World Development Report:

World Development Report 2024 World Bank, 2024-08-01 Middle income countries are in a race against time Many of them have done well since the 1990s to escape low income levels and eradicate extreme poverty leading to the perception that the last three decades have been great for development But the ambition of the more than 100 economies with incomes per capita between US 1 100 and US 14 000 is to reach high income status within the next generation When assessed against this goal their record is discouraging Since the 1970s income per capita in the median middle income country has stagnated at less than a tenth of the US level With aging populations growing protectionism and escalating pressures to speed up the energy transition today s middle income economies face ever more daunting odds To become advanced economies despite the growing headwinds they will have to make miracles Drawing on the development experience and advances in economic analysis since the 1950s World Development Report 2024 identifies pathways for developing economies to avoid the middle income trap It points to the need for not one but two transitions for those at the middle income level the first from investment to infusion and the second from infusion to innovation Governments in lower middle income countries must drop the habit of repeating the same investment driven strategies and work instead to infuse modern technologies and successful business processes from around the world into their economies This requires reshaping large swaths of those economies into globally competitive suppliers of goods and services Upper middle income countries that have mastered infusion can accelerate the shift to innovation not just borrowing ideas from the global frontiers of technology but also beginning to push the frontiers outward This requires restructuring enterprise work and energy use once again with an even greater emphasis on economic freedom social mobility and political contestability Neither transition is automatic The handful of economies that made speedy transitions from middle to high income status have encouraged enterprise by disciplining powerful incumbents developed talent by rewarding merit and capitalized on crises to alter policies and institutions that no longer suit the purposes they were once designed to serve Today s middle income countries will have to do the same World Development Report 1993 The World Bank, 1993-07-07 Now in its sixteenth annual edition the World Development Report 1993 is an essential reference on the world economy and the state of social and economic development Like earlier editions the 1993 Report incorporates research from all over the world analyzing the conditions that surround the growth process and offering insights on appropriate policy measures for the future Drawing on the latest Bank research this edition examines national health policies worldwide and measures their success in improving health and reducing costs describing approaches governments can take to improve the health of the poor For the first time including available data for selected countries of the former Soviet Union and the Eastern and Central European economies the World Development Indicators contain the most comprehensive and up to date data on health and economic development in more than 185 countries Two appendices assess the global burden of disease and supplementary statistics concerned with financing and delivering health services A

timely survey and synthesis of contemporary economic issues worldwide the World Development Report 1993 is invaluable to anyone interested in or concerned with economic development international economics and international politics **World Development Report 2011** ,2011-05-26 Rapporten unders ger forandringen i voldelige konflikter i det 21 rhundrede og fremh ver de negative p virkninger som gentagne voldshandlinger har haft p lande og regioners udviklingsmuligheder

World Development Report 2012 World Bank,2011-09-01 This year s World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process **World Development Report 1979** ,1979 Structural transformation is particularly important for middle income countries In dealing with the appropriate policies to be associated with structural changes this report analyzes the processes of industrialization urbanization and the sectoral deployment of labor The challenges identified analyzed and presented for consideration are i creation of job opportunities for an additional half billion people that will join the labor force in the developing countries by 2000 ii accommodation of an additional one billion people in the same time perspective in the urban areas of the developing countries in socially acceptable and economically productive conditions iii creation of an international trade environment that is supportive of the development efforts and iv significant steps to the elimination of absolute poverty **World**

Development Report 2021 World Bank,2021-07-02 The unprecedented growth of data and its ubiquity in our daily lives signal that the digital revolution is transforming the world But much of the value of data remains untapped waiting to be realized Data collected for one particular purpose has the potential to generate economic value in applications far beyond those originally anticipated However many barriers stand in the way of the beneficial reuse of data ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust The World Development Report 2021 Data for Better Lives will explore the tremendous potential of the changing data landscape to improve the lives of poor people but also to open backdoors that can harm individuals businesses and societies The first part of the report assesses how better use and reuse of data can enhance the design of public policies programs and service delivery as well as improve market efficiency and job creation through private sector growth The second part of the report focuses on issues of governance law and policy that can help realize data s potential benefits while safeguarding against harmful outcomes By examining these issues the report aims to show how data can be leveraged to benefit the lives of poor people **World Development Report 2020**

