**Strategic Customer Management** Nigel F Piercy, Nikala Lane, 2009-03-12 A revolution is taking place in the way companies organize and manage the front end of their organization where it meets its customers. Traditional concepts of sales management, account management and customer service are being overtaken by initiatives like customer business development, the strategic sales organization and strategic customer management. This book aims to provide insights into how this revolution is unfolding and to provide a framework for executives and management students to address the issues involved. The book focuses on the transformation of the traditional sales organization into a strategic force leading the strategic customer management process in companies. Traditionally the area of sales management has mainly been treated as a tactical operational topic in the conventional marketing literature, simply part of the communications mix within the planned marketing programme. However the emergence of major customers as dominant buyers in many sectors as a result of pressures towards consolidation and enhanced scale of operations is changing the way in which sales issues are addressed in supplier organizations. The growth of new forms of buyer seller relationship based on collaboration and partnering has encouraged organizations to reconsider the sales and account management operation as an important source of competitive differentiation in commoditized markets. Increasingly sales is being perceived as a central part of business strategy and attention given to the challenges in better aligning sales processes with strategy. This has many implications for the design of the sales organization and its management strategy which go far beyond the confines of conventional marketing views.

**Handbook of Climate Change and India** Navroz Dubash, 2012-03-15. How do policymakers, businesses and civil society in India approach the challenge of climate change? What do they believe global climate negotiations will achieve and how? And how are Indian political and policy debates internalizing climate change? Relatively little is known globally about internal climate debate in emerging industrializing countries, but what happens in rapidly growing economies like India's will increasingly shape global climate change outcomes. This Handbook brings together prominent voices from India, including policymakers, politicians, business leaders, civil society activists and academics, to build a composite picture of contemporary Indian climate politics and policy. One section lays out the range of positions and substantive issues that shape Indian views on global climate negotiations. Another delves into national politics around climate change. A third looks at how climate change is beginning to be internalized in sectoral policy discussions over energy, urbanization, water and forests. The volume is introduced by an essay that lays out the critical issues shaping climate politics in India and its implications for global politics. The papers show that within India, climate change is approached primarily as a developmental challenge and is marked by efforts to explore

how multiple objectives of development equity and climate mitigation can simultaneously be met In addition Indian perspectives on climate negotiations are in a state of flux Considerations of equity across countries and a focus on the primary responsibility for action of wealthy countries continue to be central but there are growing voices of concern on the impacts of climate change on India How domestic debates over climate governance are resolved in the coming years and the evolution of India s global negotiation stance are likely to be important inputs toward creating shared understandings across countries in the years ahead and identify ways forward This volume on the Indian experience with climate change and development is a valuable contribution to both purposes
