World Bank Infrastructure Report:

Rural Infrastructure from a World Bank Perspective Louis Y. Pouliquen, 1999 Rural infrastructure is critical to both economic and social development Its absence thwarts growth and typically the poor are those hurt the most The purpose of this paper is to serve as a basis for knowledge management on rural infrastructure In the 1970s the primary if not the unique objective of rural infrastructure lending was to get rural infrastructure built However the institutional aspects of how this infrastructure was to be built and later how it would be operated and maintained did not receive much attention Only recently has poverty alleviation through employment creation become an explicit objective of rural infrastructure investments This review tracks the poverty alleviation objective of rural infrastructure projects using three criteria 1 whether poverty was an explicit criterion in the selection of specific sub projects 2 whether poverty was addressed in the pricing of rural infrastructure services and 3 whether poverty was addressed through the creation of employment *International Benchmarking of Infrastructure Performance in the Southern African Customs Union Countries* [eljko Bogeti?, Johannes W. Fedderke, 2006 The paper provides a first systematic benchmarking of infrastructure performance in the Southern African Customs Union SACU countries South Africa Botswana Lesotho Namibia and Swaziland in four major sectors electricity water and sanitation information and communication technology and transportation against the relevant group of comparator countries using a new World Bank international data base with objective and perception based indicators of infrastructure performance from over 200 countries The analysis suggests important comparative gaps in all major infrastructure sectors although performance varies widely across the SACU region Performance shortfalls are particularly acute in rural areas where most of the poor live The benchmarking is envisaged as a comparative input into deeper analyses of infrastructure performance especially in the context of the ongoing scaling up efforts for example South Africa Lesotho and Botswana

Measuring Financial Performance in Infrastructure Jane O. Ebinger, 2006 Unintentional implicit subsidies hidden costs to public utilities can be considered an illegitimate claim on public resources This paper examines the role and sources of hidden costs in the energy and water sectors in the Europe and Central Asia ECA region It reviews available data and introduces a model the Hidden Costs Calculator that can be used to quantify the burden on governments of infrastructure policy and implementation decisions This simple to apply model provides insight into three key components of hidden costs that affect infrastructure poor bill collection rates excessive losses due to inefficient operations or theft from the networks and tariffs set below cost recovery rates The major advantage of this model is that using existing data it can provide a single measure for hidden costs that can be easily calculated tracked and reported Therefore it can monitor and benchmark trends across sectors and countries without extensive or costly data collection The model compares the difference between actual revenues and revenues that could be anticipated in a well functioning system operating with cost covering tariffs bills paid and losses normative for networks of a certain age and design The underlying premise is that quantifying the order of

magnitude of each component of hidden costs has potential for strengthening infrastructure policy dialogue and influencing decisionmakers who allocate scarce budgetary resources Urban Transport in the Developing World Harry T.

Dimitriou,Ralph Gakenheimer,2011-01-01 Policy making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability These challenges include coping with financial deficits providing for the poor dealing meaningfully with global warming and energy shortages addressing traffic congestion and related land use issues adopting green technologies and adjusting equitably to the impacts of globalisation This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn Building Global Infrastructure Dale S. Rothman,Mohammad T. Irfan,Barry B. Hughes,Eli Margolese-Malin,Jonathan D. Moyer,2015-12-03 Building Global Infrastructure is the fourth in a series of volumes Patterns of Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty the advance of global education and the improvement of global health Volume 4 sets out to tell the story of the future of global infrastructure The approach used in this book focuses on the question of whether individual societies will be able to meet future infrastructure demands Related questions include the following What is the range of realistically conceivable futures for infrastructure considering both demand and supply How are the demands for infrastructure balanced with the ability to meet these demands thereby linking the physical and financial treatment of infrastructure What are the effects of providing for infrastructure on issues such as economic productivity and health

The Law and Governance of the Asian Infrastructure Investment Bank Gu Bin,2018-11-27 The Asian Infrastructure Investment Bank AIIB which began operations in 2016 and now has an approved membership of eighty four worldwide has quickly become perhaps one of the world s most promising agents of global economic development With its firm commitments to the twenty first century imperatives of cost effectiveness zero tolerance for corruption and active promotion of environmental sustainability its clearly stated aims and requirements echo the goal of reform that other multilateral institutions are undertaking This book is among the first to offer an incisive introduction to the AIIB s law and governance which are now essentially in place From a perspective of Chinese multilateralism which parts ways from the dominant twentieth century Bretton Woods arrangements the author provides in great depth the details of such elements of the Bank s Articles of Agreement as the following non resident board system procurement role of trust funds state owned enterprises as private entities immunity dispute settlement accountability for involuntary resettlement and human rights violations and policy on prohibited practices Throughout the author provides deeply informed comparisons with such existing multilateral development banks as the World Bank the African Development Bank the Asian Development Bank the European Bank for

Reconstruction and Development and the Inter American Development Bank as well as with the World Trade Organization He shows how the AIIB not only emulates but also innovates while continuing to collaborate closely with these institutions He suggests what should be done to optimize governance standards and operations of the AIIB together with these peer institutions in a mutually emulating manner Lawyers and policymakers involved in international economic law and related fields will welcome this nuanced and in depth description and analysis of the AIIB Its concomitant analysis of political economy and global governance issues will be of interest to bankers businesses government officials and others looking for an overall understanding of multilateral development banking and China s approach toward global governance in particular

OECD Multi-level Governance Studies Subnational Public-Private Partnerships Meeting Infrastructure Challenges OECD,2018-11-12 This report focuses on the challenges of governing infrastructure investment and public private partnerships PPPs at the subnational level Subnational governments cities and regions play a vital role in the infrastructure landscape **Decentralization and Infrastructure in the Global Economy** Jonas Frank,Jorge

