on interviews with Chinese teachers and their American students as well as conversations with university administrators this book argues that Chinese investment in American higher education serves as a broad form of global policy harnessing the power of intercultural exchange as a means of managing international diplomatic relations through the experiences of university students A transnational study Confucius and Crisis in American Universities questions and reframes conventional notions of economic globalization and flexible citizenship demonstrating how Chinese investment in U S education advances the lives of the already privileged by creating access to overseas labor and markets but to the exclusion of middle and working class students A valuable and timely resource for scholars of education and anthropology this book will also be useful to anyone interested in education policy or international affairs *California Future Farmer* ,1950 *Taxes on Bank Shares* United States.
