Gompert, John Gordon IV, 2008-02-08 Examines how the United States should improve its counterinsurgency COIN capabilities through for example much greater focus on understanding jihadist strategy using civil measures to strengthen the local government and enabling local forces to conduct COIN operations Provides a broad discussion of the investments organizational changes and multilateral arrangements that the United States should pursue to improve its COIN capabilities **Learning Large Lessons** David E. Johnson, 2007-03-30 The relative roles of U S ground and air power have shifted since the end of the Cold War At the level of major operations and campaigns the Air Force has proved capable of and committed to performing deep strike operations which the Army long had believed the Air Force could not reliably accomplish If air power can largely supplant Army systems in deep operations the implications for both joint doctrine and service capabilities would be significant To assess the shift of these roles the author of this report analyzed post Cold War conflicts in Iraq 1991 Bosnia 1995 Kosovo 1999 Afghanistan 2001 and Iraq 2003 Because joint doctrine frequently reflects a consensus view rather than a truly integrated joint perspective the author recommends that joint doctrine and the processes by which it is derived and promulgated be overhauled The author also recommends reform for the services beyond major operations and campaigns to ensure that the United States attains its strategic objectives This revised edition includes updates and an index Road to Greatness Pritam S. Sahota Donald A. Assmann Mary Arnella-Venezia Michael Rubell Gulzar S. Sandhu Zbigniew W. Wojcinski, 2022-04-08 Greatness has been defined as a quality of being great distinguished or eminent *Road to Greatness* employs examples of selected individuals who achieved greatness The road begins with a desire to become successful by creating a personal path to attain exceptional goals Genius 1% Inspiration and 99% Perspiration Thomas Edison Inventor He made 1000 unsuccessful attempts before inventing the light bulb Never never never never give up Sir Winston Churchill Historian Nobel Prize Winner in Literature 1953 and Prime

action to retake Afghanistan and details the Coalition forces probable counterinsurgency responses Author Mark Silinsky also
reviews the successes and failures of the latest U S counterinsurgency doctrine to extrapolate the best strategies for future
counterinsurgency campaigns How Wars Are Won and Lost John A. Gentry, 2011-11-10 This provocative book seeks to
answer a most crucial and embarrassing question concerning the U S military why the United States is so often stymied in
military confrontations with seemingly weaker opponents despite its superpower status This fascinating book examines a
question that continues to puzzle soldiers statesmen and scholars why do major powers including the ostensible superpower
United States repeatedly perform poorly against seemingly overmatched adversaries And what can they and the United
States do to better achieve their military objectives How Wars are Won and Lost Vulnerability and Military Power argues that
beyond relying solely on overwhelming military might the United States needs to focus more on exploiting weaknesses in

their adversaries such as national will resource mobilization and strategic miscues just as opposing forces have done to gain advantage over our military efforts The author tests the vulnerability theory by revisiting six conflicts from the Philippine War of 1899 1902 to the ongoing actions in Iraq and Afghanistan showing again and again that victory often depends more on outthinking the enemy than outmuscling them

The Future of Land Warfare Michael E. O'Hanlon, 2015-08-31 What happens if we bet too heavily on unmanned systems cyber warfare and special operations in our defense In today's U.S. defense policy debates big land wars are out Drones cyber weapons special forces and space weapons are in Accordingly Pentagon budget cuts have honed in on the army and ground forces this after the long wars in Iraq and Afghanistan seems like an appealing idea No one really wants American boots on the ground in bloody conflicts abroad But it is not so easy to simply declare an end to messy land wars A survey of the world's trouble spots suggests that land warfare has more of a future than many now seem to believe In *The Future of Land Warfare* Michael O'Hanlon offers an analysis of the future of the world's ground forces Where are large scale conflicts or other catastrophes most plausible Which of these could be important enough to require the option of a U.S. military response And which of these could in turn demand significant numbers of American ground forces in their resolution O'Hanlon is not predicting or advocating big American roles in such operations only cautioning against overconfidence that we can and will avoid them O'Hanlon considers a number of illustrative scenarios in which large conventional forces may be necessary discouraging Russia from even contemplating attacks against the Baltic states discouraging China from considering an unfriendly future role on the Korean peninsula handling an asymmetric threat in the South China Sea with the construction and protection of a number of bases in the Philippines and elsewhere managing the aftermath of a major and complex humanitarian disaster superimposed on a security crisis perhaps in South Asia coping with a severe Ebola outbreak not in the small states of West Africa but in Nigeria at the same time that country falls further into violence addressing a further meltdown in security conditions in Central America

