The Electronic Communications Code and Property Law Falcon Chambers, 2018-10-11 Life now without access to electronic telecommunications would be regarded as highly unsatisfactory by most of the UK population Such ready access would not have been achieved without methodical and ultimately enforceable means of access to the land on which to install the infrastructure necessary to support the development of an electronic communications network Successive governments have made such access a priority regarding it as a principle that no person should unreasonably be denied access to an electronic communications network or electronic communications services The enactment of the Telecommunications Act 1984 and its revision by the Communications Act in 2003 have played their role in the provision of an extensive electronic infrastructure in the UK while their reshaping by means of the Digital Economy Act 2017 will continue that process Throughout that process a little publicised series of struggles has taken place between telecommunications operators and landowners as they seek to interpret the Electronic

Communications Code by which their rights and obligations have been regulated This book describes the problems that accompanied the Old Code which will continue to regulate existing installations and agreements and the intended solutions under the New Code The eminent team of authors explain the background provisions and operation of the old code and the new one providing practical and jargon free guidance throughout It is sure to become the reference on this topic and is intended as a guide for telecommunications operators land owners and of course for their advisers in the legal and surveying professions All members of Falcon Chambers comprising nine Queen s Counsel and 30 junior barristers specialise in property law and allied topics including the various incarnations of the Electronic Communications Code Members of Falcon Chambers including all the authors of this new work have for many years lectured and written widely on the code and have appeared acting for both operators and landowners in many of the few reported cases on the subject of the interface between property law and the code including for example *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2010 *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2011 *Crest Nicholson Operations Ltd v Arqiva Services Ltd* 2015 *Brophy v Vodafone Ltd* 2017

The New Regulation and Governance of Food Terry Marsden,Robert Lee,Andrew Flynn,Samarthia Thankappan,2009-09-10 Major questions surround who how and by what means should the interests of government the private sector or consumers hold authority and powers over decisions concerning the production and consumption of foods This book examines the development of food policy and regulation following the BSE mad cow disease crisis of the late 1990s and traces the changing relationships between three key sets of actors private interests such as the corporate retailers public regulators such as the EU directorates and UK agencies and consumer groups at EU and national levels The authors explore how these interests deal with the conundrum of continuing to stimulate a corporately organised and increasingly globalised food system at the same time as creating a public and consumer based legitimate framework for it The analysis develops a new model and synthesis of food policy and regulation which reassesses these public private sector responsibilities with new evidence and theoretical insights
