World History Human Legacy Chapter 13 Review:

An Unnatural History of Religions Leonardo Ambasciano, 2018-12-27 An Unnatural History of Religions examines the origins development and critical issues concerning the history of religion and its relationship with science The book explores the ideological biases logical fallacies and unwarranted beliefs that surround the scientific foundations or lack thereof in the academic discipline of the history of religions positioning them in today's post truth culture Leonardo Ambasciano provides the necessary critical background to evaluate the most important theories and working concepts dedicated to the explanation of the historical developments of religion He covers the most important topics and paradigm shifts in the field such as phenomenology postmodernism and cognitive science These are taken into consideration chronologically each time with case studies on topics such as shamanism gender biases ethnocentrism and biological evolution Ambasciano argues that the roots of post truth may be deep in human biases but that historical justifications change each time resulting in different combinations The surprising rise of once fringe beliefs such as conspiracy theories pseudoscientific claims and so called scientific creationism demonstrates the alarming influence that post truth ideas may exert on both politics and society Recognising them before they spread anew may be the first step towards a scientifically renewed study of religion

Wrecking Ball Stu Woolman, 2021-04-29 Wrecking Ball explores in an unprecedented manner a decalogue of wicked problems that confronts humanity Nuclear proliferation climate change pandemics permanent technological unemployment Orwellian public and private surveillance social media that distorts reality cyberwarfare the fragmentation of democracies the inability of nations to cabin private power the failure of multinational institutions to promote collaboration and the deepening of autocratic rule in countries that have never known anything but extractive institutions Collectively or even severally these wicked problems constitute crises that could end civilisation Does this list frighten you or do you blithely assume that tomorrow will be just like yesterday Wrecking Ball shows that without an inclusive system of global governance the collective action required to solve those wicked problems falls beyond the remit of the world's 20 inclusive democracies 50 flawed democracies and 130 extractive elitist autocracies Flawed democracies and autocracies that already struggle to produce goods necessary for their own citizens to flourish are simply incapable of committing to international arrangements that address the existential threats posed by the decalogue of wicked problems This then is our children's inheritance Dystopias far far worse than the polities that we ourselves have known What if anything can mitigate the harms that are our legacy Wrecking Ball offers as an answer a ground breaking analysis of South Africa's political economy It demonstrates that this country's elitist and extractive political and economic institutions not only make resolution of ongoing domestic crises unattainable likewise they make meaningful responses to wicked problems impossible Smart people think they have all the answers Without laboring under any such illusions Martin Luther King Jr eloquently opined The arc of the moral universe is long but it bends towards justice But what will happen King would acidly ask if we continue to dawdle and simply run out of

time Wrecking Ball similarly operates under no such smart pretenses and undeterred and unmatched ventures into terrains traversed by truly great political economists Smith Ricardo Marx and Keynes By knitting together what we all know to be the facts with cutting edge theory in economics sociology history and political science the book paints an unflinching portrait of where we are and where we are headed Are we ready to be honest with ourselves about the likely future of this overheated overpopulated planet

The Legacy of Walter Rodney in Guyana and the Caribbean Arnold Gibbons, 2012-07-10 Walter Rodney claimed developing countries were heirs to uneven development and ethnic disequilibrium including continued forms of oppression from the capitalist countries and their own leaders In Guyana ethnic chauvinism persisted before and after independence from Britain Rodney was disturbed by the inability of intellectuals to share common cause with the masses thus ensuring that they would be unable to contribute to uplifting their talents or participate in the growth of the nation Guyana and the Caribbean were subject to sugar and slave traffic that constituted cheap labor for the plantations and buttressed the capitalist industrial system A significant byproduct of that system was the master slave relationship a no less iniquitous consequence was an active racism Thus social inequality became the heritage of Guyanese and Caribbean history These social evils have influenced all of the social economic and political institutions in Guyana Race class and color became the determinants of social value and how the various racial groups responded to them is both the triumph and the tragedy of Guyanese nationalism Rodney belongs in that pantheon of philosophers whose names adorn the history of the Caribbean and elsewhere He has sought to lift the Caribbean people from the victimization of history and the poverty of material circumstance

Identity Politics in George Lucas' Star Wars John C. McDowell, 2016-03-09 George Lucas spoke about the didactic role of cinema and about his own work being presented through the moral megaphone of the film industry A considerable body of scholarship on the six part Star Wars series argues unconvincingly that the franchise promoted neo conservatism in American culture from the late 1970s onward But there is much in Lucas grand space opera to suggest something more ideologically complex is going on This book challenges the view of the saga as an unambiguously

violent text exemplifying reactionary politics and discusses the film's identity politics with regard to race and gender

Time to Lead Jan-Benedict Steenkamp, 2020-09-15 Where is leadership when we need it? What can today's corporate, non-profit, military, and public service leaders learn from daring decisions that changed history? In *Time to Lead*, Jan-Benedict Steenkamp presents a fresh examination of history-making leaders by holding a magnifying glass up to a life-changing dilemma each of them faced. What we learn is how powerful the personalities of leaders and their decision-making processes can be in determining the course of human events and the fates of millions of people. Steenkamp explains how these great men and women arrived at the solutions to the problems they confronted by virtue of their character traits and whether they were foxes or hedgehogs as in the ancient parable or as he further categorizes eagles or ostriches. Sixteen carefully curated case studies hold powerful lessons that today's leaders can apply in their own professional lives. Readers will recognize Roosevelt, Washington, Mandela, Thatcher, Alexander the Great, and MLK, but other lesser-known leaders such as Themistocles, Clovis, Peter Fisher, and Nightingale provide equally valuable insights into how individuals make decisions based upon one of seven leadership styles: adaptive, persuasive, directive, disruptive, authentic, servant, and charismatic, and four personality classifications: hedgehog, fox, eagle, or ostrich. Steenkamp's assessment tools provide seasoned and aspiring leaders alike with the means to not only determine their own individual styles but how to step up when they inevitably come face to face with their own moments of truth. Chapter takeaways, leadership principles, and open-ended reflective questions will confer encouragement, enrichment, and empowerment on readers when they realize they can utilize the same tactics as these leaders in their own lives. *Time to Lead* is about great men and women, their actions in leadership that have withstood the test of time, what we can learn from them, and the lessons that are relevant for us here and now.

earth today can trace their maternal DNA back to one woman who lived in Africa 150 000 years ago It was thought that modern humans populated the world through a series of migratory waves from their African homeland Now an even more radical view has emerged that the members of just one group are the ancestors of all non Africans now alive and that this group crossed the mouth of the Red Sea a mere 85 000 years ago It means that not only is every person on the planet descended from one African Eve but every non African is related to a more recent Eve from that original migratory group This is a revolutionary new theory about our origins that is both scholarly and entertaining a remarkable account of the kinship of all humans Further details of the findings in this book are presented at www.bradshawfoundation.com
