Valoriser La Science Les Partenariats Des Startup Technologiques:

Valoriser la science Liliana Doganova, 2012 L'innovation ouverte exige des changes permanents entre science et marchés. Les start-up issues de la recherche en sont un véhicule privilégié. Si la création de ces jeunes pousses valorisant des travaux scientifiques a été fortement encouragée par les politiques publiques depuis une dizaine d'années, on sait peu de choses des effets qu'elles induisent sur leurs marchés. Que valent-elles ? Comment comprendre leur rôle et saisir leur impact ? Qu'apportent-elles aux entreprises avec lesquelles elles coopèrent ? Cet ouvrage propose une approche originale pour rendre compte de la portée de ces start-up, il traque les réseaux d'innovation qu'elles construisent et animent. Il analyse les formes et les effets des partenariats avec des start-up par une double perspective : l'analyse statistique des innovations produites dans un vaste échantillon de collaborations inter-firmes et l'observation fine des pratiques de valorisation mises en œuvre par les entreprises partenaires. L'enquête met en lumière la dynamique exploratoire de ces partenariats, la diversité des résultats qu'ils génèrent et la spécificité des dispositifs sur lesquels ils s'appuient. L'ouvrage intéressera aussi bien les chercheurs en sciences de gestion et en sociologie que les acteurs publics impliqués dans la valorisation de la recherche et les acteurs industriels qui sont amenés à coopérer avec des start-up technologiques.

Moments of Valuation Ariane Berthoin Antal, Michael Hutter, David Stark, 2015-01-29 The outcome of innovation processes are determined by complex historically grown valuation practices. In this book a wide range of innovations are taken into consideration from small inventions like entertainment novelties to large societal changes through new technologies. The chapters observe the particular local or distributed sites in which their episodes of innovation take place and they identify the initial dissonance among those judging a newly proposed alternative. The emphasis of the inquiry however is on the practices of valuation that are at work when something succeeds in being new. The authors represent a wide variety of sub-disciplines and national backgrounds in the social sciences. They share an interest in social valuation and a pragmatist approach. The differences between their empirical evidence reflect the wide variety of appearances that valuation takes in contemporary society. They are anthropologists, economists, cultural sociologists, organization researchers, historians or political scientists. A number of chapters deals with aesthetic valuation as in the tasting of a new vintage or in the socio-technical process that shaped successful synthesizer sounds. Other chapters discuss the judgment processes in organizations like architect offices or consultancy firms and processes of evaluation and valorization in larger fields of practice like accounting or mathematics. The studies are both of interest in their various professional fields and contribute to a more general understanding of the social and cultural conditions under which innovations fail and succeed.

The Routledge Companion to Actor-Network Theory Anders Blok, Ignacio Farias, Celia Roberts, 2019-06-17 This companion explores ANT as an intellectual practice tracking its movements and engagements with a wide range of other academic and activist projects. Showcasing the work of a diverse set of second generation ANT scholars from around the world, it highlights the exciting depth and breadth of contemporary ANT and its future possibilities. The

companion has 38 chapters each answering a key question about ANT and its capacities Early chapters explore ANT as an intellectual practice and highlight ANT's dialogues with other fields and key theorists Others open critical provocative discussions of its limitations Later sections explore how ANT has been developed in a range of social scientific fields and how it has been used to explore a wide range of scales and sites Chapters in the final section discuss ANT's involvement in real world endeavours such as disability and environmental activism and even running a Chilean hospital Each chapter contains an overview of relevant work and introduces original examples and ideas from the authors recent research The chapters orient readers in rich complex fields and can be read in any order or combination Throughout the volume authors mobilise ANT to explore and account for a range of exciting case studies from wheelchair activism to parliamentary decision making from racial profiling to energy consumption monitoring from queer sex to Korean cities A comprehensive introduction by the editors explores the significance of ANT more broadly and provides an overview of the volume The Routledge Companion to Actor Network Theory will be an inspiring and lively companion to academics and advanced undergraduates and postgraduates from across many disciplines across the social sciences including Sociology Geography Politics and Urban Studies Environmental Studies and STS and anyone wishing to engage with ANT to understand what it has already been used to do and to imagine what it might do in the future

