Endocrine Regulation and Physiological Adaptation of Stress Response in Aquatic Organisms, Volume II Yiming Li, Marco António Campinho, Yi-Feng Li, Juan Fuentes, 2025-01-07 Organismal growth is a multi gene regulatory process that integrates various physiological signaling pathways in vivo from energy metabolism to somatic growth In fully developed animals endocrine regulation assures that homeostasis and growth can adapt the organism to changing environmental and biological conditions thus being the central regulatory hub for physiological responses Much attention has been paid to the endocrine regulation of aquatic organism growth and regulation These endocrine systems include neuroendocrine and insulin like growth factors and their downstream molecules Many signaling molecules promote tissue growth and regulate the metabolism of many nutrients in vivo Like other animals aquatic animals respond to environmental stimuli through endocrine regulation that modulates physiological and environmental responses Environmental stressors can affect aquatic ecosystems and their inhabitants including but not limited to temperature hypoxia salinity heavy metal nanomaterials pesticides microplastics and other toxic pollutants The presence of stress disrupts the homeostasis of aquatic animals inducing physiological molecular and behavioral changes Research into the endocrine regulation and physiological adaptation in aquatic organisms and the molecular mechanisms involved can aid in forecasting danger and assessing physiological well being That has never been more present than now amid climate change where aquatic environments are amongst the most susceptible biomes This research topic addresses these emergent questions by inviting studies investigating and discussing the molecular and cellular mechanisms of endocrine regulation and physiological adaptation in aquatic organisms to environmental stresses Gaining an insight into the current knowledge of these responses and the related mechanisms will give us a deeper understanding of aquatic animal biology and adaptation

Greening National Development Financial Institutions Emma

Dalhuijsen, Eva Gutierrez, Tatsiana Kliatskova, Rachel Mok, Martijn Gert Jan Regelink, 2023-01-12 National Development Financial Institutions NDFIs are crucial in mobilizing financing including from private sector to reach countries climate and environmental C E objectives NDFIs often state owned FIs with a socioeconomic objective hold close to 19 trillion in assets and represent more than 10 percent of global investments annually When adequately managed they can address market failures and create new markets At the same time NDFIs need to manage the C E risks present to their investment and lending operations This report takes stock of the current trends and recommends policy actions for greening NDFIs distilling insights from a survey of 22 NDFIs with broad geographical and income level coverage as well as in depth case studies of 4 NDFIs The report recommends that NDFIs introduce governance arrangements and formulate a strategy that is aligned with country C E goals and includes quantitative green finance targets NDFIs need to mobilize private capital through the development of bankable projects using technical assistance market education standardization of procedures and the creation of project preparation facilities They should use blended finance and pilot and scale up innovative green instruments At the same time NDFIs should adopt a comprehensive C E risk management framework covering potential environmental and climate risks generated by the institutions as well as financial risks to their balance sheets arising from C E factors Exposure assessments and stress testing would help better understand the impact and materiality of C E financial risks on NDFI portfolios and inform internal capital and liquidity adequacy assessment processes Finally NDFIs should enhance their C E disclosure and reporting practices in line with guidance from the Task Force on Climate Related Financial Disclosures TCFD as well as forthcoming disclosure guidance from the International Sustainability Standards Board ISSB As NDFIs scale up C E operations it is also essential to enhance their general efficiency and effectiveness by ensuring that they are effectively managed and properly supervised
