Religion and Worldviews in Education Liam Gearon, Arniika Kuusisto, Saila Poulter, Auli Toom, Martin

Ubani, 2023-07-21 This timely book offers a critically important contribution to debates around the meeting place of religious and secular worldviews in education. Edited by five leading figures in the field and drawing on expert international scholarship and research, the book provides cutting edge analysis that bridges the religious and secular in global educational contexts. Considering the role of the United Nations, UNESCO, OECD and PISA in varied international contexts, the book draws on critical analysis of primary empirical research and secondary critique to offer a coherent blend of theoretically complex yet practical analysis of policy implementation. Throughout this accessible and logically structured volume, the authors assert that the meeting place of religious and secular worldviews is one of the most important and pressing issues for religion in education. As a field defining work of research into education, religion and worldviews, the book will be essential reading for scholars, researchers and postgraduate students in the fields of religious education, religious studies, philosophy of education and international education.

Nau clarifies that which is complicated, thereby allowing students to make better sense of their world and to become better global citizens. Stewart Dippel, University of the Ozarks. Henry R. Nau's best selling book, *Perspectives on International Relations*, is admired for its even handed presentation of realism, liberalism, constructivism and critical theory and for integrating these perspectives in every chapter. Public Theology: Perspectives on Religion and Education Manfred L. Pirner, Johannes

Lahnemann, Werner Haussmann, Susanne Schwarz, 2019-01-23 In order to draw out the relationship between publicly oriented Christianity and education, this book demonstrates that education is an important method and prerequisite of public

theology as well as an urgent object of public theology research's attention. Featuring work from diverse academic disciplines including religion, education, theology, philosophy, and religious studies, this edited collection also contends with the educational challenges that come with the decline of religion on the one hand and its transformation and regained public relevance on the other. Taken together, the contributions to this volume provide a comprehensive argument for why education deserves systematic attention in the context of public theology discourse and vice versa.

Institutional interaction in environmental governance Peter Narh, 2015-06-08 In this work, the attempt is made to explore and understand the interaction between different institutions in environmental governance and the role of human livelihood strategies in this interaction. With a case study of teak farming and sand winning in the Dormaa Municipality and Dormaa East district in midwestern Ghana, the work seeks to contribute to understanding the dynamics and role of institutions and human behaviour relationship in environmental governance. The study has been formulated and conducted following some observations of interaction between statutory and customary institutions in regulating human activities on the natural environment in Dormaa. Prior to this study, observations of this author in some communities in the Dormaa Municipality and Dormaa East district showed that statutory and customary environmental governance institutions influenced each other to shape the ways different people acted on the natural environment. Moreover, it was observed that the actions of people in turn influenced how these institutions functioned and affected each other.

Transdisciplinary Perspectives on Transitions to Sustainability Edmond Byrne, Gerard Mullally, Colin Sage, 2016-06-17 Demonstrating how a university can in a very practical and pragmatic way be re-envisioned through a transdisciplinary informed frame, this book shows how, through an open and collegiate spirit of inquiry, the most pressing and multifaceted issue of contemporary societal unsustainability can be addressed and understood in a way that transcends narrow disciplinary work. It also provides a practical exemplar of how far more meaningful deliberation, understandings, and options for action in relation to contemporary sustainability-related crises can emerge than could otherwise be achieved. Indeed, it helps demonstrate how only through a transdisciplinary ethos and approach can real progress be achieved. The fact that this can be done in parallel to or perhaps underneath the day-to-day business of the university serves to highlight how even micro seed initiatives can further the process of breaking down silos.

and reuniting C P Snow's two cultures after some four centuries of the relentless project of modernity While much has been written and talked about with respect to both sustainability and transdisciplinarity this book offers a pragmatic example which hopefully will signpost the ways others can will and indeed must follow in our common quest for real progress

Mutua, 2013-07-03 In 1948 the United Nations adopted the Universal Declaration of Human Rights and with it a profusion of norms processes and institutions to define promote and protect human rights Today virtually every cause seeks to cloak itself in the righteous language of rights But even so this universal reliance on the rights idiom has not succeeded in creating common ground and deep agreement as to the scope content and philosophical bases for human rights Makau Mutua argues that the human rights enterprise inappropriately presents itself as a guarantor of eternal truths without which human civilization is impossible Mutua contends that in fact the human rights corpus though well meaning is a Eurocentric construct for the reconstitution of non Western societies and peoples with a set of culturally biased norms and practices Mutua maintains that if the human rights movement is to succeed it must move away from Eurocentrism as a civilizing crusade and attack on non European peoples Only a genuine multicultural approach to human rights can make it truly universal

