The Rise and Fall of OPEC in the Twentieth Century Giuliano Garavini, 2019-07-25 The Organization of the Petroleum Exporting Countries OPEC is one of the most recognizable acronyms among international organizations It is mainly associated with the oil shock of 1973 when prices of petroleum quadrupled and industrialized countries and consumers were forced to face the limits of their development model This is the first history of OPEC and of its members written by a professional historian It carries the reader from the formation of the first petrostate in the world Venezuela in the late 1920s to the global ascent of petrostates and OPEC during the 1970s to their crisis in the late 1980s and early 1990s Formed in 1960 OPEC was the first international organization of the Global South It was perceived as acting as the economic spearhead of the Global South and acquired a role that went far beyond the realm of oil politics Petrostates such as Venezuela Nigeria Algeria Saudi Arabia Iraq and Iran were and continue to be key regional actors and their enduring cooperation defying wide political and cultural differences and even wars speaks to the centrality of natural resources in the history of the twentieth century and to the underlying conflict between producers and consumers of these natural resources

Democratization from Above Anjali Thomas Bohlken, 2016-01-11 Democratization from Above seeks to explain why some national and state governments in the developing world introduce reforms to make local governance more democratic while others neglect or actively undermine democracy at local levels of government The study challenges conventional wisdom that local democratization is implemented as a means of granting more autonomy to local actors Instead Anjali Thomas Bohlken argues that local democratization offers higher level government elites who lack control over party organizational networks an alternative means of increasing the effectiveness of local intermediaries on whom these elites rely to mobilize political support The book starts with a focus on India and uses original data and a combination of qualitative and quantitative evidence to show support for the argument The study then relies on an original cross national dataset to show how the argument helps explain the variation in the implementation of local democratization reforms across the developing world

The Case for Business in Developing Economies Ann Bernstein, 2012-10-03 Business is increasingly being called upon to demonstrate what more it does for society In a climate in which companies are frequently painted as social outlaws who need fundamentally to change their ways this determined if ill founded attack has been met for the most part by appeasement in corporate circles This acquiescence has given rise to the burgeoning corporate social responsibility industry Why is business going along with this The current conversation about business and society is dominated by the

perspectives and interests of those who live in rich western countries Many activists analysts and others do not grasp the realities of poverty and the hard choices of development outside the industrialised world As a result the debate about business responsibility and corporate involvement in development is distorted with few voices from developing countries being heard and the positive contribution of just doing business almost completely unacknowledged In this book Ann Bernstein argues that a new approach and a new discourse are required to cut through an increasingly flawed conversation with potentially dangerous consequences for the poor and for developing countries in particular Informed by many years of living working and championing the role of business in growth and development in a middle income developing country Bernstein urges business not to let the attacks stand unchallenged It must find the confidence and strategic vision to stop apologising develop its own public agenda and start propagating the phenomenal benefits of competitive capitalism for the less developed countries of the world

level of science and society from colorblindness to racial consciousness Scientists have been fighting older understandings of race in biology while simultaneously promoting a new grand scale program of minority inclusion In selecting research topics or considering research design scientists routinely draw upon personal experience of race to push the public to think about race as a biosocial entity and even those of the most privileged racial and social backgrounds incorporate identity politics in the scientific process Though individual scientists may view their positions differently whether as a black civil rights activist or a white bench scientist all stakeholders in the scientific debates are drawing on memories of racial discrimination to fashion a science based activism to fight for social justice
