GEOGRAPHY

How does geography affect how a civilization develops?

The people who study history are also the people who write about history. They piece together the information they find in order to understand people from the past. Their field of study is called **historiography**.

Social scientists also use geography to study history. The book *Guns, Germs, and Steel* looks at how geography helped and hurt civilizations in the past. Jared Diamond, the book's author, explained the three factors that helped Eurasian civilizations succeed: good temperatures and locations for agriculture, resistance to certain deadly germs, and the ability to develop technology.

Where a group of people settle can affect how, when, and in what way they

develop. The island nation of Japan was very isolated from the West before the mid-1800s. By the early 1900s, Japanese people were trading with the West and the country was considered a world power. Great Britain, also an island nation, developed much earlier. Britain was part of the Roman Empire. It later joined other European countries to start colonies around the world. The British had to develop a strong navy in order to protect its own empire around the globe.

1. Why did Japan develop later than Great Britain?

International Institutions in World History Laust Schouenborg, 2016-12-08 This book presents a case for a basic reorientation of International Relations away from the state and towards the study of social institutions in the sense of patterned practices ideas and norms rules IR has always suffered from a parochial occupation with the state and the Western system of state Its main theories revolve around these phenomena and have resulted in the reification of the state it has been turned into an essential actor with certain immutable and fundamental properties that remain constant throughout time A list of these properties usually includes territorial limits centralisation monopolisation of violence and exclusive loyalties *International Institutions in World History* shows how the state is an inherently modern phenomenon a modern social institution and that foundational concepts in IR should be based on a full appreciation of the wider record of human existence on earth trans historically and cross culturally Schouenborg argues that these social institutions may be captured via a universal functional typology consisting of four categories

Providing a broad introduction to the area, *A World History of Chinese Literature* maps the field of Chinese literature across its various worlds, looking both within at the world of Chinese literature, its history, linguistic, cultural, local, and regional specificities, and without at the way Chinese literature has circulated throughout the world. The thematic focus allows for a broad number of key categories, such as authors, genres, genders, regions, as well as innovative explorations of new topics and issues, such as inter-arts performativity and transmediation. The sections cover the circulation and reception of China in world literature, as well as the worlds of Chinese literature across the globe: borders, oceans, and rainforests. Comparative literary genres, Translingual writers and scholars, Gender configurations, Translation and transmediation. With a focus on the twentieth and twenty-first century, this collection intervenes in current debates on global Chinese literature, Sinophone and Sinoscript studies, and the production and reception of literary works by ethnic Chinese in non-Sinitic languages, as well as Anglophone literature inspired by Chinese literary tradition. It will be of interest to anyone working on or studying Chinese literature, language, and culture, as well as world literatures in relation to China.