Indigenous non European traditions of Asia Africa the Pacific and the Americas must be deployed to deconstruct and to reconstruct a universal bundle of rights that all human societies can claim as theirs *A Complex Integral Realist Perspective* Paul Marshall, 2016-07-01 This book sketches the contours of a vision that moves beyond the dominant paradigm or worldview that underlies and governs modernity and postmodernity It does so by drawing on the remarkable leap in human consciousness that occurred during the Axial Age and on a cross pollination of what are arguably the three most comprehensive integrative metatheories available today Complex thought integral theory and critical realism i.e. a complex integral realism By deploying the three integrative metatheories this book recounts how the seeds of a number of biases

within the Western tradition analytical over dialectical epistemology over ontology presence over absence and exterior over interior were first sown in axial Greece later consolidated in European modernity and then challenged throughout the 20th century It then discusses the remedies provided by the three integrative philosophies remedies that have paved the way for a new vision Outlining a new axial vision for the twenty first century which integrates the best of premodernity modernity and postmodernity within a complex integral realist framework this book will be of interest to students and scholars of the Axial Age critical realism integral theory and complex thought It will also appeal to those interested in a possible integration of the insights and knowledge gleaned by science spirituality and philosophy *Public Commissions on Cultural and Religious Diversity* Solange Lefebvre, Patrice Brodeur, 2017-05-08 Due to growing negative perceptions about relations between historically entrenched dominant populations and various minority groups issues relating to the need to better manage cultural and religious diversity have been intensifying in many countries These negative perceptions have recently led to a significant increase in popular support for right and extreme right nationalist discourses and have created so much public tension that national governments have had no choice but to respond In the last two decades in several Western contexts in particular the issues raised by such combined challenges have culminated in the creation of government initiated or private national commissions This book presents the results of a multidisciplinary analysis from a broader framework that includes the national public commissions which have addressed the challenges of managing cultural and religious diversity in Belgium Britain Canada Quebec France Morocco and Norway including also other cases of public management in Australia and Singapore It includes in depth studies of the issues and controversies examined by each of the commissions such as the ways they perceived the issues their results and impact the key political players involved the media debates and reception surrounding each commission the communication strategies and difficulties their leaders encountered as well as the legal aspects each commission has raised The reports represent a rich body of work charting the fundamental questions nations face about their nature history and future while the impact on peoples lives tells us much about different approaches to the issues of cultural identity between countries The Universal Declaration of Human Rights and the Challenge of Religion Johannes Morsink, 2017-08-03 Repulsed by evil Nazi practices and desiring to create a better world after the devastation of World War II in 1948 the UN General Assembly adopted the Universal Declaration of Human Rights UDHR Because of the secular imprint of this text it has faced a series of challenges from the world s religions both when it was crafted and in subsequent political and legal struggles The book mixes philosophical legal and archival arguments to make the point that the language of human rights is a valid one to address the world s disputes It updates the rationale used by the early UN visionaries and makes it available to twenty first century believers and unbelievers alike The book shows how the debates that informed the adoption of this pivotal normative international text can be used by scholars to make broad and important policy points *Rights-Based Ethics* Marcus Düwell, Johannes Graf Keyserlingk, Philipp Richter, 2025-09-16 Rights based

ethics offer a conceptual framework to address the complex ethical issues of our time This volume combines systematic and historical perspectives on rights based ethics with discussions of a broad range of topics in applied ethics to assess the achievements and limits of rights based approaches The normative concepts of fundamental human rights and human dignity play an essential role in considerations about global justice and international politics However these concepts have not been taken up sufficiently in the standard approaches to normative ethics This volume contends that rights based approaches in ethics not only offer a theoretical framework to explain complex normative concepts but they can also offer answers to some of today s most complex moral questions First the book addresses the conceptual and foundational questions of rights based ethics Second it offers historical and cultural perspectives on rights Third it explores how rights based ethics can address applied issues related to climate change health systems global supply chains and the finance industry This volume will be of interest to scholars and graduate students working in ethics political philosophy philosophy of law and the social sciences The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution ShareAlike CC BY SA 4 0 International license This publication was made possible by generous support of the Open Access monograph funds of the university library of the TU Darmstadt and by generous support of the Institute for Philosophy I at the Faculty of Philosophy and Educational Research of the Ruhr University Bochum

Natural Human Rights Michael Boylan, 2014-08-11 This timely book by internationally regarded scholar of ethics and social political philosophy Michael Boylan focuses on the history application and significance of human rights in the West and China Boylan engages the key current philosophical debates prevalent in human rights discourse today and draws them together to argue for the existence of natural universal human rights Arguing against the grain of mainstream philosophical beliefs Boylan asserts that there is continuity between human rights and natural law and that human beings require basic essential goods for minimum action These include food clean water and sanitation clothing shelter and protection from bodily harm including basic healthcare The achievement of this goal Boylan demonstrates will require significant resource allocation and creative methods of implementation involving public and private institutions Combining technical argument with four fictional narratives about human rights the book invites readers to engage with the most important aspects of the discipline
