A Guidebook for the Preservation of Public-Use Airports Thomas P Thatcher, 2011 TRB's Airport Cooperative Research Program ACRP Report 44 A Guidebook for the Preservation of Public Use Airports describes why public use airports close and identifies measures and strategies that can be undertaken to potentially help preserve and prevent an airport closure

A Guidebook for Selecting Airport Capital Project Delivery Methods Ali Touran, 2009 Describes various project delivery methods for major airport capital projects The guidebook also evaluates the impacts advantages and disadvantages of these various project delivery methods The project delivery methods discussed include design bid build DBB construction manager at risk CMR and design build DB The guidebook offers a two tiered project delivery selection framework that may be used by owners of airport projects to evaluate the pros and cons of each delivery method and select the most appropriate method for their project Tier 1 is an analytical delivery decision approach that is designed to help the user understand the attributes of each project delivery method and whether the delivery method is appropriate for their specific circumstance Tier 2 uses a weighted matrix delivery decision approach that allows users to prioritize their objectives and based on the prioritized objectives select the delivery method that is best suited for their project The report will be helpful to airports with determining the most appropriate project delivery methods e.g. DBB DB or CMR for various types of airport capital projects

BIM Teaching and Learning Handbook M. Reza Hosseini, Farzad Khosrowshahi, Ajibade Aibinu, Sepehr Abrishami, 2021-08-09 This book is the essential guide to the pedagogical and industry inspired considerations that must shape how BIM is taught and learned It will help academics and professional educators to develop programmes that meet the competences required by professional bodies and prepare both graduates and existing practitioners to advance the industry towards higher efficiency and quality To date systematic efforts to integrate pedagogical considerations into the way BIM is learned and taught remain non-existent This book lays the foundation for forming a benchmark around which such an effort is made It offers principles best practices and expected outcomes necessary to BIM curriculum and teaching development for construction related programs across universities and professional training programmes The aim of the book is to Highlight BIM skill requirements threshold concepts and dimensions for practice Showcase and introduce tried and tested practices and lessons learned in developing BIM related curricula from leading educators Recognise and introduce the baseline requirements for BIM education from a pedagogical perspective Explore the challenges as well as remedial solutions pertaining to BIM education at tertiary education Form a comprehensive point of reference covering the essential concepts of BIM for students Promote and integrate pedagogical consideration into BIM education This book is essential reading for anyone involved in BIM education digital construction architecture and engineering and for professionals looking for guidance on what the industry expects when it comes to BIM competency

Collaborative Airport Capital Planning Handbook Laurie Cullen, 2011 Provides guidance to those in the airport community who have responsibility for and stake in

developing financing managing and overseeing an airport capital plan and the individual projects included in it The handbook provides clear guidance on who should perform each task in the collaborative planning process It also defines and describes the different ways in which we communicate to ensure effective exchange between internal and external stakeholders

Construction Manager-at-risk Project Delivery for Highway Programs Douglas D. Gransberg, Jennifer Sue Shane, 2010 TRB's National Cooperative Highway Research Program NCHRP Synthesis 402 Construction Manager at Risk Project Delivery for Highway Programs explores current methods in which state departments of transportation and other public engineering agencies are applying construction manager at risk CMR project delivery to their construction projects CMR project delivery is an integrated team approach to the planning design and construction of a highway project to help control schedule and budget and to help ensure quality for the project owner The team consists of the owner the designer who might be an in house engineer and the at risk construction manager The goal of this project delivery method is to engage at risk construction expertise early in the design process to enhance constructability manage risk and facilitate concurrent execution of design and construction without the owner relinquishing control over the details of design as it would in a design build project

