World War 1 Abd Beyond Answer Key:

Comrades Beyond the Cold War Tycho van der Hoog, 2025-02-06 North Korea was an important player in the decolonisation of Africa. Freedom fighters across the continent received vital assistance from Pyongyang and almost all southern African independence leaders travelled to the North Korean capital at some point in search of support. This alliance has continued into the twenty-first century with African postcolonial governments throwing a lifeline to Pyongyang's increasingly isolated economy by hiring North Korean companies despite United Nations sanctions. Tycho van der Hoog examines the relations between victorious southern African liberation movements and North Korea from the 1960s to the present. He explains why African presidents sang and danced at parties in Pyongyang and why North Korean books were translated into Swahili and Afrikaans. He reveals how African soldiers were trained in guerrilla warfare by North Korean instructors and how North Korean labourers construct monuments in Africa in the shape of AK 47s. And he explores the question of how revolutionary regimes motivated by a need for survival work together to defy the global order. Based on extensive research across four continents including recently disclosed African liberation archives and Korean diplomatic cables, this innovative study is the first book on African North Korean relations.

Beyond Rust Allen Dieterich-Ward, 2016 Beyond Rust chronicles the rise, fall, and rebirth of metropolitan Pittsburgh, an industrial region that once formed the heart of the world's steel production and is now touted as a model for reviving other hard-hit cities of the Rust Belt. Writing in clear and engaging prose, historian and area native Allen Dieterich-Ward provides a new model for a truly metropolitan history that integrates the urban core with its regional hinterland of satellite cities, white-collar suburbs, mill towns, and rural mining areas. Pittsburgh reached its industrial heyday between 1880 and 1920 as vertically integrated industrial corporations forged a regional community in the mountainous Upper Ohio River Valley. Over subsequent decades, metropolitan population growth slowed as mining and manufacturing employment declined. Faced with economic and environmental disaster in the 1930s, Pittsburgh's business elite and political leaders developed an ambitious program of pollution control and infrastructure development. The public-private partnership behind the Pittsburgh Renaissance, as advocates called it, pursued nothing less than the selective erasure of the existing social and physical environment in favor of a modernist, functionally divided landscape, a goal that was widely copied by other aging cities and one that has important ramifications for the broader national story. Ultimately, the Renaissance vision of downtown skyscrapers, sleek suburban research campuses, and bucolic regional parks resulted in an uneven transformation that tore the urban fabric while leaving deindustrializing river valleys and impoverished coal towns isolated from areas of postwar growth. Beyond Rust is among the first books of its kind to continue past the collapse of American manufacturing in the 1980s by exploring the diverse ways residents of an iconic industrial region sought places for themselves within a new economic order.

Intellectuals and the Crisis of Politics in the Interwar Period and Beyond Balázs Trencsényi, 2025-01-31 This volume offers a broad ranging and comprehensive analysis of the history and theory of the political idea of crisis from the interwar period through to the present day. It considers how the multiple crises of civilization, capitalism, social cohesion, liberalism, democracy, socialism, and the nation state were conceptualized, how these spheres of crisis became entangled, and who the intellectuals, politicians, and experts were who employed these discourses. *Intellectuals and the Crisis of Politics in the Interwar Period and Beyond* maps the range of meanings the term crisis has borne and the roles it has performed across disciplines and countries, de-centering the dominant narrative that takes Western European positions and developments as normative. It especially focuses on the historical roots of two key contemporary contesters of liberal democracy: neoliberalism and populism, and presents an innovative analysis of the roots of contemporary illiberalism in Europe. Bringing these ideas into the present day, Balázs Trencsényi offers ideas on how a reflective and self-critical liberal democratic political position could be defined and defended in our current predicament, which is increasingly compared to the interwar period and is often described as a polycrisis.

Osiris, Volume 38 James Evans, Adrian Johns, 2023-07-18 *Perceptively* explores the shifting intersections between algorithmic systems and human practices in the modern era. How have algorithmic systems and human practices developed in tandem since 1800? This volume of *Osiris* deftly addresses the question, dispelling along the way the traditional notion of algorithmic code and human craft as natural opposites. Instead, algorithms and humans have always acted in concert, depending on each other to advance new knowledge and produce social consequences. By shining light on alternative computational imaginaries, *Beyond Craft and Code* opens fresh space in which to understand algorithmic diversity, its governance, and even its conservation. The volume contains essays by experts in fields extending from early modern arithmetic to contemporary robotics. Traversing a range of cases and arguments that connect politics, historical epistemology, aesthetics, and artificial intelligence, the contributors collectively propose a novel vocabulary of concepts with which to think about how the history of science can contribute to understanding today's world. Ultimately, *Beyond Craft and Code* reconfigures the historiography of science and technology to suggest a new way to approach the questions posed by an algorithmic culture: not only improving our understanding of algorithmic pasts and futures, but also unlocking our ability to better govern our present.