World Bank,2019-11-27 Global value chains GVCs powered the rapid expansion of international trade after 1990 Countries import not only for domestic consumption but also to export and transactions typically involve long term firm to firm relationships rather than anonymous spot market transactions Trade and the rise of GVCs enabled an unprecedented convergence poor countries grew faster and began to catch up with richer countries More than 1 billion people escaped poverty as a result Since the Great Recession the growth of trade has been sluggish and the expansion of GVCs has slowed down At the same time potentially serious threats have emerged to the model of labor intensive trade led growth New labor

saving technologies could draw production closer to the consumer and reduce demand for labor And trade conflict among large countries could lead to a retrenchment of supply chains or a segmentation of GVCs The World Development Report WDR 2020 Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs It concludes that technological change is at this stage more a boon than a curse GVCs can continue to boost growth create better jobs and reduce poverty provided that developing countries implement deeper reforms and industrial countries pursue open predictable policies World Development Report 2022 World Bank,2022-06-13 The COVID 19 pandemic triggered the largest global economic crisis in more than a century In 2020 economic activity contracted in 90 percent of countries the world economy shrank by about 3 percent and global poverty increased for the first time in a generation Governments responded rapidly with fiscal monetary and financial policies that alleviated the worst immediate economic impacts of the crisis Yet the world must still contend with the significant longer term financial and economic risks caused by or exacerbated by the pandemic and the government responses needed to mitigate its effects World Development Report 2022 Finance for an Equitable Recovery examines the central role of finance in the economic recovery from COVID 19 Based on an in depth look at the consequences of the crisis most likely to affect low and middle income economies it advocates a set of policies and measures to mitigate the interconnected economic risks stemming from the pandemic risks that may become more acute as stimulus measures are withdrawn at both the domestic and global levels Those policies include the efficient and transparent management of nonperforming loans to mitigate threats to financial stability insolvency reforms to allow for the orderly reduction of unsustainable debts innovations in risk management and lending models to ensure continued access to credit for households and businesses and improvements in sovereign debt management to preserve the ability of governments to support an equitable recovery World Development Report 2008 World Bank,2007-10-15 The world s demand for food is expected to double within the next 50 years while the natural resources that sustain agriculture will become increasingly scarce degraded and vulnerable to the effects of climate change In many poor countries agriculture accounts for at least 40 percent of GDP and 80 percent of employment At the same time about 70 percent of the world s poor live in rural areas and most depend on agriculture for their livelihoods World Development Report 2008 seeks to assess where when and how agriculture can be an effective instrument for economic development especially development that favors the poor It examines several broad questions How has agriculture changed in developing countries in the past 20 years What are the important new challenges and opportunities for agriculture Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa How can agricultural growth be made more effective for poverty reduction How can governments facilitate the transition of large populations out of agriculture without simply transferring the burden of rural poverty to urban areas How can the natural resource endowment for agriculture be protected How can agriculture s negative environmental effects be contained

This year's report marks the 30th year the World Bank has been publishing the World Development Report World Development Report 2009 World Bank, 2008-11-04 Rising densities of human settlements migration and transport to reduce distances to market and specialization and trade facilitated by fewer international divisions are central to economic development The transformations along these three dimensions density distance and division are most noticeable in North America Western Europe and Japan but countries in Asia and Eastern Europe are changing in ways similar in scope and speed World Development Report 2009 Reshaping Economic Geography concludes that these spatial transformations are essential and should be encouraged The conclusion is not without controversy Slum dwellers now number a billion but the rush to cities continues Globalization is believed to benefit many but not the billion people living in lagging areas of developing nations High poverty and mortality persist among the world's bottom billion while others grow wealthier and live longer lives Concern for these three billion often comes with the prescription that growth must be made spatially balanced The WDR has a different message economic growth is seldom balanced and efforts to spread it out prematurely will jeopardize progress The Report documents how production becomes more concentrated spatially as economies grow proposes economic integration as the principle for promoting successful spatial transformations revisits the debates on urbanization territorial development and regional integration and shows how today's developers can reshape economic geography

