World Architecture Cross Cultural History

Korydon Smith, Miguel Guitart

World Architecture Cross Cultural History:

World Architecture Richard Ingersoll, 2019 World Architecture provides the most comprehensive and contemporary survey of the field Each chapter is organized chronologically and focuses on three unique architectural cultures simultaneously providing instructors with flexibility and offering students a comprehensive method for understanding and appreciating the history cultural significance beauty and diversity of architecture from around the world World Architecture and Society Peter Louis Bonfitto, 2021-12-06 This two volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day providing students with an essential understanding of architectural development and its impact on human societies This two volume encyclopedia provides an in depth look at buildings and sites of global significance throughout history The volumes are separated into four regional sections 1 the Americas 2 Europe 3 Africa and the Middle East and 4 Asia and the Pacific Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe Entries explore the unique importance of buildings and sites including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions Other entries highlight remarkable stories of architectural achievement and memory like those of Tuskegee University a site hand built by former slaves or the Hiroshima Peace Memorial Park which was built at the site of the atomic detonation Each entry focuses on the architectural but includes strong consideration of the social impact importance and significance each structure has had in the past and in the present *The Bloomsbury Handbook of World Theory* Jeffrey R. Di Leo, Christian Moraru, 2021-11-18 Disciplines from literary studies to environmentalism have recently undergone a spectacular reorientation that has refocused entire fields methodologies and vocabularies on the world and its sister terms such as globe planet and earth The Bloomsbury Handbook of World Theory examines what world means and what it accomplishes in different zones of academic study The contributors raise questions such as What happens when world is appended to a particular form of humanistic or scientific inquiry How exactly does worlding bear on the theoretical operating system and the history of that field What is the theory or theoretical model that allows world to function in a meaningful way in coordination with that knowledge domain With contributions from 38 leading theorists from a vast range of fields including queer studies religion and pop culture this is the first large reference work to consider the profound effect both within and outside the academy of the worlding of discourse in the 21st century *Designing Emerging Markets* Giaime Botti, 2023-05-22 This book offers a unique glance into the process of globalisation of the architectural practice during the last three decades through the lenses of innovative methodologies in architectural history based on quantitative data Focusing on the golden age of globalisation 1990 2019 it investigates the transnational work of more than one thousand architectural firms of different business models from Europe North America and the Asia Pacific in a broad sample of

emerging markets Mainland China South East Asia India the Persian Gulf Sub Saharan Africa Russia and Kazakhstan and Latin America In the book different thematic geographies are presented to explore the global scope of the contemporary profession examine significant projects and the structural conditions behind them and reveal the debates that such works generated Understanding the global agency of design firms in emerging markets also becomes a way to study different market conditions modes of production and architectural trends comparatively and to highlight the shifts that occurred in the profession over the last few decades The use of quantitative methodologies produces a novel and updated narrative on contemporary architecture in emerging markets grounded in quantitative data rather than in preassumptions and purely qualitative interpretations Richly illustrated this book is further enhanced by an ample set of maps graphs and tables to visualise data better

White Supremacy, Settler Colonialism, Modernist Architecture, and Contemporary Preservation

Robert Flahive,2025-06-27 This book examines the afterlives of the built environment produced through early 20th century settler colonialism The author analyzes contemporary architectural preservationists narrative strategies to remake what were designed as racialized European zones in opposition to Indigenous zones as white cities through the documentation preservation and addition to the UNESCO World Heritage List This book interrogates the fashioning of white cities through ethnographic methods with local architectural preservationists and primary sources such as World Heritage Committee meeting notes and World Heritage List nomination files and inscription materials in the preservation of built form in Asmara Bras lia Casablanca Rabat and Tel Aviv The book is aimed at scholars and students interested in the politics of the built environment spatial politics urban studies architectural history international relations urban geopolitics settler colonialism international organizations and the politics of commemoration

