Puente, 2014-05-16 Software for Computer Control 1982 covers the proceedings of the Third IFAC IFIP Symposium The book discusses the state of software development for digital computer applications for science and control With a total of 73 papers the book covers topics such as real time language and operating systems man machine communication software software for robots software for distributed control systems C A D of digital computer controls systems algorithms for digital computer control control software engineering and management and industrial applications Computer scientists engineers and IT professionals will find this book interesting since it provides discussions on the various applications of computer programs **Computation Structures** Stephen A. Ward, Robert H. Halstead, 1990 Computer Systems Organization general **Wiley Encyclopedia of Telecommunications, Volume 3** John G. Proakis, 2003 Contains 275 tutorial articles focused on modern telecommunications topics The contents include articles on communication networks source coding and decoding channel coding and decoding modulation and demodulation optical communications satellite
