Low Energy Architecture Huw Heywood,2019-07-25 101 Rules of Thumb sets out the essential elements of low energy architecture in a fresh intuitive way In an area where ever changing technology and complex legislation and can cloud the designer s thought processes this book encourages the designer to think clearly and intuitively about the fundamentals of low energy buildings With reliable simple rules of thumb that will provide new ideas and refresh the designer s palette each page focuses on a single piece of advice or guidance along with a clear hand drawn illustration while there are also plenty of tips and more detailed information for those who wish to dig deeper The emphasis is on passive low energy principles and the rules of thumb cover all the design fundamentals from site and location to orientation and form peppered with some which will help the designer to think outside the box about the design process itself *Imagining the Future City* Sarah Bell,James

Paskins,2013-11-18 London is one of the world s leading cities It is home to an extraordinary concentration and diversity of

people industries politics religions and ideas and plays an important role in our highly globalised and tightly networked modern world What does the future hold for London Investigating any aspect of the city s future reveals a complex picture of interrelations and dependencies The London 2062 Programme from University College London brings a new cross disciplinary and highly collaborative approach to investigating this complexity The programme crosses departmental boundaries within the university and promotes active collaboration between leading academics and those who shape London through policy and practice This book approaches the question of London s future by considering the city in terms of Connections Things Power and Dreams Reconstructing Urban Ambiance in Smart Public Places Abusaada, Hisham, Salama, Ashraf M., Elshater, Abeer, 2020-06-19 New technologies have the power to augment many aspects of society including public spaces and art The impact of smart technology on urban design is vast and filled with opportunity and has profound implications on the everyday urban environment Only by starting new conversations can we develop further contemporary insights that will affect how we move through the world Reconstructing Urban Ambiance in Smart Public Places is a pivotal reference source that provides contemporary insights into a comprehensive interpretation of urban ambiances in smart places as it relates to the development of cities or to various levels of intervention in extant urban environments The book also examines the impact of architectural design on the creation of urban ambience in artworks and how to reflect this technique in the fields of professional architectural practice While covering a wide range of topics including wellbeing quality related artistry and atmosphere this publication combines smart technological innovation with creative design principles This book is ideally designed for civil engineers urban designers architects entrepreneurs policymakers researchers academicians and students **Energy, People, Buildings** Judit Kimpian, Sofie Pelsmakers, Hattie Hartman, 2021-03-04 Energy performance feedback is an essential tool in addressing the current climate crisis However this is not simply another theoretical text about energy performance in buildings This book is for anyone who wants to better understand how energy is used in buildings and how to drive down operational energy use whether you re an architect student client building services engineer contractor building operator or other stakeholder Focusing on evidence from feedback on buildings in use it explains what it takes to get them to perform as expected as well as the reasons why they often fail Energy People Buildings draws extensively on the findings of studies UK government funded building performance evaluations and on original research into seven case studies from across the UK and abroad that have achieved exemplary energy use through building performance feedback Providing a clear roadmap to understanding aspects that impact building users comfort and satisfaction it also outlines the factors behind energy use and how to track it across the life of a project to ensure that your building performs as intended Case studies include the Everyman Theatre Liverpool Rocky Mountain Institute Innovation Center Colorado and Carrowbreck Meadow Norwich Featured architects AHMM AHR Architype Hamson Barron Smith Haworth Tompkins Henning Larsen Architects and ZGF Architects Structural Engineer's Pocket Book

British Standards Edition Fiona Cobb, 2020-12-17 The Structural Engineer's Pocket Book British Standards Edition is the only compilation of all tables data facts and formulae needed for scheme design to British Standards by structural engineers in a handy sized format Bringing together data from many sources into a compact affordable pocketbook it saves valuable time spent tracking down information needed regularly This second edition is a companion to the more recent Eurocode third edition Although small in size this book contains the facts and figures needed for preliminary design whether in the office or on site Based on UK conventions it is split into 14 sections including geotechnics structural steel reinforced concrete masonry and timber and includes a section on sustainability covering general concepts materials actions and targets for structural engineers

Eco-Homes Jenny Pickerill, 2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us

Architect's Pocket Book of Modern Management and Practice Ben Vickery, 2024-12-17 This book is an easily digestible guide to the management and practice knowledge needed to establish and run an architectural practice It is of particular interest to those starting out in the profession and to students whilst also being useful to architects more widely who need succinct information to assist them in the daily management of their work The book sits beside the Architect's Legal Pocket Book providing legal information and the Architect's Pocket Book providing guidance in design It covers all the main management and practice topics relevant to the running of an architectural business including setting up the company the profession project management fees office management financial management and teamwork It also looks at the state of the construction industry and the architectural profession today new forms of practice and how the profession is changing The book is interweaved with pearls of wisdom and experience and reflections from architects bringing the topics to life and aiding the reader's understanding