Transportation Planning Handbook ITE (Institute of Transportation Engineers), Michael D. Meyer, 2016-07-11 A multi disciplinary approach to transportation planning fundamentals The Transportation Planning Handbook is a comprehensive practice oriented reference that presents the fundamental concepts of transportation planning alongside proven techniques This new fourth edition is more strongly focused on serving the needs of all users the role of safety in the planning process and transportation planning in the context of societal concerns including the development of more sustainable transportation solutions The content structure has been redesigned with a new format that promotes a more functionally driven multimodal approach to planning design and implementation including guidance toward the latest tools and technology The material has been updated to reflect the latest changes to major transportation resources such as the HCM MUTCD HSM and more including the most current ADA accessibility regulations Transportation planning has historically followed the rational planning model of defining objectives identifying problems generating and evaluating alternatives and developing plans Planners are increasingly expected to adopt a more multi disciplinary approach especially in light of the rising importance of sustainability and environmental concerns This book presents the fundamentals of transportation planning in a multidisciplinary context giving readers a practical reference for day to day answers Serve the needs of all users Incorporate safety into the planning process Examine the latest transportation planning software packages Get up to date on the latest standards recommendations and codes Developed by The Institute of Transportation Engineers this book is the culmination of over seventy years of transportation planning solutions fully updated to reflect the needs of a changing society For a comprehensive guide with practical answers The Transportation Planning Handbook is an essential reference

Handbook of Recycled Concrete and Demolition Waste F. Pacheco-Torgal, Yining Ding, 2013-09-30 The civil

engineering sector accounts for a significant percentage of global material and energy consumption and is a major contributor of waste material. The ability to recycle and reuse concrete and demolition waste is critical to reducing environmental impacts in meeting national, regional and global environmental targets. Handbook of recycled concrete and demolition waste summarises key recent research in achieving these goals. Part one considers techniques for managing construction and demolition waste including waste management plans, ways of estimating levels of waste, the types and optimal location of waste recycling plants and the economics of managing construction and demolition waste. Part two reviews key steps in handling construction and demolition waste. It begins with a comparison between conventional demolition and construction techniques before going on to discuss the preparation, refinement and quality control of concrete aggregates produced from waste. It concludes by assessing the mechanical properties, strength and durability of concrete made using recycled aggregates. Part three includes examples of the use of recycled aggregates in applications such as roads, pavements, high performance concrete and alkali activated or geopolymer cements. Finally, the book discusses environmental and safety issues such as the removal of gypsum, asbestos and alkali silica reaction (ASR) concrete as well as life cycle analysis of concrete with recycled aggregates. Handbook of recycled concrete and demolition waste is a standard reference for all those involved in the civil engineering sector as well as academic researchers in the field. Summarises key recent research in recycling and reusing concrete and demolition waste to reduce environmental impacts and meet national, regional and global environmental targets. Considers techniques for managing construction and demolition waste including waste management plans, ways of estimating levels of waste, the types and optimal location of waste recycling plants. Reviews key steps in handling construction and demolition waste.

Handbook of Survey Methodology for the Social Sciences

Lior Gideon, 2012-06-21. Surveys enjoy great ubiquity among data collection methods in social research; they are flexible in questioning techniques in the amount of questions asked, in the topics covered and in the various ways of interactions with respondents. Surveys are also the preferred method by many researchers in the social sciences due to their ability to provide quick profiles and results. Because they are so commonly used and fairly easy to administer, surveys are often thought to be easily thrown together. But designing an effective survey that yields reliable and valid results takes more than merely asking questions and waiting for the answers to arrive. Geared to the non-statistician, the Handbook of Survey Methodology in Social Sciences addresses issues throughout all phases of survey design and implementation. Chapters examine the major survey methods of data collection, providing expert guidelines for asking targeted questions, improving accuracy and quality of responses while reducing sampling and non-sampling bias. Relying on the Total Survey Error theory, various issues of both sampling and non-sampling sources of error are explored and discussed. By covering all aspects of the topic, the Handbook is suited to readers taking their first steps in survey methodology as well as to those already involved in survey design and execution and to those currently in training. Featured in the Handbook: The Total Survey Error, sampling and non-sampling

errors Survey sampling techniques The art of question phrasing Techniques for increasing response rates A question of ethics what is allowed in survey research Survey design face to face phone mail e mail online computer assisted Dealing with sensitive issues in surveys Demographics of respondents implications for future survey research Dealing with nonresponse and nonresponse bias The Handbook of Survey Methodology in Social Sciences offers how to clarify for researchers in the social and behavioral sciences and related disciplines including sociology criminology criminal justice social psychology education public health political science management and many other disciplines relying on survey methodology as one of their main data collection tools