The Provoked Economy Fabian Muniesa, 2014-05-16 Do things such as performance indicators valuation formulas consumer tests stock prices or financial contracts represent an external reality Or do they rather constitute in a performative fashion what they refer to The Provoked Economy tackles this question from a pragmatist angle considering economic reality as a ceaselessly provoked reality It takes the reader through a series of diverse empirical sites from public administrations to stock exchanges from investment banks to marketing facilities and business schools in order to explore what can be seen from such a demanding standpoint It demonstrates that descriptions of economic objects do actually produce economic objects and that the simulacrum of an economic act is indeed a form of realization It also shows that provoking economic reality means facing practical tests in which what ought to be economic or not is subject to elaboration and controversy This book opens paths for empirical investigation in the social sciences but also for the philosophical renewal of the critique of economic reality It will be useful for students and scholars in social theory sociology anthropology philosophy and economics

The Constitution of Algorithms Florian Jatón, 2021-04-27 A laboratory study that investigates how algorithms come into existence Algorithms often associated with the terms big data machine learning or artificial intelligence underlie the technologies we use every day and disputes over the consequences actual or potential of new algorithms arise regularly In this book Florian Jatón offers a new way to study computerized methods providing an account of where algorithms come from and how they are constituted investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled

Assetization Kean Birch, Fabian Muniesa, 2020-07-14 How the asset anything that can be controlled traded and

capitalized as a revenue stream has become the primary basis of technoscientific capitalism. In this book, scholars from a range of disciplines argue that the asset meaning anything that can be controlled, traded, and capitalized as a revenue stream has become the primary basis of technoscientific capitalism. An asset can be an object or an experience, a sum of money or a life form, a patent or a bodily function. A process of assetization prevails, imposing investment and return as the key rationale and overtaking commodification and its speculative logic. Although assets can be bought and sold, the point is to get a durable economic rent from them rather than make a killing on the market. Assetization examines how assets are constructed and how a variety of things can be turned into assets, analyzing the interests, activities, skills, organizations, and relations entangled in this process. The contributors consider the assetization of knowledge, including patents, personal data, and biomedical innovation; of infrastructure, including railways and energy; of nature, including mineral deposits, agricultural seeds, and natural capital; and of publics, including such public goods as higher education and monetizable social ills. Taken together, the chapters show the usefulness of assetization as an analytical tool and as an element in the critique of capitalism.

Williams. Enterprise Knowledge Capital, Blandine Laperche, 2017-11-29. Thoroughly grounded in an extensive body of international research and analysis, this book investigates the concepts surrounding a firm's knowledge capital. These concepts play an integral part in the evolution of economic and managerial thinking, particularly in relation to the themes of firm knowledge and innovation. The author advocates a greater socialization of the production of knowledge capital that stands in contradiction to the strong appropriation strategies that are predominant today. This book presents a historical analysis of the facts with a strong basis in the recent literature in economics and innovation management, as well as in case studies of CAC 40 companies that have been conducted over the course of the past few years.

Incertidumbres en las sociedades contemporáneas, Ramos Torre, Ramón, García Selgas, Fernando J., 2020-08-31. La incertidumbre parece omnipresente en el mundo social contemporáneo y más a n en esta coyuntura pandémica. Era patente ya en los mercados financieros, la tecnociencia, el cambio climático o las nuevas formas de vulnerabilidad. No puede extrañar por tanto que haya diagnósticos sociológicos muy diversos. Bauman, Luhmann, Beck, Wynne, etc., que la presentan como uno de los rasgos distintivos de nuestro mundo. Carecemos, sin embargo, de una reflexión suficientemente detallada y sistemática sobre su papel en las sociedades contemporáneas. Esta obra pretende contribuir a llenar ese vacío. Con ese fin, los primeros capítulos revisan el campo semántico en el que esos diagnósticos sitúan la incertidumbre, entre una forma de no saber y un saber que muestra las grietas de lo que se daba por cierto y su tensa relación con la certeza, la indeterminación y la supervivencia. El resto de los trabajos analizan la gestión de la incertidumbre en situaciones concretas, como la valorización financiera, la investigación aeroespacial, el terrorismo yihadista, la intervención social, el Big data, la naturaleza, la responsabilidad social de las empresas o la viabilidad de los neonatos prematuros. El