What Architecture Means Denise Costanzo,2015-07-24

What Architecture Means introduces you to architecture and allows you to explore the connections between design ideas and values across time space and culture It equips you to play an active and informed role in architecture either as a professional or as a consumer client and citizen By analyzing famous and everyday buildings while presenting and questioning the positions of important architects and theorists this book will help you to evaluate and decide what qualities ideas and values you believe are important in architecture You ll learn How various definitions of architecture establish different relationships with all buildings and even non buildings How buildings express and accommodate ideas of the sacred the family and the community What an architect is and what priorities they bring to design and construction How an architect s expertise relates to that of the engineer and why these are distinct disciplines About values like beauty originality structural expression and cultural memory and their purpose in architectural design About the interests and ethical values that architects and architecture serves and promotes Topics include sacred spaces the house the city architects and engineers aesthetics and design originality and method technology and form memory and identity and power and politics

Getty Research

Journal, No. 10 Gail Feigenbaum,2018-03-06 The Getty Research Journal features the work of art historians museum

curators and conservators from around the world as part of the Getty's mission to promote critical thinking in the presentation, conservation and interpretation of the world's artistic legacy. Articles present original research related to the Getty's collections, initiatives and research projects. This issue features essays on the cross-cultural features of a small alabaster vessel in the international style of the ancient Mediterranean; French and Flemish influences in the Montebourg Psalter; a new identification for the so-called bust of Saint Cyricus; the effects of the Reformation on the art market in northern Europe; sketchbooks kept by the Portuguese painter João Gama Stroeberle containing comments from his teachers; the origins of the architectural history survey; Japanese ink aesthetics in non-ink media; the impact of the invention of adhesive tape in the 1930s on the artistic process of abstract painters; and the importance of ephemeral artifacts for the documentation of Carolee Schneemann's performance works. Shorter texts include notices on an Egyptian ushabti from the tomb of Neferibresaneith; a bronze statuette newly identified as representing the Alexandrian god Hermanubis; and an etching by Félix Bracquemond commissioned by the Parisian gallery Arnold Tripp.

Sport and Architecture Benjamin S. Flowers, 2017-05-08 Sport and architecture are two elements of contemporary life that have a broad and profound impact on the world around us. The role architecture plays in shaping buildings and societies has occupied historians for centuries. Likewise, the cultural, economic and political importance of sport is the subject of sustained academic inquiry. When sport and architecture converge, as in the 2012 London Olympics or the 2014 World Cup in Brazil, then the impact of these two forms of social activity is redoubled. This book presents a new and dynamic study of the complex relationship between sport and architecture. It explores the history of sport architecture and examines the buildings and events that create sites where sport and architecture converge in particularly telling ways. Its chapters discuss the following topics: sport architecture and urban redevelopment; sport architecture and technology; sport architecture and nationalism; sport architecture as social activism; sport architecture and global capitalism. By considering the importance of architectural form alongside these key themes, this book represents a landmark study for anybody interested in the social and cultural significance of architecture or sport.

Interior Design Masters Mark Hinchman, Elyssa Yoneda, 2018-06-27 *Interior Design Masters* contains 300 biographical entries of people who have significantly impacted design. They are the people, historical and contemporary, that students and practitioners should know. Coverage starts in the late Renaissance with a focus on the twentieth and twenty-first centuries. The book has five sections with the entries alphabetical in each so it can serve as a history textbook and a reference guide. The seventeenth and eighteenth-century section covers figures from Thomas Chippendale to Horace Walpole. The nineteenth-century section includes William Morris and Candace Wheeler. The early twentieth-century section presents modernism's design heroes including Marcel Breuer, Eileen Gray and Gilbert Rohde. The post-World War II designers range from Madeleine Castaing to Raymond Loewy. The final contemporary section includes Ron Arad and the Bouroullec brothers. These are the canonical figures who belong to any design history. The book also contains less well-known figures who deserve