The Urban Rail Development Handbook Daniel Pulido, Georges Darido, Ramon Munoz-Raskin, Joanna Moody, 2018-09-20 Cities across the globe are looking to develop affordable environmentally friendly and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development When appropriately planned and properly implemented as part of a larger public transportation network urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts High performing urban rail services when carefully approached as development projects can help enhance quality of life by giving citizens access to employment opportunities essential services urban amenities and neighboring communities The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning implementation and operations of urban rail projects with a view towards Emphasizing the need for early studies and project planning Making projects more sustainable economically socially and environmentally Improving socioeconomic returns and access to opportunities for users Maximizing the value of private participation where appropriate and Building capacity within project implementing and managing institutions This Handbook provides experiential advice to tackle the technical institutional and financial challenges faced by decision makers considering urban rail projects It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international good practices and recommendations that are independent of commercial financial political or other interests The material presented is intended as an honest broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries Rather than identify a single approach this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions consider the key issues perform the necessary studies apply adequate tools and learn from international good practice all at the right time in the project development process

Handbook of Colorectal Surgery David Beck, David E. Beck, 2012-09-10 Colorectal surgery is a key part of the general surgeon's remit and it is essential for the surgeon to be aware of the range of preoperative perioperative and disease management issues This practical book provides practical knowledge and guidance necessary to manage colorectal diseases A wide range of topics is included including examination procedures diagnostics preoperative preparation and assessment pain management and surgical skills and techniques Key

Points Concisely outlines practical information and guidance for any healthcare practitioner involved in the treatment and management of colorectal disorders Provides an overview of disease processes to assist with clinical treatment and diagnosis This revised 3rd Edition contains up to date information on advances in minimally invasive surgery treatment and management of colon and rectal cancer and haemorrhoids and fistulas **Wild Equids** Jason I. Ransom, Petra

Kaczensky, 2016-06 Readers will find new insight into the lives of the world's horses zebras and asses understand the basis of our relationships with these animals and develop a greater understanding of where equids come from and why they are worth conserving Included in this book are detailed state of the science syntheses on Social structure behavior and cognition Habitat and diet Ecological niches Population dynamics Roles of humans in horse distribution through time Human dimensions and the meaning of wild Management of free roaming horses Captive breeding of wild equids Conservation of wild equids Conservation of migrations Reintroductions Genetics and paleogenetics **Simulation and Modeling**

Methodologies, Technologies and Applications Nuno Pina, Janusz Kacprzyk, Joaquim Filipe, 2012-10-12 The present book includes extended and revised versions of a set of selected papers from the 1st International Conference on Simulation and Modeling Methodologies Technologies and Applications SIMULTECH 2011 which was sponsored by the Institute for Systems and Technologies of Information Control and Communication INSTICC and held in Noordwijkerhout The Netherlands SIMULTECH 2011 was technically co sponsored by the Society for Modeling Simulation International SCS GDR I3 Lionphant Simulation and Simulation Team and held in cooperation with ACM Special Interest Group on Simulation and Modeling ACM SIGSIM and the AIS Special Interest Group of Modeling and Simulation AIS SIGMAS **A Companion to Religion in Late**

Antiquity Josef Lössl, Nicholas J. Baker-Brian, 2018-05-03 A comprehensive review of the development geographic spread and cultural influence of religion in Late Antiquity A Companion to Religion in Late Antiquity offers an authoritative and comprehensive survey of religion in Late Antiquity This historical era spanned from the second century to the eighth century of the Common Era With contributions from leading scholars in the field the Companion explores the evolution and development of religion and the role various religions played in the cultural political and social transformations of the late antique period The authors examine the theories and methods used in the study of religion during this period consider the most notable historical developments and reveal how religions spread geographically The authors also review the major religious traditions that emerged in Late Antiquity and include reflections on the interaction of these religions within their particular societies and cultures This important Companion Brings together in one volume the work of a notable team of international scholars Explores the principal geographical divisions of the late antique world Offers a deep examination of the predominant religions of Late Antiquity Examines established views in the scholarly assessment of the religions of Late Antiquity Includes information on the current trends in late antique scholarship on religion Written for scholars and students of religion A Companion to Religion in Late Antiquity offers a comprehensive survey of religion and the influence religion

played in the culture politics and social change during the late antique period **Cheetahs: Biology and Conservation**