Securing the MRAP James Hasik, 2021-08-16 Dwight D. Eisenhower once quipped You will not find it difficult to prove that battles campaigns and even wars have been won or lost primarily because of logistics Military acquisition and procurement that is how a nation manages investments technologies programs and support is critical to wartime success or failure When unexpected battlefield problems arise how do the government the military and industry work together to ensure effective solutions During the American counterinsurgent campaign in Iraq the improvised explosive device emerged as a disruptive and devastating threat As Humvees and their occupants were ripped apart by IEDs it was clear that new solutions had to be found These solutions already existed but had not been procured highlighting the need for more effective marketing to the military by industry The ultimate successful response the mine resistant ambush protected vehicle or MRAP required years of entrepreneurial marketing by the defense industry In *Securing the MRAP: Lessons Learned in Marketing and Military Procurement* James Hasik explores how these vehicles which the American military mostly rejected despite the great need

for them eventually came to be adopted as the Pentagon's top procurement priority. Hasik traces the story of the MRAP from the early 1970s to the future of mine resistant vehicles on the battlefields of tomorrow. An important contribution to the seemingly disparate fields of marketing and defense policy. Securing the MRAP is an eye opening revelation to defense industrialists, military officers and government officials who want to understand how to avoid another IED Humvee debacle.

The Day After Brendan R. Gallagher, 2019-09-15 Since 9/11, why have we won smashing battlefield victories only to botch nearly everything that comes next? In the opening phases of war in Afghanistan, Iraq and Libya, we mopped the floor with our enemies. But in short order, things went horribly wrong. We soon discovered we had no coherent plan to manage the day after. The ensuing debacles had truly staggering consequences: many thousands of lives lost, trillions of dollars squandered and the apparent discrediting of our foreign policy establishment. This helped set the stage for an extraordinary historical moment in which America's role in the world along with our commitment to democracy at home and abroad have become subject to growing doubt. With the benefit of hindsight, can we discern what went wrong? Why have we had such great difficulty planning for the aftermath of war? In *The Day After*, Brendan Gallagher, an Army lieutenant colonel with multiple combat tours to Iraq and Afghanistan and a Princeton Ph.D., seeks to tackle this vital question. Gallagher argues there is a tension between our desire to create a new democracy and our competing desire to pull out as soon as possible. Our leaders often strive to accomplish both to keep everyone happy. But by avoiding the tough underlying decisions, it fosters an incoherent strategy. This makes chaos more likely. *The Day After* draws on new interviews with dozens of civilian and military officials ranging from US cabinet secretaries to four star generals. It also sheds light on how in Kosovo we lowered our postwar aims to quietly achieve a surprising partial success. Striking at the heart of what went wrong in our recent wars and what we should do about it, Gallagher asks whether we will learn from our mistakes or provoke even more disasters. Human lives, money, elections and America's place in the world may hinge on the answer. *Professional Journal of the United States Army*, 2009

Unreasonable Leadership Gary Chartrand, 2010-11 *Unreasonable Leadership* provides a blueprint of how to lead and forge change in all types of economic environments. Gary Chartrand's powerful message of redefining the game, creating new pathways where there are none, leading without fear and mobilizing teams to coalesce around a goal is a timeless tool and is a must read for all who would call themselves leaders. Carla Harris, author of *Expect To Win*, *Unreasonable Leadership* should be required reading in every business school. What Gary Chartrand did to build Acosta into a industry leading sales and Marketing juggernaut is simply remarkable and so is this book. Jon Gordon, best selling author of *The Energy Bus* and *Soup*. This is a smart, thought provoking approach to leadership and how to create the ideal environment for bringing about positive change and achieving meaningful results. Mitt Romney, Former Governor of Massachusetts. Gary Chartrand's *Unreasonable Leadership* provides a blueprint for leaders who are driving change not only in the corporate sector but in the social sector as well. Gary describes what it takes to be a true pioneer to achieve unprecedented ground breaking results despite the

complexity of the work and the enormity of the challenges We've learned through Teach for America that Unreasonable Leadership is exactly what is required to transform our entrenched public education systems Wendy Kopp CEO and Founder of Teach For America Achieving a vision that seemed nearly impossible having the courage to make difficult decisions and leading with conviction transformed a company and its entire industry Unreasonable Leadership charts the growth of Acosta Sales and Marketing a food brokerage firm that grew from a one state operation employing 11 people to an international sales and marketing agency employing a staff of more than 16 000 in the US and Canada During a 12 year span company sales grew from 3 billion to 60 billion How did this happen Acosta Chairman Gary Chartrand followed the advice of George Bernard Shaw All progress comes from unreasonable people Chartrand's success as an unreasonable leader testifies to the value of setting a bold agenda never being afraid to ask and the critical importance of molding a corporate culture His personal saga shows what can be accomplished no matter the odds of what conventional wisdom labels as impossible