World Development Report 2005 World Bank, 2004 Firms and entrepreneurs of all types from microenterprises to multinationals play a central role in growth and poverty reduction Their investment decisions drive job creation the availability and affordability of goods and services for consumers and the tax revenues governments can draw on to fund health education and other services Their contribution depends largely on the way governments shape the investment climate in each location through the protection of property rights regulation and taxation strategies for providing infrastructure interventions in finance and labor markets and broader governance features such as corruption The World Development Report 2005 argues that improving the investment climates of their societies should be a top priority for governments Drawing on surveys of nearly 30 000 firms in 53 developing countries country case studies and other new research the Report explores questions such as What are the key features of a good investment climate and how do they influence growth and poverty What can governments do to improve their investment climates and how can they go about tackling such a broad agenda What has been learned about good practice in each of the main areas of the investment climate What role might selective interventions and international arrangements play in improving the investment climate What can the international community do to help developing countries improve the investment climates of their societies In addition to detailed chapters exploring these and related issues the Report contains selected data from the World Bank's new program of Investment Climate Surveys the Bank's Doing Business Project and World Development Indicators 2004 an appendix of economic and social data for over 200 countries This Report offers practical insights for policymakers executives scholars

and all those with an interest in economic development **World Development Report 2010** World Bank,2009-11-06 In the crowded field of climate change reports WDR 2010 uniquely emphasizes development takes an integrated look at adaptation and mitigation highlights opportunities in the changing competitive landscape and proposes policy solutions grounded in analytic work and in the context of the political economy of reform **World Development Report 2014** World Bank,2013-10 The World Development Report 2014 examines how improving risk management can lead to larger gains in development and poverty reduction It argues that improving risk management is crucial to reduce the negative impacts of shocks and hazards but also to enable people to pursue new opportunities for growth and prosperity *World Development Report 2015* World Bank,2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community **World Development Report 1994** ,1994 World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services In recent decades developing countries have made substantial investments in infrastructure achieving dramatic gains for households and producers by expanding their access to services

such as safe water sanitation electric power telecommunications and transport Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor But as this report shows the quantity of investment cannot be the exclusive focus of policy Improving the quality of infrastructure service also is vital Both quantity and quality improvements are essential to modernize and diversify production help countries compete internationally and accommodate rapid urbanization The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure To promote more efficient and responsive service delivery incentives need to be changed through commercial management competition and user involvement Several trends are helping to improve the performance of infrastructure First innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services Second an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public private partnerships is highlighting new ways to increase efficiency and expand services Third increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance

World Development Report 1988, 1988 This is the eleventh report in the annual series assessing major development issues Part I reviews recent trends in the world economy and their implications for the future prospects of developing countries Part II examines the role of public finance in development This report includes the World Development Indicators which provide selected social and economic indicators for more than 100 countries Despite continued economic growth through 1987 and into 1988 two problems have characterized recent trends unsustainable economic imbalances within and among industrial countries and highly uneven economic growth among developing countries Part I of the report concludes that three interdependent policy challenges need to be addressed First industrial countries need to reduce their external payments imbalances Second developing countries need to continue restructuring their domestic economic policies in order to gain creditworthiness and growth Third net resource transfers external debt from the developing countries must be trimmed so that investment and growth can resume Part II of the report explores how public finance policies are best designed and implemented How deficits are reduced is crucial controlling costs in mobilizing revenues and setting careful priorities in public spending are equally important Efficiency in providing public services and expanding the scope for raising revenue can be achieved through decentralizing decisionmaking and reforming state owned enterprises with the latter permitting greater private participation

World Development Report 1984 World Bank, 1984 Long term needs and sustained effort are underlying themes in this year's report As with most of its predecessors it is divided into two parts The first looks at economic performance past and prospective The second part is this year devoted to population the causes and consequences of rapid population growth its link to development why it has slowed down in some developing countries The two parts mirror each other economic policy and performance in the next decade will matter for

population growth in the developing countries for several decades beyond Population policy and change in the rest of this century will set the terms for the whole of development strategy in the next In both cases policy changes will not yield immediate benefits but delay will reduce the room for maneuver that policy makers will have in years to come World Development Report 2006 Francisco H. G. Ferreira, Michael Walton, 2005-01-01 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater migration of lower skilled people from developing countries and increased and more effective development assistance *World Development Report 2011* World Bank, 2011-05-01 The 2011 WDR on Conflict Security and Development underlines the devastating impact of persistent conflict on a country or region s development prospects noting that the 1.5 billion people living in conflict affected areas are twice as likely to be in poverty Its goal is to contribute concrete practical suggestions on conflict and fragility World Development Report 2016 World Bank Group, 2016-01-14 This Report aims to inspire and guide the researchers and practitioners who can help advance a new set of development approaches based on a fuller consideration of psychological and social influences p 2
