This volume draws together the ground breaking work of researchers and archaeological practitioners working in multiple countries to explore and understand the material and cultural impacts of the Pacific War The combat taking place in the Pacific region during the years 1941 45 was characterized by a brutality and violence unmatched in any other theatre of the Second World War Described by indigenous Micronesians as a typhoon the war was an unstoppable force that rolled across the islanders homes leaving only a trail of destruction in its wake with physical psychological and cultural impacts that continue to resonate today This difficult period is examined in a variety of ways through chapters that include targeted studies of archaeological sites wider surveys of battlefield landscapes and the ways in which we commemorate the experiences and legacies of both combatants and civilian populations The translation of important research by Okinawan Japanese and Russian archaeologists brings into focus regions that have previously been neglected in Anglophone literature and enriches this comprehensive exploration of the archaeology of the Pacific War This book will be of interest to archaeological practitioners students and members of the general public working in conflict studies or with an interest in the material culture history and legacies of the Pacific War **Between the Seas** Deborah Paci, 2023-01-26 In *Between the*

tactics required them to develop new weapons and strategies One of the most crucial to the island assaults was a new group of amphibious gunboats that could deliver heavy fire close in to shore as American forces landed These gunboats were also to prove important in the interdiction of inter island barge traffic and late in the war the kamikaze threat Several variations of these gunboats were developed based on the troop carrying LCI L They included three conversions of the LCI L with various combinations of guns rockets and mortars and a fourth gunboat the LCS L based on the same hull but designed as a weapons platform from the beginning By the end of the war the amphibious gunboats had proven their worth

Heritage and Memory of War Gilly Carr, Keir Reeves, 2015-04-17 Every large nation in the world was directly or indirectly affected by the impact of war during the course of the twentieth century and while the historical narratives of war of these nations are well known far less is understood about how small islands coped These islands often not nations in their own right but small outposts of other kingdoms countries and nations have been relegated to mere footnotes in history and heritage studies as interesting case studies or unimportant curiosities Yet for many of these small islands war had an enduring impact on their history memory intangible heritage and future cultural practices leaving a legacy that demanded some form of local response This is the first comprehensive volume dedicated to what the memories legacies and heritage of war in small islands can teach those who live outside them through closely related historical and contemporary case studies covering 20th and 21st century conflict across the globe The volume investigates a number of important questions Why and how is war memory so enduring in small islands Do factors such as population size island size isolation or geography have any impact Do close ties of kinship and group identity enable collective memories to shape identity and its resulting war related heritage This book contributes to heritage and memory studies and to conflict and historical archaeology by providing a globally wide ranging comparative assessment of small islands and their experiences of war Heritage of War in Small Island Territories is of relevance to students researchers heritage and tourism professionals local governments and NGOs
