World Architects In Their Twenties:

Japan Houses Marcia Iwatate, 2012-05-01 This Japanese architecture and design book is a wonderful source of new styles and ideas for those looking to add a distinctively Zen flair to their home. Limited spaces, unlimited technology, a tradition of innovation, and sheer Japanese panache have combined to inspire the 26 stunning homes featured in *Japan Houses*. Conceived by 24 of Japan's leading architects and designers, each of the houses forecasts and defines a new trend in residential architecture, reinventing the meaning and use of space, material, and function. Traditional lifestyles are challenged; domestic functions such as cooking and entertaining are moved out of the house into the public domain, while laptops bring work back in. Zen minimalist is juxtaposed with comfortable opulence. Time-honored workmanship is coupled with exciting new materials, resulting in a recognizable style that belongs to Japan, reflecting its culture and craftsmanship while at the same time being avant-garde and international. The spirit of each of these astonishing houses is captured in beautiful photographs, plans, and commentary.

Building the Modern World Michael H. Hodges, 2018-04-16 A photographically rich biography of protean architect Albert Kahn, *Building the Modern World: Albert Kahn in Detroit* by Michael H. Hodges tells the story of the German Jewish immigrant who rose from poverty to become one of the most influential architects of the twentieth century. Kahn's buildings not only define downtown Detroit but his early car factories for Packard Motor and Ford revolutionized the course of industry and architecture alike. Employing archival sources unavailable to previous biographers, *Building the Modern World* follows Kahn from his apprenticeship at age thirteen with a prominent Detroit architecture firm to his death. With material gleaned from two significant Kahn archives, the University of Michigan's Bentley Historical Library and the Archives of American Art at the Smithsonian Institution, Hodges paints the most complete picture yet of Kahn's remarkable rise. Special emphasis is devoted to his influence on architectural modernists, his relationship with Henry Ford, his intervention to save the Diego Rivera murals at the Detroit Institute of Arts, unreported until now, and his work laying down the industrial backbone for the Soviet Union in 1929-31 as consulting architect for the first Five Year Plan. Kahn's ascent from poverty, his outsized influence on both industry and architecture, and his proximity to epochal world events make his life story a tableau of America's rise to power. Historic photographs as well as striking contemporary shots of Kahn buildings enliven and inform the text. Anyone interested in architecture, architectural history, or the history of Detroit will relish this stunning work.
