Optometry: Science, Techniques and Clinical Management E-Book Mark Rosenfield,Nicola Logan,2016-06-23 An introduction to the theory and practice of optometry in one succinct volume From the fundamental science of vision to clinical techniques and the management of common ocular conditions this book encompasses the essence of contemporary optometric practice Now in full colour and featuring over 400 new illustrations this popular text which will appeal to both students and practitioners wishing to keep up to date has been revised significantly The new edition incorporates recent advances in technology and a complete overview of clinical procedures to improve and update everyday patient care Contributions from well known international experts deliver a broad perspective and understanding of current optometric practice A useful aid for students and the newly qualified practitioner while providing a rapid reference guide for the more experienced clinician Comprehensive and logical coverage detailing the full spectrum of optometric practice in one volume Succinctly covers the basics of anatomy physiology pharmacology investigative techniques and clinical management of

common eye conditions to provide key topics likely to be met in clinical practice Discusses the full range of refractive correction from spectacles and contact lenses to surgical treatment Includes chapters on the management of special populations including paediatric elderly low vision and special needs patients Heavily illustrated throughout with key diagrams and images to support the text Complete restructuring of contents into three sections basic sciences clinical techniques and patient management Full colour throughout with over 400 illustrations Many new chapters reflecting the changes in optometric practice and technology over the last 20 years including new imaging and diagnostic procedures and methods of ocular treatment and refractive correction Now includes internationally renowned authors from around the world Details a full range of refractive and management approaches for patient care Rewilding in Practice Ian Convery, Steve Carver, Monica T. Engel, Sally Hawkins, Rene Beyers, Yue Cao, 2025-03-03 Rewilding is a long term and large scale process which works to restore degraded ecosystems or social ecological systems to the point that they are resilient and self sustaining and therefore requiring little in terms of conservation management Rewilding practice focuses on re establishing ecological processes including trophic levels that were lost mainly due to anthropogenic disturbance It also aims to affect a paradigm shift in human nature relationships with intentions to better understand the interdependencies between humans and nature so that people can appreciate and accommodate nature in their landscapes and make more informed and sustainable decisions about how we live In this sense rewilding has real transformational potential
