the history and development of the military design movement featuring case studies from key modern militaries Written by a practitioner the work shows how modern militaries think and arrange actions in time and space for security affairs and why designers are disrupting challenging and reconceptualizing everything previously upheld as sacred on the battlefield It is the first book to thoroughly explain what military design is where it came from and how it works at deep philosophically grounded levels and why it is potentially the most controversial development in generations of war fighters The work explains the tangled origins of commercial design and that of designing modern warfare the rise of various design movements and how today s military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations Why does our species conceptualize war as such and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy The book explains design stories from the Israel Defense Force the US Army the US Marine Corps the Canadian Armed Forces and the Australian Defence Force for the first time and includes the theory doctrine organizational culture and key actors involved Ultimately this book is about how small communities of practice are challenging the foundations of modern defence thinking This book will be of much interest to students of military and strategic studies defence studies and security studies as well as design educators and military professionals

We'll All Die as Marines Colonel Jim Bathurst USMC (Retired), 2012-12-03 For seventeen year old high school dropout Jim Bathurst the Marine Corps s reputation for making men out of boys was something he desperately needed when he enlisted in March of 1958 What began as a four year hitch lasted nearly thirty six years and included an interesting assortment of duty stations and assignments as both enlisted and officer We ll All Die As Marines narrates a story about a young free spirited kid from Dundalk Maryland and how the Corps captured his body mind and spirit Slowly but persistently the Corps transformed him into someone whose first love would forever be the United States Marine Corps It documents not only his leadership service and training but also regales many tales of his fellow Marines that will have the reader laughing cheering and at times crying In this memoir Bathurst reveals that for him a former DI who was awarded the Silver Star Bronze Star Medal with Combat V Purple Heart and a combat commission to second lieutenant the Corps was not a job a

Anatomy of Victory John D. Caldwell,2018-11-09 This groundbreaking book provides the first systematic comparison of America s modern wars and why they were won or lost John D Caldwell uses the World War II victory as the historical benchmark for evaluating the success and failure of later conflicts Unlike WWII the Korean Vietnam and Iraqi Wars were limited but they required enormous national commitments produced no lasting victories and generated bitter political controversies Caldwell comprehensively examines these four wars through the lens of a strategic architecture to explain how and why their outcomes were so dramatically different He defines a strategic architecture as an interlinked set of continually evolving policies strategies and operations by which combatant states work toward a desired end Policy defines the high level goals a nation seeks to achieve once it initiates a conflict or finds itself drawn into one Policy makers direct a broad course of action and strive to control the initiative When they make decisions they have to respond to unforeseen conditions to guide and determine future decisions Effective leaders are skilled at organizing constituencies they need to succeed and communicating to them convincingly Strategy means employing whatever resources are available to achieve policy goals in situations that are dynamic as conflicts change quickly over time Operations are the actions that occur when politicians soldiers and diplomats execute plans A strategic architecture Caldwell argues is thus not a static blueprint but a dynamic vision of how a state can succeed or fail in a conflict **Backbone** Ph.D. Julia Dye,2019-05-22 Noncommissioned officers

stand as the backbone of the United States Marine Corps The Corps is among the most lasting institutions in America though few understand what makes it so strong and how that understanding can be applied effectively in today s world In this insightful and thoroughly researched book Julia Dye explores the cadre of noncommissioned officers that make up the Marine Corps system of small unit leadership To help us better understand what makes these extraordinary men and women such effective leaders Dye examines the fourteen leadership traits embraced by every NCO These qualities including judgment enthusiasm determination bearing and unselfishness are exemplified by men like Terry Anderson the former Marine sergeant who spent nearly seven years as a hostage in Beirut John Basilone the hero of the Pacific and many others To assemble this extraordinary chronicle Julia Dye interviewed Anderson and dozens of other Marines mining a rich trove of historical and modern NCO heroes that comprise the Marine Corps astonishing legacy from its founding in 1775 to the present day

for a brief period tried to play a different international role than that to which it was accustomed Second the book problematizes the role of international military missions as drivers for change in the security and defence field Several perspectives and levels of analysis are covered from the macro level of strategic discourse to the micro level of the experiences of individual commanders The book focuses upon Sweden and its participation in the international military mission in Afghanistan during 2002 2012 and also contributes to the growing literature evaluating the mission in Afghanistan the security practice which has dominated the security and defence discourse of Western Europe for the last decade

Enduring Freedom, Enduring Voices Michael G. Walling, 2015-01-20 Michael Walling has honored the American men and women who served in Operation Enduring Freedom by helping them tell their own stories This is the war in Afghanistan as experienced by the people who fought it General Tommy R Franks Ret The war in Afghanistan has seen men and women thrown into America's longest sustained combat operation For over 13 years US military personnel have been embroiled in a conflict unlike any other in a hostile country where danger and death lurk at every turn The nature of the fighting has transformed not only the entire structure of the US military but the lives of every soldier sailor marine coast guardsman and airman who served there There have been many tales told of this most recent Afghan war but until now no single work has combined the strategic view of high level commanders with the perspective of soldiers on the ground This book places the first hand accounts of serving men and women into the context of the military operations Drawing on gripping oral histories from theater commanders Special Forces troops reconstruction teams and everyday soldiers Michael G Walling analyzes operations as they were experienced by individuals from those immediately following 9 11 through to those in 2014 as US troops prepared to withdraw He also charts the evolution of US military structure as it was forced to adapt to cope with the non conventional but nonetheless deadly threats of asymmetric warfare as well as detailing covert ops infrastructure rebuilding and the training of Afghan forces Resonating across gender age nationality and ethnicity this book is not just a document of US fortunes in a far flung conflict It is a tribute to the determination heroism sacrifice and the strength of the human spirit CML Army Chemical Review ,2001
