Fair America Robert W. Rydell, John E. Findling, Kimberly Pelle, 2000-03-17 Since their inception with New York's Crystal Palace Exhibition in the mid nineteenth century world's fairs have introduced Americans to exotic pleasures such as belly dancing and the Ferris Wheel pathbreaking technologies such as telephones and X rays and futuristic architectural landscaping and transportation schemes Billed by their promoters as encyclopedias of civilization the expositions impressed tens of millions of fairgoers with model environments and utopian visions Setting more than 30 world's fairs from 1853 to 1984 in their historical context the authors show that the expositions reflected and influenced not only the ideals but also the cultural tensions of their times As mainstays rather than mere ornaments of American life world's fairs created national support for such issues as the social reunification of North and South after the Civil War U S imperial expansion at the turn of the 20th century consumer optimism during the Great Depression and the essential unity of humankind in a nuclear age

Wonder-Full Education Kieran Egan, Annabella I. Cant, Gillian Judson, 2013-07-24 For many children much of the time their experience in classrooms can be rather dull and yet the world the school is supposed to initiate children into is full of wonder This book offers a rich understanding of the nature and roles of wonder in general and provides multiple suggestions for to how to revive wonder in adults teachers and curriculum makers and how to keep it alive in children Its aim is to show that adequate education needs to take seriously the task of evoking wonder about the content of the curriculum and to show how this can routinely be done in everyday classrooms The authors do not wax flowery they present strong arguments based on either research or precisely described experience and demonstrate how this argument can be seen to work itself out in

daily practice The emphasis is not on ways of evoking wonder that might require virtuoso teaching but rather on how wonder can be evoked about the everyday features of the math or science or social studies curriculum in regular classrooms **The Churchman** ,1904 180 Days: Language for Sixth Grade Suzanne I.