Martinez-Vazquez,2015-07-03 The subnational dimension of infrastructure has emerged as one of the greatest challenges in contemporary public finance policy and management Ensuring the efficient provision of infrastructure represents a challenge for all countries irrespective of their level of centralization or decentralization This book proposes an innovative approach for the strengthening of decentralized public investment and infrastructure management Decentralization and Infrastructure in the Global Economy From Gaps to Solutions covers the most important aspects of infrastructure investment in a

decentralized setting It discusses infrastructure gaps and the quality of subnational spending how functional responsibilities financing and equalization can be designed sector specific arrangements in high expenditure areas such as health education and roads key steps of the public investment cycle and management and analyses the political economy and corruption challenges that typically accompany decentralized infrastructure projects This book challenges some of the well accepted principles of intergovernmental fiscal relations and will be useful to researchers and practitioners of public finance policy and management

Public-Private Partnerships in Sub-Saharan Africa James Leigland,2020-04-29 Expectations are high regarding the potential benefits of public private partnerships PPPs for infrastructure development in low income countries The development community led by the G20 the United Nations and others expects these partnerships between governments and private companies in infrastructure service provision to aid transformational mega projects as well as efforts to achieve the Sustainable Development Goals Yet PPPs have been widely used only since the 1990s and discussion of their efficacy is still dominated by best practice guidance academic studies that focus on developed countries or ideological criticism Meanwhile practitioners have quietly accumulated a large body of empirical evidence on the actual performance of PPPs The purpose of this book is to summarize and consolidate what this critical mass of evidence based research indicates about PPPs in low income countries and thereby develop a more realistic perspective on the practical value of these mechanisms With a primary focus on Sub Saharan Africa though drawing on critical insights from other regions it demonstrates that the benefits of such partnerships will only be realised if expectations remain modest and projects are subject to transparent evaluation and competition

Barriers to Bankable Infrastructure Helen Moser,2016-03-18 This report discusses the estimated 1 trillion annual global infrastructure gap and provides recommendations on how U S agencies and multilateral development banks can better incentivize private sector investment in global infrastructure While many private companies are looking to support infrastructure projects with readily available capital they have not found a viable project pipeline The study first provides background on the global infrastructure gap and explores the current state of play of the various public private and multilateral actors who work on infrastructure projects in the United States and globally It then discusses three important areas of needed reform project preparation product innovation and foreign government capacity building It concludes with targeted recommendations for the multilateral development banks and U S agencies that work on infrastructure with a focus on creating an expanded pipeline of projects that are bankable for the private sector The study also presents two case studies of World Bank funded infrastructure projects in Mali and Cape Verde to illuminate the challenges related to financing and implementing infrastructure that are discussed in the broader report

World Development Report 1994 ,1994 World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services In recent decades developing countries have made substantial investments in infrastructure achieving

dramatic gains for households and producers by expanding their access to services such as safe water sanitation electric power telecommunications and transport Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor But as this report shows the quantity of investment cannot be the exclusive focus of policy Improving the quality of infrastructure service also is vital Both quantity and quality improvements are essential to modernize and diversify production help countries compete internationally and accommodate rapid urbanization The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure To promote more efficient and responsive service delivery incentives need to be changed through commercial management competition and user involvement Several trends are helping to improve the performance of infrastructure First innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services Second an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public private partnerships is highlighting new ways to increase efficiency and expand services Third increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance

Infrastructure and the Complexity of Economic Development David F. Batten, Charlie Karlsson, 2012-12-06 The book examines the complex relationships between infrastructure and the rest of the economy In particular it focuses on the contentious issue of whether infrastructure investments stimulate productivity growth issues of pricing and ownership and also development problems such as environmental damage Methods range from traditional production function models and compensating variation approaches to nonlinear methods of dynamic analysis There is a unique emphasis on the ability of these different methods to allow for the complex interdependencies involved Six of the fifteen papers deal with these methodological aspects whereas the remainder addresses specific cases or examples in a variety of countries Europe USA and developing countries

Reframing the Problem of Climate Change Klaus Hasselmann,Carlo Jaeger,Gerd Leipold,Diana Mangalagiu,Joan David Tàbara,2013-06-17 This book provides an evaluation of the science and policy debates on climate change and offers a reframing of the challenges they pose as understood by key international experts and players in the field It also gives an important and original perspective on interpreting climate action and provides compelling evidence of the weakness of arguments that frame climate policy as a win or lose situation At the same time the book goes beyond providing yet another description of climate change trends and policy processes Its goal is to make available in a series of in depth reflections and insights by key international figures representing science business finance and civil society what is really needed to link knowledge to action Different contributions convincingly show that it is time and possible to reframe the climate debate in a completely new light perhaps as a system transformative attractor for new green growth sustainable development and technological innovation Reframing the Problem of Climate Change reflects a deep belief that dealing with climate change does not have to be a zero sum game with winners and losers The contributors argue that our societies can learn to respond to the challenge it presents and avoid both human suffering and large scale destruction of ecosystems and that this does not necessarily require economic sacrifice Therefore it is vital reading for students academics and policy makers involved in the debate surrounding climate change *Assessing the Impact of Transport and Energy Infrastructure on Poverty Reduction* Cynthia C. Cook,Asian Development Bank,2005 The objectives of the RETA regional technical assistance project a study based on a literature and project review and on field research in three Asian countries People s Republic of China Thailand and India were to enhance current understanding of how transport and energy infrastructure contribute to poverty reduction