attention such as Betty Joel the British art deco furniture designer Paul Veyseyre the Frenchman active in China in the 1930s and more recently Lanzavecchia Wai the Italian Singaporean duo whose work ranges from health care to helicopters Global in its coverage the book is richly illustrated with over 600 black and white and color photographs *Spatial Theories for the Americas* Fernando Luiz Lara, 2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of *Spatial Theories for the Americas* offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses *Spatial Theories for the Americas* proposes a fundamental step in that direction MCM - Milan, Capital of the Modern Lorenzo Degli Esposti, 2021-04-15 MCM Milano Capital of the Modern edited by Lorenzo Degli Esposti is made up of texts and images from over 300 contributors from Europe and the US across three generations involved in the activities of the Padiglione Architettura in EXPO Belle Arti of Vittorio Sgarbi a programme by the Regione Lombardia hosted in the Grattacielo Pirelli during the EXPO 2015 They investigate the relationships between modern architecture the city of Milan Razionalismo reconstruction Tendenza Radical Design up to current research and the city in general between single and specific works and the large scale of the urban territory in the contradictions between architecture autonomy and its dependence on specific place and historical time The idea of MCM is that each capital of the Modern brings an original version of modernity in architecture in the specific Milanese case this kind of Modern is characterized by the simultaneous presence of abstract systematic and syntactic features and an ontological conception of both buildings and architectural and urban voids A Cross-Cultural History of Britain and Belgium, 1815-1918 Marysa Demoor, 2022-03-21 This book highlights the ways in which Britain and Belgium became culturally entangled as a result of their interaction in the period between the Napoleonic Wars and the First World War In the course of the nineteenth century the battlefields of Waterloo and Ypres in Belgium became veritable burial grounds for generations of dead British military indirectly leading to the most intensive ties between the two countries By exploring this twofold path the author uncovers a series of cross influences and creative similarities within the Belgo British artistic community and explores the background against which the British national identity was constructed Revealing unknown links between some of the most famous

artists on both sides of the channel such as D G Rossetti and Jan Van Eyck Christina Rossetti and Fernand Khnopff John Millais and Pieter Breughel and Lewis Carroll and Quentin Massys the book emphasises an artistic cross fertilisation that can be found within battlefield literature throughout the nineteenth century including examples from the likes of William M Thackeray Frances Trollope and Charlotte Bront Providing a rich intercultural history of Belgo British relations after the battle of Waterloo this interdisciplinary book will appeal to scholars and students researching history literature art and cultural studies

Virtual Reality Tatjana Crossley,2025-09-30 This book investigates how immersive environments across architecture art and media shape spatial perception cultural identity and the construction of reality It offers a spatial psychoanalytical reading of virtual reality VR examining how architecture and representation engage with the body sensorial experience and subjectivity Redefining VR as an experiential and spatial condition rather than simply a digital construct the book traces its lineage from ancient fresco rooms to contemporary digital landscapes Grounded in theoretical frameworks from psychoanalysis phenomenology and media theory it explores how immersive environments function as extensions of the body and reflect a collective identity Case studies from Pompeii to the Metaverse illustrate how architecture and representation shape our virtual experience Rather than viewing VR as a new phenomenon the book positions it as part of a longer trajectory in design and representation shaped by evolving tools and technologies It argues that the virtual spaces we create and the artifacts we choose to represent encode insights about identity memory and social conditions This book is written for theorists practitioners academics and students of architecture art and design It situates architectural practice within the unfolding discourse on virtuality identity and the cultural implications of space making

Introducing Architectural Theory Korydon Smith,Miguel Guitart,2024-01-22 Building on the success of the first edition an engaging and reader friendly work on complex ideas Introducing Architectural Theory Expanding the Disciplinary Debate broadens the range of themes voices and geographies represented to provide a more comprehensive and contemporary theory book This book presents major discourses in architectural theory and design in a debate like format integrating a series of edited texts across architectural history with context and newly written commentaries by the authors This new edition has been fully revised updated and expanded to include long standing debates such as simplicity vs complexity or the relationship between form and function as well as newer discussions on innovation globalization and social equity Authors Smith and Guitart provide a comprehensive means and conceptual framework for readers to compare multiple points of view The chapter structure discussion questions and additional resources allow teachers to facilitate in class discussions and writing assignments This book remains the most accessible architectural theory textbook written for beginning architecture students and those outside the discipline Its reflective and critical approach will equally engage the minds of upper level students and experts

