# The Modern World

**Essential Knowledge:** Advancements in science and technology changed the lives of people around the globe. Improved communications and transportation allowed goods, services, and ideas to move rapidly. Inventions and innovations also brought the nations of the world closer and exposed people to other cultures.

Cultures are now blending ideas and customs much faster than before. In addition, the economies of the world's nations are so tightly linked that the actions of one nation affect other nations.

Since 1945, nations have used collective security efforts to solve problems. Personal security of the people of the world is tied to security within and between nations.

Despite efforts to minimize global safety and minimize terrorist attacks, terrorism still threatens the safety of people all over the world. People and nations must work together against the dangers posed by terrorism.

Shopping Malls and Public Space in Modern China Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable. Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres. Despite the sizeable body of literature that has accompanied China's modernization, the essence and trajectory of its contemporary cityscape remains difficult to grasp. This volume addresses a less explored aspect of China's urban rejuvenation: the prominence of the shopping mall as a keystone of its public spaces. Here, the presence of the built form most representative of Western capitalism's excess is one that makes explicit the tensions between China's Communist state and its ascent within the free market. This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city. By viewing these interrelationships as collisions of global and local narratives, a more nuanced understanding of the shopping mall typology is explored. Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall; yet it is a building type whose public popularity has guaranteed its endurance. Consequently, if architecture is to remain a relevant social art, a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces. This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today. **Access to History: China 1839-1997** Michael

**Contemporary China's Land Use Policy** Long Cheng, 2020-09-24 This book discusses contemporary China's land use policy: the Link Policy, which calls for land consolidation and rural resettlement to achieve the goal of preserving farmland while also providing more space for urban development. Given the limited analyses and commentaries on the Link Policy in the literature, particularly in English language articles, the book systematically presents and analyzes China's land use policy by assessing the impacts of the Link Policy on rural life and how effective the Link Policy is in achieving its objectives. It also examines how satisfied farmers are with the policy and what the contributing factors are. Drawing on a critical review of the literature, field observations and interviews with resettled farmers, the book offers insights into China's land use policy and compares it with similar policy instruments in other countries. Presenting

*Democratization in China, Korea and Southeast Asia?* Kate Xiao Zhou, Shelley Rigger, Lynn T. White III, 2014-01-21 Rapid economic pluralization in East Asia has empowered local and medial groups and with this change comes the need to rethink usual notions regarding ways in which democracies emerge or citizens gain more power Careful examination of current developments in China Korea and Southeast Asia show a need for expansion of our understandings of democracy and democratization This book challenges traditional ways in which political regimes in local as well as national polities are conceived and labeled It shows from Asian experiences that democracy and its precursors come in more forms than most liberals have yet imagined In reviewing recent experiences of countries across East Asia these chapters show that actual democracies and ostensible democratizations there are less like those in the West than the surprisingly consensual and standard political science of democratization suggests This book first examines the extreme variation of democracy's meaning in many Asian states that hold contested elections South Korea Taiwan Indonesia Malaysia the Philippines and Thailand Then it focuses on China It analyzes a range of grassroots forces driving political change in the People's Republic and it finds both accelerators and brakes in China's political reform process The contributors show that models for China's political future exist both within and outside the PRC including in other East Asian states in localities and sectors that already are pushing the limits of the powerful but no longer all powerful Chinese party state With contributions from leading academics in the field Democratization in China Korea and Southeast Asia will be of interest to students and scholars of
