Renaissance in the Tropics Mario Calderón Rivera, GAVIOTAS For the recovery of Earth's skin There is a new start towards the world One age that Mario Calderon Rivera outstanding thinker and humanist called Renaissance in the sense of both the Italian Renaissance as a change of mind of man to himself and the contemporary one as a change of mind from man towards nature The Renaissance led by this brilliant saying of Leonardo da Vinci Everything comes from everything and everything is made out of everything and everything returns into everything especially in a round planet This also comes to be true in Centro Las Gaviotas where they achieved among other things the reawakening of the Amazon rainforest in the Colombian savannas of Orinoco There they join the community welfare with the wealth generated by the sustainable use of tropical biodiversity which being located in the equatorial zone has one of the highest rates of biological productivity Within this context Mario Calderon travels through the last 60 years showing the ideas of the human being when he began to reflect on the effects of his action on Earth They consist of a new attitude towards nature seeing himself as being part of one system with it he can coexist without destroying understanding their connections i.e. its complexity Gaviotas age is this way of thinking The author in honor of Gaviotas and its founder Paolo Lugari sets the theoretical foundations of the progress mankind has made in this respect since the last half century Gaviotas is an example a path but at the same time an outpost of a bioculture that makes its way to protect both human life as well as that from others which ultimately are subjected to the recovery of the vegetable skin of Earth by the increase in biomass as this determines the dynamic stability of the composition of the atmosphere of 99% of nitrogen and oxygen If this composition would be disturbed by the continuing decline in biomass it would make impossible for human life to exist something much more serious than global warming Just warming is only a reductionist analysis of the issue Development is seen now in productive harmony with nature without undermining the very foundations of civilization With an extensive knowledge of the authors who have made the ecological thinking trends of our time Calderon contextualizes Gaviotas in the present world highlighting its conceptual contributions and its innovative achievements always pointing to a decent lifestyle without denying the modernity

Sustainability Anne Elizabeth Maczulak,2010 Examines the human use of Earth's natural resources and influence on its environment that have contributed to the need for sustainability a concept that combines economic and social development with environmental protection American Political Culture Michael Shally-Jensen,Mark J. Rozell,Ted G. Jelen,2015-04-28 This all encompassing encyclopedia provides a broad perspective on U S politics culture and society but also goes beyond the facts to consider the myths ideals and values that help shape and define the nation Demonstrating that political culture is equally rooted in public events internal debates and historical experiences this unique three volume encyclopedia examines an exceptionally broad range of factors shaping modern American politics including popular belief political action and the institutions of power and authority Readers will see how political culture is shaped by the attitudes opinions and behaviors of Americans and how it affects those things in return The set also addresses the issue of American exceptionalism and examines the nation's place in the world both historically and in the 21st century Essays cover pressing matters like congressional gridlock energy policy abortion politics campaign finance Supreme Court rulings immigration crime and punishment and globalization Social and cultural issues such as religion war inequality and privacy rights are discussed as well Perhaps most intriguingly the encyclopedia surveys the fierce ongoing debate between different political camps over the nation's historical development its present identity and its future course By exploring both fact and mythology the work will enable students to form a broad yet nuanced understanding of the full range of forces and issues affecting and affected by the political process Democratic by Design Gabriel Metcalf,2015-11-17 Americans have since our founding participated in a variety of alternative institutions self organized projects that work outside the traditional structures of government and business to change society From the town meetings that still serve as our ideal of self governance to the sustainable food movement that is changing the way we think about farming the land and feeding our families these secondary structures have given rise to many of our most exciting and important innovations Yet most people still know little about them even as

their numbers and their influence increase In today s climate of widespread economic inequity political gridlock and daunting environmental challenges we sorely need a fresh approach to social and political change In *Democratic by Design* Gabriel Metcalf sketches out a strategy that starts with small scale living examples of a better society that can ultimately scale up to widespread social transformation Using examples like car sharing organizations community land trusts credit unions workers co ops citizen juries community supported agriculture farms mission driven corporations and others *Democratic by Design* shows how alternative institutions can be the crucial spark for a broad new progressive movement
