Accounting for Hunger Olivier De Schutter,Kaitlin Y Cordes,2011-11-14 The challenge of global hunger is now high on the agenda of governments and international policy makers This new work contributes to addressing that challenge by looking at the obstacles which stand in the way of implementing a right to food in the era of globalisation The book describes the current situation of global hunger it considers how it relates both to the development of food systems and to the merger of the food and energy markets and it explains how the right to food contributes to identifying solutions at the domestic and international levels The right to food it argues can only be realised if governance improves at the domestic level and if the international environment enables governments to adopt appropriate policies for which they require a certain policy space The essays in this book demonstrate that the current regimes of trade investment and food aid as well as the development of biofuels production all of which contribute to define the international context in which states implement such reforms should be reshaped if national efforts are to be successful The implication is that extraterritorial human rights obligations of states their obligations to respect the right to food beyond their national territories for instance in their food aid investment or trade policies as well as the strengthening of global governance of food security as is currently being attempted with the reform of the Committee on World Food Security in Rome have a key role to fulfill domestic reforms will not achieve sustainable results unless the international environment is more enabling of the efforts of governments acting individually In this reform process accountability both at the domestic and international level is essential if sustainable progress is to be achieved in combating global hunger APAIS 1999: Australian public affairs information service , **Accounting: A**

Cook,1915 **Eurasian Business Perspectives** Mehmet Huseyin Bilgin,Hakan Danis,Ender Demir,Sofia Vale,2021-03-01 This book gathers selected theoretical and empirical papers from the 29th Eurasia Business and Economics Society EBES Conference held in Lisbon Portugal Covering diverse areas of business and management in various geographic regions it highlights the latest research on human resources management and marketing among other topics It also includes related studies that address marketing and management relevant aspects such as the impact of supervisor support on employee performance through work engagement the standardization of global logistics business operations elements to support long term B2B communication and omni channel strategies in the Marketing 4 0 paradigm *Market Growers Journal* ,1925 *Public Affairs Information Service Bulletin* ,1926 **British Medical Journal** ,1885 **Reality and Accounting** Richard Mattessich,2013-07-31 This book discusses and summarizes the revived interest in reality issues ontology within accounting economics and the information sciences with a view to informing scholars from these different disciplines about each other s endeavours in ontological research Even more importantly the book aims at familiarizing scholars from various disciplines with an evolutionary approach for examining questions about reality in the social sciences The book is based on a partly pluralistic approach that assures unity in diversity Unity because all existence arises from physical reality diversity because emergent properties create biological and social realities that cannot be reduced to physical phenomena Hence the book recognizes not only concrete but also abstract entities It shows however that the actualization of these abstract entities requires objectification and concrete manifestation This pluralistic approach is central to this book It also is a challenge to those who reject abstract entities as socially real as well as to those who defend a non realist position The major task of this book is to explore proposals towards a uniform ontological basis This uniform and universal presentation extends beyond traditional ontology asking what is real to such questions as on which reality level is something real and in which temporal and modal way is it real Such an extended analysis is relevant to accountants economists information scientists other social scientists as well as philosophers
