The Material of World History Tina Mai Chen,David S. Churchill,2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes

Documentary,

World History, and National Power in the PRC Gotelind Mueller, 2013-10-30 Documentaries have recently become a favourite format for Chinese state directed media to present an officially sanctioned view of history. Indeed this is not confined to Chinese national history. In stark contrast to the earlier self centred preoccupation with Chinese history there has been an upsurge in interest in foreign history with a view to illuminating China's role not only in world history but also on the global stage today and in the future. This book examines three recent Chinese documentary television series which present the officially sanctioned view of the rise of the modern West, the reasons for the end of the Soviet Union and the legitimisation of the present day Chinese government via a specific reading of modern Chinese history to argue for a Chinese rise in the future. With a focus on these documentaries Gotelind Mueller discusses how history is presented on screen and explores the function of visual history for memory culture and wider society. Further this book reveals how the presentation of Chinese and foreign history in a global framework impacts on the officially transmitted views on Self and Other and thus provides a keen insight into how the Chinese themselves regard their global rise. *Documentary World History and National Power in the PRC* will be welcomed by students and scholars working across a number of fields including Chinese studies, East Asian studies, media studies, television studies, history and memory studies. **World Literature (Student)** James

Stobaugh, 2012-12-13 Students will be immersed into some of the greatest World literature ever written in this well crafted 34 week presentation of whole book or whole work selections from classic prose, poetry and drama. **Science and Technology in World History, Volume 3** David Deming, 2014-01-10 This installment in a series on science and technology in world history begins in the fourteenth century explaining the origin and nature of scientific methodology and the relation of science to religion, philosophy, military history, economics and technology. Specific topics covered include the Black Death, the Little Ice Age, the invention of the printing press, Martin Luther and the Reformation, the birth of modern medicine, the Copernican Revolution, Galileo, Kepler, Isaac Newton and the Scientific Revolution. **Justice in the Marketplace in Early**

Modern Spain Michael Thomas D'Emic, 2014-06-17 *Justice in the Marketplace in Early Modern Spain* examines two late scholastic economic treatises: the *Provechoso tratado de cambios* of Cristóbal de Villalón 1542 and the *Instrucción de mercaderes* of Saravia de la Calle 1544. It does this in the context of the two principal questions that economic historians pose concerning the economic literature of the Spanish late scholastics in general: Is there a clear link between this literature and modern economic science and does it manifest a free market orientation? Michael D'Emic draws two conclusions. First, there is a palpable relationship between the work of these two authors and modern economic analysis, particularly that of financial economics. Second, the authors fundamentally disagreed on most questions, mostly concerning the justice of the free market. Villalón condemns the workings of the market and refuses to allow any possibility that the profit motive may be morally neutral. With considerable clarity he articulates a cost of production theory of value and advocates a system of prices based upon labor and cost and administered by civil authority. Saravia counters with an elegant expression of the utility

theory of value and argues with logical force that prices established by the workings of the market are fundamentally just. He allows considerable moral latitude to the pursuit of profit which he regards as spiritually dangerous but not necessarily evil. Through the lens of their opposing views on economic value, the market price and what does or does not constitute the sin of usury, the authors with astonishing technical acumen observe, analyze and pass moral judgment on a remarkably wide range of complex transactions, most of which have counterparts in twenty-first century financial markets. In the process, they tackle problems that still bedevil economists and accountants in our own day, such as the difference between a sale and a borrowing, the just value of future income flows and the presence of asymmetrical information in pricing. The result is a vivid record of the color and texture of early modern economic life that reveals a surprising degree of financial sophistication that the present book makes accessible to the modern reader.

UPSC NCERT Books - Class 10 Notes and Summary Mocktime Publication, 2023-01-23

UPSC NCERT Books Class 10 Notes and Summary Science and Technology in World History, Volume 4 David Deming, 2016-04-05

The history of science is a story of human discovery intertwined with religion, philosophy, economics and technology. The fourth in a series, this book covers the beginnings of the modern world when 16th-century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans. Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable. Science emerged in 17th-century Europe as scholars subordinated reason to empiricism. Inspired by the example of physics, men like Robert Boyle began the process of changing alchemy into the exact science of chemistry. During the 18th century, European society became more secular and tolerant. Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies. As the Industrial Revolution fundamentally transformed the world by increasing productivity, people became more affluent, better educated and urbanized, and the world entered an era of unprecedented prosperity and progress.

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008

The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4-volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion

of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies, geography and history, comparative culture and society, including adoption, abortion, performing arts, organizations and movements such as the Egyptian Uprising and the Paris Commune, women's and gender studies, and topics in world history that include slave trade, globalization and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued go-to resource for scholars, college and high school students, and general readers alike.