,2017-11-28 Cheetahs Biology and Conservation reports on the science and conservation of the cheetah This volume demonstrates the interdisciplinary nature of research and conservation efforts to study and protect the cheetah The book begins with chapters on the evolution genetics physiology ecology and behavior of the species as well as distribution reports from range countries These introductory chapters lead into discussions of the challenges facing cheetah survival including habitat loss declining prey base human wildlife conflict illegal trade and newly emerging threats notably climate change This book also focuses on conservation strategies and solutions including environmental education and alternative livelihoods Chapters on the role of captive cheetahs to conservation and the long term research of the species are included as are a brief discussion of the methods and analyses used to study the cheetah The book concludes with the conservation status and future outlook of the species Cheetahs Biology and Conservation is a valuable resource for the regional and global communities of cheetah conservationists researchers and academics Although cheetah focussed the book provides information relevant to the study of broader topics such as wildlife conservation captive breeding habitat management conservation biology and animal behaviour Cover photograph by Angela Scott Includes chapters by the world s leading cheetah researchers and practitioners who have focused their efforts on this high profile species of conservation concern Provides findings as a combination of scientific detail and basic explanations so that they can be available not only to cheetah researchers and conservationists but also to policy makers business leaders zoo managers academics students and people interested in the cheetah and its future Presents the current knowledge of the species helping lay the foundations and best practices for cheetah conservation and research worldwide Additional protocols and forms which were provided by authors can be found at the Cheetahs Biology and Conservation companion site <https://www.elsevier.com/books-and-journals/book-companion/9780128040881> *Climate Change, Energy, Sustainability and Pavements* Kasthurirangan

Gopalakrishnan,Wynand JvdM Steyn,John Harvey,2014-09-25 Climate change energy production and consumption and the need to improve the sustainability of all aspects of human activity are key inter related issues for which solutions must be found and implemented quickly and efficiently To be successfully implemented solutions must recognize the rapidly changing socio techno political environment and multi dimensional constraints presented by today s interconnected world As part of this global effort considerations of climate change impacts energy demands and incorporation of sustainability concepts have increasing importance in the design construction and maintenance of highway and airport pavement systems To prepare the human capacity to develop and implement these solutions many educators policy makers and practitioners have stressed the paramount importance of formally incorporating sustainability concepts in the civil engineering curriculum to educate and train future civil engineers well equipped to address our current and future sustainability challenges This book will prove a valuable resource in the hands of researchers educators and future engineering leaders most of whom will be working in

