Founded on the value investing course taught for almost twenty-five years by co-author Bruce Greenwald at Columbia Business School, the book helps investors consistently land on the profitable side of the trade. Readers will learn how to search for underpriced securities, value them accurately, hone a research strategy, and apply it all in the context of a risk management practice that mitigates the chance of a permanent loss of capital. The new edition includes two innovative new chapters discussing the valuation of growth stocks, a perennial problem for investors in the Graham and Dodd tradition. New profiles of successful investors including Tom Russo, Paul Hilal, and Andrew Weiss. An extended discussion of risk management including modern best practices in an environment where it is often divorced from individual security selection. It is an essential resource for portfolio managers, retail and institutional investors, and anyone else with a professional or personal interest in securities valuation and investing.