Elle privilégie les approches novatrices des acteurs qui par leurs comportements stratégiques et politiques d'innovation intelligente modifient les modèles économiques dans une perspective de croissance durable. Le capital savoir de l'entreprise se définit comme l'ensemble des informations et connaissances scientifiques et techniques produites, acquises et mobilisées par la firme pour être utilisées dans un processus de production de valeur. C'est de l'origine des règles des stratégies de constitution, de protection et de valorisation de ce capital que traite cet ouvrage. L'accent est mis sur la globalisation des firmes et ses conséquences sur leur capacité à faire merger de nouvelles trajectoires d'innovation. Le capital savoir de l'entreprise se fonde sur une analyse historique des faits et de la pensée sur la littérature récente en économie ainsi qu'en management de l'innovation et sur des études de cas réalisées au cours des dernières années auprès d'entreprises du CAC 40. **Valoriser la Science** Liliana Doganova, 2015 *Nains sans géants* Francesca Musiani, 2013 *Concours ITRF - Ingénieurs, techniciens de recherche et formation de catégorie A, B et C* Philippe Quillien, Nicolas Di Méo, Michel Fol, 2020-10-27 Cet ouvrage prépare au concours trisselectif d'ingénieurs et techniciens de recherche et de formation en proposant toutes les informations pour l'inscription, l'intégralité de la méthodologie des conseils et une analyse des attentes du jury tout sur l'esprit des concours ITRF. *Rapport d'information sur la gestion des programmes d'investissements d'avenir relevant de la mission Recherche et enseignement supérieur* Alain Claeys, Patrick Hetzel, Mission d'évaluation et de contrôle (commission des finances), 2015-03-18 Le rapport d'information sur la gestion des programmes d'investissements d'avenir PIA relevant de la mission Recherche et enseignement supérieur est établi selon trois axes principaux. Le premier porte sur la gouvernance, c'est-à-dire la manière dont les dossiers ont été sélectionnés et les investissements d'avenir gérés. Le deuxième porte sur les conséquences des investissements d'avenir sur l'organisation de la recherche. Enfin, le troisième porte sur l'articulation de ces investissements avec les autres formes de financement de la recherche en France. **L'innovation managériale** Chaire ESSEC Innovation managériale et Excellence opérationnelle, Kévin Johnson, Jean-Michel Moutot, David Autissier, 2018-01-18 La société et le monde de l'entreprise vivent aujourd'hui un point de bascule entre les fonctionnements hérités du monde industriel et ceux en cours de construction qui se veulent plus collaboratifs. Les entreprises sont de plus en plus nombreuses à rechercher de nouveaux modèles de management pour répondre à ces attentes. C'est ce que propose cet ouvrage qui synthétise l'innovation managériale. Cette notion ne doit pas se voir comme un outil universel mais comme une démarche de transformation des modes de management de manière durable et sans rupture. À la fois théorique et pratique, cet ouvrage est structuré en deux parties. La première développe les nouvelles manières de travailler en abordant différentes techniques de développement de design réseaux apprenants, design thinking, ateliers participatifs, etc. La seconde explore les différentes facettes de l'innovation managériale à travers dix études de cas ou une

Port et recherche La recherche la plus dynamique se fait souvent aux frontières aux interfaces Le choix d'un thème transversal permet d'étudier la façon dont peuvent se fédérer et se coordonner les activités des nombreux organismes sur lesquels se fonde la recherche en France La recherche sur le sport reste un domaine encore insuffisamment identifié Elle est par nature interdisciplinaire et donc implique un dépassement des classifications statistiques et budgétaires habituelles Mais cette transversalité permet aussi d'illustrer plus largement les forces et les faiblesses de la recherche en France elle obtient des résultats excellents mais leur valorisation tant académique que pratique reste souvent très en de des possibilités qu'ils ouvrent Outre les impacts classiques en matière de transfert de technologie de création de start up ou de jeunes entreprises innovantes de partenariats de recherche ou de financement de chercheurs qui caractérisent aussi

l'ensemble des autres recherches académiques la recherche sur le sport assume un rôle direct de dynamisation et de structuration d'un secteur économique suffisamment vaste pour mériter une meilleure approche. Il convient donc de se demander s'il ne serait pas nécessaire de mieux prendre en compte le sport en tant que champ de recherche part entière en faisant un défi pour la recherche part entière anticipant par là une nécessaire déclinaison plus précise des autres défis de recherches stratégiques et de leurs financements publics ou contractuels tels qu'ils ont été définis au début de l'année 2015 comme axes de la nouvelle stratégie nationale de recherche.
