Updated information about feeding adaptations, taxonomy, and systematics, genetics, and site occurrences is included and summarized in tables, figures, and charts. This is the first comprehensive review of African proboscideans and illustrates the need to more actively protect elephants and ensure their survival in modern ecosystems. **Key Features:** Provides a comprehensive systematic review of the African proboscidean fossil record. Includes a summary of taxonomy, geochronology, biogeography, and morphology. Documents major faunal events, including those associated with hominin origins. Synthesizes new data from genomic, isotopic, and microware analyses. Emphasizes the role of elephants in ecosystems and the importance of conservation. *Quaternary Environmental Change in Southern Africa* Jasper

This year's Annual Edition together with the developments made during the year is a testament to the growth, resilience and adaptability of this student-driven initiative, especially during these turbulent times. This year has also been one of reflection and remembrance as we publish this edition in tribute to the late Professor Christof Heyns, whose instrumentality in the establishment of the Pretoria University Law Press PULP has brought us to where we are today. Fourteen years since its inception and the PSLR still continues to grow and evolve whilst remaining true to its thriving legacy in fostering excellence and innovation through legal writing. This publication's uniqueness is also presented through its diverse contributions all addressing contemporary societal and legal issues under a broad range of legal disciplines. In an era of many continued firsts, the PSLR has strived to build on the legacy of its predecessors by expanding on the Journal's visibility and accessibility. The PSLR's digital presence has now grown substantially, leading to an increase in quality submissions from institutions across the country. This year the PSLR launched its first independent website and developed an official logo for the Journal and its online platforms. Authors are now able to submit their papers through the Open Journals System platform, track their workflow, manage their submissions and submit at any time outside of the PSLR's official call for submissions. We can firmly submit that we have, in pursuance of being a DHET-accredited journal, fulfilled the standards set out by the Department of Higher Education and Training. Many thanks are extended to Makone Maja for developing the website. Your patience, guidance and geniality are truly appreciated. Thank you also to Jakolien Strydom and ClickCreate for your charitable assistance in developing and designing the logo. To the authors, this year has in many respects been challenging with many of those challenges affecting students directly. We appreciate the dedicated efforts put into your submissions and your wholehearted cooperation throughout the entire process. Much appreciation is also extended to the reviewers who have selflessly committed to assisting the PSLR during the peer review process. To all of the reviewers, your input, guidance and recommendations are greatly appreciated. Pheny Nomasonto Morweš Sekati, Editor in Chief 2020 **Advanced Wind Turbines** Teik-cheng Lim, Palanisamy Mohan Kumar, Sivalingam Krishnamoorthi, 2023-09-13 How can non-windy places make use of wind power for electricity generation? *Advanced Wind Turbines* provides detailed information that is of great practical importance to wind turbine practitioners from small and congested city states where the lack of vast land and high wind speed render the conventional wind turbine less effective. It introduces the non-conventional

Darrieus and Savonius wind turbines as well as their hybrid version covering basic concepts computational modelling and recent advances in experimental optimization What about those who prefer wind turbines in faraway oceans to take advantage of high wind speed or who come from countries with a lack of shallow seabed Floating offshore wind turbines are also discussed and the dynamics of floating vis vis grounded wind turbines are thoroughly expounded upon to aid practitioners in achieving more accurate performance modelling This is a work of paramount usefulness for areas which have long wanted to jump on the renewable energy bandwagon but have thus far been hampered by their natural geographical limitations

Social Movements and the Indian Diaspora Movindri Reddy, 2015-11-19 With the elevation of Islam and Muslim transnational networks in international affairs from the rise of Al Qaeda to the revolutions in North Africa and the Middle East the study of Diasporas and transnational identities has become more relevant Using case studies from Fiji Mauritius Trinidad and South Africa this book explores the diaspora identities and impact of social movements on politics and nationalism among indentured Indian diaspora It analyses the way in which diasporas are defined by themselves and others and the types of social movements they participate in showing how these are critical indicators of the threat they are perceived to pose The book examines the notions of national and transnational identity and how they are determined by the placement of Diasporas in the transnational locality It argues that the transnationality intrinsic to diaspora identities mark them as others in the nation state and simultaneously separates them from the perceived motherland thus displacing them from both states and situating them in a transnational locality It is from this placement that social movements among Diasporas gain salience As outsiders and insiders they are well placed to offer a formidable challenge to the host state but these challenges are limited by their hybrid identities and perceived divided loyalties Providing an in depth analysis of Indian Diasporas the book will be of interest to those studying South Asian Studies Migration and Diaspora Studies
