Murawski, Kathy Lynn Scott, 2019-03-07 Learn how to REALLY improve outcomes for all students How do we remove learning barriers and provide all students with the opportunity to succeed Written for both general and special educators from grades Pre K through 12 What Really Works with Universal Design for Learning is the how to guide for implementing aspects of Universal Design Learning UDL to help every student be successful UDL is the design and delivery of curriculum and instruction to meet the needs of all learners by providing them with choices for what and why they are learning and how they will share what they have learned Calling on a wide range of expert educators this resource features An unprecedented breadth of UDL topics including multiple content areas pedagogical issues and other critical topics like executive function PBIS and EBD Reproducible research based field tested tools Practical strategies that are low cost time efficient and easy to implement Practices for developing shared leadership and for working with families Educators want to see each and every student succeed This teacher friendly hands on resource shows how UDL can be used to build the flexibility required to meet students strengths and needs without overwhelming teachers in the process Ascomycete Fungi of North America Michael Beug, Alan E. Bessette, Arleen R. Bessette, 2014-03-01 Approximately 75 percent of all fungi that have been described to date belong to the phylum Ascomycota They are usually referred to as Ascomycetes and are commonly found and collected by mushroom enthusiasts Ascomycetes exhibit a remarkable range of biodiversity are beautiful and visually complex and some including morels and truffles are highly prized for their edibility

Many play significant roles in plant ecology because of the mycorrhizal associations that they form. Thus it is remarkable that no book dedicated to describing and illustrating the North American Ascomycetes has been published in over sixty years. Filling the gap between technical publications and the limited representation of Ascomycetes in general mushroom field guides, *Ascomycete Fungi of North America* is a scientifically accurate work dedicated to this significant group of fungi. Because it is impossible to describe and illustrate the tens of thousands of species that occur in North America, the authors focus on species found in the continental United States and Canada that are large enough to be readily noticeable to mycologists, naturalists, photographers, and mushroom hunters. They provide 843 color photographs and more than 600 described species, many of which are illustrated in color for the first time. While emphasizing macroscopic field identification characteristics for a general audience, the authors also include microscopic and other advanced information useful to students and professional mycologists. In addition, a color key to the species described in this book offers a visual guide to assist in the identification process.

Tests that Second Language Teachers Make and Use Greta Gorsuch, 2019-10-24

Classroom tests are an everyday feature of second and foreign language classrooms worldwide. Teachers spend a lot of time and energy making and using tests, and learners spend a lot of time and energy taking them. Nonetheless, such assessments are under studied as they are considered routine. This volume illuminates this little researched area. Featuring fifteen classroom language tests made and used by Chinese, English, French, German, Italian, Japanese, Russian, and Spanish teachers, the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers' processes of making and using their tests. Rather than view teachers' tests as poor shadows of what professional test writers do, this work identifies the reasoning behind teachers' tests. In addition, focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary. This book is an accessible applied resource for second and foreign language teachers, language program administrators working with teachers, students in teacher preparation and enrichment programs, and scholars in language teaching, learning, and testing.