The Routledge Handbook of Urban Studies in Latin America and the Caribbean Jesús M. González-Pérez,Clara Irazábal,Rubén C. Lois-González,2022-07-19 This handbook presents the great contemporary challenges facing cities and

urban spaces in Latin America and the Caribbean The content of this multidisciplinary book is organized into four large sections focusing on the histories and trajectories of urban spatial development inequality and displacement of urban populations contemporary debates on urban policies and the future of the city in this region Scholars of diverse origins and specializations analyze Latin American and Caribbean cities showing that despite their diversity they share many characteristics and challenges and that there is value in systematizing this knowledge to both understand and explain them better and to promote increasing equity and sustainability The contributions in this handbook enhance the theoretical empirical and methodological study of urbanization processes and urban policies of Latin America and the Caribbean in a global context making it an important reference for scholars across the world The book is designed to meet the interdisciplinary study and consultation needs of undergraduate and graduate students of architecture urban design urban planning sociology anthropology political science public administration and more Fundamental Particles Francesco Soppelsa, Octavio Mestre, 2020-02-08 The book talks about the design and construction of the building 774 at CERN The building 774 is a unique building both for its architectural value and for its location Located in front of of the CCC Control Center at CERN is the main door of more than 100 000 tourists come visiting CERN each year *Comparative Legal History* Olivier Moréteau, Aniceto Masferrer, Kjell A. Modéer, The specially commissioned papers in this book lay a solid theoretical foundation for comparative legal history as a distinct academic discipline While facilitating a much needed dialogue between comparatists and legal historians this research handbook examines methodologies in this emerging field and reconsiders legal concepts and institutions like custom civil procedure and codification from a comparative legal history perspective

Understanding Emergent Urbanism Sotir Dharmo, 2021-08-31 The ideas presented in this book are a conceptual leverage to correct the rigidity of top down practices and bring the real city or the city of everyday life closer to the city of conventional planning Considering self organization as the starting point at the base of complex systems this book tries to understand how specific qualities emerge and evolve from this behavior For this the book discusses new ways of looking at and understanding cities by applying holistic methods and approaches based on the conceptual grounds of quantum fractal and complexity theories The book highlights the fact that the information on how to transform and build a city is contained within the city itself In this regard some methodological steps to unpack complexities and translate the essential qualities of space into potential generators for city design and planning are provided The book urges courageous experimentation and proposes a methodology where the computational nature of urban phenomena goes along with historic anthropological ideas thus emphasizing the characteristics of a specific reality in a model They do not exclude each other in fact they are part of the unbroken web of wholeness Importantly the proposed methodology supports gradual and natural coevolution process in the city through combining planned and unplanned actions and the involving multiplicity of actors impacting on Urban Planning and Design Practice **Informality through Sustainability** Antonino Di Raimo, Steffen Lehmann, Alessandro

Melis,2020-12-30 Informality through Sustainability explores the phenomenon of informality within urban settlements and aims to unravel the subtle links between informal settlements and sustainability Penetrating its global profile and considering urban informality through an understanding of local implications the authors collectively reveal specific correlations between sites and their local inhabitants The book opposes simplistic calls to legalise informal settlements or to view them as problems to be solved It comes at a time when common notions of informality are being increasingly challenged In 25 chapters the book presents contributions from well known scholars and practitioners whose theoretical or practical work addresses informality and sustainability at various levels from city planning and urban design to public space and architectural education Whilst previous studies on informal settlements have mainly focused on cases in developing countries approaching the topic through social cultural and material dimensions the book explores the concept across a range of contexts including former Communist countries and those in the so called Global North Contributions also explore understandings of informality at various scalar levels region precinct neighbourhood and individual building Thus this work helps reposition informality as a relational concept at various scales of urbanisation This book will be of great benefit to planners architects researchers and policymakers interested in the interplay between informality and sustainability

Innovative Student Residences Avi Friedman,The Images Publishing Group,2016-03-29 Current design modes of student residences are facing challenges of both philosophy and form Past approaches no longer sustain new demands and require innovative thinking The need for a new outlook is propelled by fundamental changes that touch upon environmental economic and social factors Thinking innovatively about university accommodation led to the idea to write Innovative Student Residences The author offer a fascinating insight into contemporary design concepts and illustrates them with outstanding examples showcased by full color photography and detailed plans
