Heritage of World Civilizations, Volume I, Unbound Value Pack (Includes Sourcebook in World History, Volume One & Myhistorylab Student Access for World), 2009-01-01 The Heritage of World Civilizations Albert M. Craig, 1997 **World Civilizations** Peter N. Stearns, Michael Adas, Stuart B. Schwartz, Marc Jason Gilbert, 2020 World history explores the human past around the globe to help us understand the world we live in today It seeks to identify how major forces like patterns of migration or world trade have developed over time It explores the cultures and political institutions of different regions to help explain commonalities and differences World history builds on a growing body of historical scholarship some of which has truly altered the picture of the past It involves a rich array of stories and examples of human variety intriguing in themselves It helps develop skills that are vital not just to the history classroom but to effective operation in a global society skills like comparing different societies appreciating various viewpoints and identifying big changes and continuities in the human experience Always however it uses the past as a prologue to the present World historians argue that no one society past or present can be understood without reference to other societies and to larger global forces They argue even more vigorously that the present which clearly involves relationships that embrace the whole world cannot be grasped without a sense of the global historical record From its first edition World Civilizations The Global Experience has aimed at capturing a truly global approach by discussing and comparing major societies and focusing on their interactions The goal is to present a clear factual framework while stimulating analysis about global contacts regional patterns and the whole process of change and continuity on a world stage This kind of world history focused on the development over time of the forces that shape the world today helps students make sense of the present and prepare to meet the challenges of the future It is hard to imagine a more important topic Embracing the whole world s history obviously requires selectivity and explicit points of emphasis This text gains coherence through decisions about time about place and about topic In all three cases the book encourages analysis relating facts to vital issues of interpretation Through analysis and interpretation students become active engaged learners rather than serving as passive vessels for torrents of historical facts Underpinning analysis the issues of time place and topic are the three keys to an intelligible global past World Civilizations Peter N. Stearns, Michael Adas, Theron Edward Corse, Stuart B. Schwartz, 2006-08 The Heritage of World Civilizations + Myhistorylab and Pearson Etext Albert M. Craig, Professor Albert M Craig, William A. Graham, Donald Kagan, Steven M Ozment, Frank M. Turner, 2010-12-27 This package contains the following components 0136034713 MyHistoryLab with Pearson eText for World Western Civ 2 semester 0205803482 Heritage of World Civilizations The Volume 1 **A History of Civilization** Robin W. Winks, 1996 For freshman junior level quarter semester full year courses in History of Western Civilization and European Civilizations Extensively illustrated and exceptionally appealing in its narrative style this best selling classic survey of the history of Western civilization with emphasis on Western European societies offers a

short crisp and balanced presentation of traditional and new subjects approaches and controversies and shows throughout how the historian goes about the craft of research interpretation and writing The text is available in a variety of volume splits to accommodate different course lengths

World Civilization Robin W. Winks, 1993-05 Robin W Winks placed particular emphasis on those developments that most directly explain the nature of the modern world social diffusion group and national consciousness technological change religious identities those aspects of intellectual history that have contributed most to our current dilemmas In turn this means that there is more in World Civilization A Brief History about nationalism imperialism or ethnic identities than there is about monarchies feudalism or diplomacy The result of the strategic and intellectual decisions made with respect to this textbook is that its proportions are not the customary ones Particular emphasis is placed on the early origins of civilizations on Greece and Rome and on the period of the so called barbarian invasions because it is by studying these periods that students may best learn how societies are formed Particular emphasis is also placed on the period from the French Revolution on for it is the events of the last two hundred years that have most closely shaped our present condition This book can be read straight through and in its entirety as an interpretive statement about Western history written by a person who knew a good bit about non Western history and who could thus throw into perspective the unusual the commonplace and the comparable in that sector of history conventionally labeled Western The text draws on over thirty five years of discovering in the classroom what students themselves wish to ask about the past rather than what a body of scholars may have concluded they should wish to ask Though this book is largely about Western civilization it is also about world civilizations for from the eighteenth century forward and in many aspects of life much earlier the non West has interacted with the West in such a way as to make it virtually impossible to separate one from the other when dealing at this level of generalization As a teacher of the history of exploration and discovery of imperialism and decolonization