multidisciplinary environments to address a host of next generation sustainable transportation infrastructure challenges This book proposes a broad detailed overview of the actual scientific knowledge about pavements linked to climate change energy and sustainability at the international level in an original multidimensional multi effects way By the end the reader will be aware of the whole global issues to care about for various pavement technical features around the world among which the implications of modelling including data collection challenging resources saving and infrastructures services optimisation This is a complete and varied work rare in the domain Dr Agnes Jullien Research Director Director of Environmental Development Safety and Eco Design Laboratory EASE Department of Development Mobility and Environment Ifsttar Centre de Nantes Cedex France An excellent compilation of latest developments in the field of sustainable pavements The chapter topics have been carefully chosen and are very well organized with the intention of equipping the reader with the state of the art knowledge on all aspects of pavement sustainability Topics covered include pavement Life Cycle Analysis LCA pervious pavements cool pavements photocatalytic pavements energy harvesting pavements etc which will all be of significant interest to students researchers and practitioners of pavement engineering This book will no doubt serve as an excellent reference on the topic of sustainable pavements Dr Wei Hsing Huang Editor in Chief of International Journal of Pavement Research and Technology IJPRT and Professor of Civil Engineering National Central University Taiwan *An Introduction to Project Modeling and Planning* Gündüz Ulusoy,Öncü Hazır,2021-04-05 This textbook teaches the basic concepts and methods of project management but also explains how to convert them to useful results in practice Project management offers a promising working area for theoretical and practical applications and developing software and decision support systems DSS This book specifically focuses on project planning and control with an emphasis on mathematical modeling Models and algorithms establish a good starting point for students to study the relevant literature and support pursuing academic work in related fields The book provides an introduction to theoretical concepts and it also provides detailed explanations application examples and case studies that deal with real life problems The chapter topics include questions that underlie critical thinking interpretation analytics and making comparisons Learning outcomes are defined and the content of the book is structured following these goals Chapter 1 begins by introducing the basic concepts methods and processes of project management This Chapter constitutes the base for defining and modeling project management problems Chapter 2 explores the fundamentals of organizing and managing projects from an organization s perspective Issues related to project team formation the role of project managers and organization types are discussed Chapter 3 is devoted to project planning and network modeling of projects covering fundamental concepts such as project scope Work Breakdown Structure WBS Organizational Breakdown Structure OBS Cost Breakdown Structure CBS project network modeling activity duration and cost estimating activity based costing ABC data and knowledge management Chapter 4 introduces deterministic scheduling models which can be used in constructing the time schedules Models employing time based and finance based objectives are

introduced The CPM is covered The unconstrained version of maximizing Net Present Value NPV is also treated here together with the case of time dependent cash flows Chapter 5 focuses on the time cost trade off problem explaining how to reduce the duration of some of the activities and therefore reduce the project duration at the expense of additional costs This topic is addressed for both continuous and discrete cases Chapter 6 discusses models and methods of scheduling under uncertain activity durations PERT is introduced for minimizing the expected project duration and extended to the PERT Costing method for minimizing the expected project cost Simulation is presented as another approach for dealing with the uncertainty in activity durations and costs To demonstrate the use of the PERT a case study on constructing an earthquake resistant residential house is presented Classifications of resource and schedule types are given in Chapter 7 and exact and heuristic solution procedures for the single and multi mode resource constrained project scheduling problem RCPSP are presented The objective of maximizing NPV under resource constraints is addressed and the capital constrained project scheduling model is introduced In Chapter 8 resource leveling and further resource management problems are introduced Total adjustment cost and resource availability cost problems are introduced Various exact models are investigated A heuristic solution procedure for the resource leveling problem is presented in detail Also resource portfolio management policies and the resource portfolio management problem are discussed A case study on resource leveling dealing with the annual audit project of a major corporation is presented Project contract types and payment schedules constitute the topics of Chapter 9 Contracts are legal documents reflecting the results of some form of client contractor negotiations and sometimes of a bidding process which deserve closer attention Identification and allocation of risk in contracts project control issues disputes and resolution management are further topics covered in this Chapter A bidding model is presented to investigate client contractor negotiations and the bidding process from different aspects Chapter 10 focuses on processes and methods for project monitoring and control Earned Value Management is studied to measure the project performance throughout the life of a project and to estimate the expected project time and cost based on the current status of the project How to incorporate inflation into the analysis is presented In Chapter 11 qualitative and quantitative techniques including decision trees simulation and software applications are introduced Risk phases are defined and building a risk register is addressed An example risk breakdown structure is presented The design of risk management processes is introduced and risk response planning strategies are discussed At the end of the Chapter the quantitative risk analysis is demonstrated at the hand of a team discussion case study Chapter 12 covers several models and approaches dealing with various stochastic aspects of the decision environment Stochastic models generation of robust schedules use of reactive and fuzzy approaches are presented Sensitivity and scenario analysis are introduced Also simulation analysis which is widely used to analyze the impacts of uncertainty on project goals is presented Chapter 13 addresses repetitive projects that involve the production or construction of similar units in batches such as railway cars or residential houses Particularly in the construction industry

