Blunsom,2013-04 We live in our nations but what other nations do may affect us and sometimes immensely We are all members of the world community of people living in our dangerous world The purpose of the following book is to consider the laws and practices that govern our nations and through them our world It builds on the premise that unless we change and improve our laws the human race may not survive in the future It is not about any particular nation but about all nations Many citizens believe their nations are ideal providing freedom and justice and with governments representative of the people This may be true in their minds and according to their beliefs but the dangers and sufferings of the world continue They are the concern of us all because they affect all people The world has changed vastly from the past It is technically more advanced but also more dangerous because of nuclear and other deadly weapons and widespread poverty and diseases in overgrown populations The past in spite of its myriad wars and premature deaths has survived Can our present world using the same instruments power nations positive laws strictly enforced retaliations and harsh punishments also survive The answer may be an unequivocal no reverberating through future power wars We need a fresh outlook different laws and a new phase of global society to replace the past Legal philosophers have proclaimed many varieties of laws including eternal laws

provided by God and natural laws according to human nature Most are nonenforced laws that they say Ought to be Positive laws are those that exist made and enforced by nations *Catalog of Copyright Entries.
