The Fabrication of Labor Richard Biernacki, 2024-06-04 This monumental study demonstrates the power of culture to define the meaning of labor Drawing on massive archival evidence from Britain and Germany as well as historical evidence from France and Italy *The Fabrication of Labor* shows how the very nature of labor as a commodity differed fundamentally in different national contexts A detailed comparative study of German and British wool textile mills reveals a basic difference in the way labor was understood even though these industries developed in the same period used similar machines and competed in similar markets These divergent definitions of the essential character of labor as a commodity influenced the entire industrial phenomenon affecting experiences of industrial work methods of remuneration disciplinary techniques forms of collective action and even industrial architecture Starting from a rigorous analysis of detailed archival materials this study broadens out to analyze the contrasting developmental pathways to wage labor in Western Europe and offers a startling reinterpretation of theories of political economy put forward by Adam Smith and Karl Marx In his brilliant cross national study Richard Biernacki profoundly reorients the analysis of how culture constitutes the very categories of economic life This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact

Seligmann, Frank Nögler, 2016-03-03 The intense rivalry in battleship building that took place between Britain and Germany in the run up to the First World War is seen by many as the most totemic of all armaments races Blamed by numerous commentators during the inter war years as a major cause of the

Great War it has become emblematic of all that is wrong with international competitions in military strength Yet despite this notoriety the Great Naval Race has not received the attention that this elevated status would merit and it has never been examined from the viewpoint of both of its participants simultaneously and equally This volume which contains a comprehensive survey of the existing scholarship on this topic both English language and German as well as important primary source materials from a range of archives in both Britain and Germany fills this gap By putting the actions of the British Admiralty side by side with those of its German counterparts it enables the naval race to be viewed comparatively and thereby facilitates an understanding of how the two parties to this conflict interacted By offering a comprehensive range of German documents in both their original text and in English translation the book makes the German role in this conflict accessible to an English speaking audience for the first time As such it is an essential volume for any serious student of naval policy in the pre First World War era