repetitive projects represent a large portion of the work accomplished in this sector of the economy A case study on the 50 km section of a motorway project is used for demonstrating the handling of repetitive project management How best to select one or more of a set of candidate projects to maintain a project portfolio is an important problem for project based organizations with limited resources The project selection problem is inherently a multi objective problem and is treated as such in Chapter 14 Several models and solution techniques are introduced A multi objective multi period project selection and scheduling model is presented A case study that addresses a project portfolio selection and scheduling problem for the construction of a set of dams in a region is presented Finally Chapter 15 discusses three promising research areas in project management in detail i Sustainability and Project Management ii Project Management in the Era of Big Data and iii the Fourth Industrial Revolution and the New Age Project Management We elaborate on the importance of sustainability in project management practices discuss how developments in data analytics might impact project life cycle management and speculate how the infinite possibilities of the Fourth Industrial Revolution and the new technologies will transform project management practices

Plant Ecology in the Middle East Ahmad Hegazy,Jonathan Lovett-Doust,2016-01-14 This advanced textbook explores the intriguing flora and plant ecology of the Middle East framed by a changing desert landscape global climate change and the arc of human history This vast region has been largely under recognized under studied and certainly under published due in part to the challenges posed to research by political disputes and human conflict and a treatise on the subject is now timely The book integrates Middle Eastern plant geography and its major drivers geo tectonics seed and fruit dispersal plant functional types etc with the principles of plant ecology The authors include the many specialized adaptations to desert and dryland ecosystems including succulence water conserving photosynthesis and a remarkable range of other life history strategies They explore the formation of climate relicts and describe the long history of domestication in the region together with the many reciprocal effects of agriculture on plant ecology The book concludes by discussing conservation in the region highlighting five regional biodiversity hotspots where the challenges of desertification habitat loss and other threats to plant biodiversity are particularly acute Plant Ecology in the Middle East is a timely synthesis of the field setting a new baseline for future research It will be important reading for both undergraduate and graduate students taking courses in plant ecology evolution systematics biodiversity and conservation and will also be of interest and use to a professional audience of botanists conservation biologists and practitioners working in dryland ecosystems

Encyclopedia of Renewable and Sustainable Materials ,2020-01-09 Encyclopedia of Renewable and Sustainable Materials Five Volume Set provides a comprehensive overview covering research and development on all aspects of renewable recyclable and sustainable materials The use of renewable and sustainable materials in building construction the automotive sector energy textiles and others can create markets for agricultural products and additional revenue streams for farmers as well as significantly reduce carbon dioxide CO2 emissions manufacturing energy requirements manufacturing costs and waste This

book provides researchers students and professionals in materials science and engineering with tactics and information as they face increasingly complex challenges around the development selection and use of construction and manufacturing materials Covers a broad range of topics not available elsewhere in one resource Arranged thematically for ease of navigation Discusses key features on processing use application and the environmental benefits of renewable and sustainable materials Contains a special focus on sustainability that will lead to the reduction of carbon emissions and enhance protection of the natural environment with regard to sustainable materials *New Worlds of Work* Ulrich Jürgens, Martin Krzywdzinski, 2016 This book provides a comparative study of human resource management employment relations and production systems in automobile factories in the BRIC countries Brazil Russia India and China It compares the experiences of two major multinational companies Volkswagen and Toyota as well as of domestic automobile manufacturers

Proceedings of the International Conference on Resource Efficiency Towards Sustainability Ranjith Dissanayake, Ajith De Alwis, Maksud Bekchanov, Pradeep Gajanayake, Sujith Gunawardhana, 2025-09-26 This book showcases the latest knowledge and innovations in resource efficiency and sustainability addressing critical challenges and opportunities in achieving a sustainable future It features top quality and cutting edge research findings selected from the proceedings of the International Conference on Resource Efficiency Towards Sustainability ICRES 2025 The themes of this book include Circular Economy Renewable Energy Solutions Sustainable Agriculture Waste Management and Resource Recovery Climate Change Adaptation and Mitigation Green Supply Chains Life Cycle Assessment and Community Engagement for Sustainability The ICRES 2025 conference is powered by INSEE Ecocycle Sri Lanka whose commitment to advancing sustainable practices has significantly supported the success of this event For more information please visit the conference website at <https://icres.lk>
