

Decline in Agriculture A decline in agriculture also weakened the empire. Overworked soils and overuse of slaves (the soil had become difficult to turn due to constant tilling and trampling) led to a result: harvests grew increasingly poor.

The use of slaves also affected the political side of agriculture. Slaves worked the farms instead of slaves. The use of slaves was common who were forced to work in the fields. The use of slaves also discouraged improvements in technology that might have improved farming. As farms grew smaller, slaves and foreign slaves and the population declined.

Military and Political Problems Eventually, Rome's great military machine began showing signs of weakness. Over time, Roman soldiers were paid less and less. They gladdened soldiers in general because the discipline and loyalty. They gladdened that discipline was to Rome, but a corrupted military leaders. Soldiers of Rome eventually declined among corrupt citizens. Soldiers of Rome eventually declined among corrupt citizens. Soldiers of Rome eventually declined among corrupt citizens.

Corruption Over the centuries and political problems weakened the empire.

Rome Divides into East and West

Essential Question What changes did Rome undergo?

Despite all its difficulties, the Roman Empire continued on for another 200 years. This was due in part to the strong leadership of two emperors: Diocletian (284–305) and Constantine.

Power Shifts East Diocletian became the leader of Rome in 284. He moved east to the empire for ruling with an iron fist and increasing his reputation. In addition, he took the bold step of dividing the empire into east and west as a way of making Rome's borders easier to govern.

Constantine succeeded Diocletian as emperor and took even steps of great significance. The first occurred in 313, when he also issued an edict to all Christians. By allowing Christians to worship freely, he played a key role in Christianity's growth.

Constantine's second significant action came in 330. He moved the capital of the empire from Rome to the Greek city of

Byzantium (later Constantinople), which later became known as Constantinople. The new capital signaled a shift in power from the western part of the empire to the east.

Corruption What key changes did Constantine make to Rome?

Fall of the Roman Empire

Essential Question What brought about the fall of Rome?

In addition to internal difficulties, the Romans faced another major problem. Foreign groups were encroaching all around Rome's borders. Some they would invade, and the empire's slow decline would turn into a rapid downfall.

Primary Source
Read the account of the fall of Rome on page 175.

Invasion and Conquest A number of Germanic groups and other groups lived beyond Rome's borders. During the last 300 years, these groups began pushing into Roman lands. Their reasons for invading varied. Some came looking for better land or to join in Rome's wealth. Many others were fleeing a fierce group of invaders from Asia known as the Huns. Eventually, the Huns themselves would invade the empire. In 476, Germanic tribes conquered Rome. It was this date, according to most scholars, that marks the fall of the Western Roman Empire.
