Stung! Lisa-ann Gershwin, 2013-05-07 The world of jellyfish is brought alive as you never imagined it could be by Lisa-ann Gershwin in this engaging gripping and often funny book Callum Roberts author of *The Ocean of Life* As our oceans become increasingly inhospitable to life there is one creature that is thriving in this seasick environment the beautiful dangerous and now incredibly numerous jellyfish As foremost jellyfish expert Lisa-ann Gershwin describes in *Stung* the jellyfish population bloom is highly indicative of the tragic state of the world's ocean waters while also revealing the incredible tenacity of these remarkable creatures Despite their often dazzling appearance jellyfish are simple creatures with simple needs namely fewer predators and competitors warmer waters

to encourage rapid growth and more places for their larvae to settle and grow In general oceans that are less favorable to fish are more favorable to jellyfish and these are the very conditions that we are creating through mechanized trawling habitat degradation coastal construction pollution and climate change Despite their role as harbingers of marine destruction jellyfish are truly enthralling creatures in their own right and in Stung Gershwin tells stories of jellyfish both attractive and deadly while illuminating many interesting and unusual facts about their behaviors and environmental adaptations She takes readers back to the Proterozoic era when jellyfish were the top predator in the marine ecosystem at a time when there were no fish no mammals and no turtles and she explores the role jellies have as middlemen of destruction moving swiftly into vulnerable ecosystems The story of the jellyfish as Gershwin makes clear is also the story of the world s oceans and Stung provides a unique and urgent look at their inseparable histories and future Yoga Journal ,2007-06 For more than 30 years Yoga Journal has been helping readers achieve the balance and well being they seek in their everyday lives With every issue Yoga Journal strives to inform and empower readers to make lifestyle choices that are healthy for their bodies and minds We are dedicated to providing in depth thoughtful editorial on topics such as yoga food nutrition fitness wellness travel and fashion and beauty Fishing, Gone? Sid Dobrin,2019-03-27 Humans have a rapacious relationship with the world s ocean extracting immeasurable quantities of its inhabitants and resources while simultaneously depositing unbound sums of pollution into it If we are to move toward sustainable practices then we must first move toward ways of thinking about fish and fisheries beyond mere economic agendas And there is one group in particular who could make an impact saltwater anglers Recreational saltwater fishing is big business and big culture The industry is one of the largest in the United States but that has not translated into a cohesive effort agenda or ethic Saltwater anglers a diverse group with a range of motivations do not belong to a single organization through which to galvanize significant voting or lobbying power toward conservation regulation As a result federal policymakers have traditionally focused on commercial harvesting interests Dubbed the most contemplative of pastimes recreational fishing provides a valuable perspective on how humans interact with saltwater environments Fishing Gone builds on this tradition of reflection and opens up the saltwater sportfishing life as a method for thinking through the current status of marine fisheries and environment Author Sid Dobrin calls on fellow saltwater anglers to reconsider their relationship to fishes and the ocean the sport can no longer be only about the joy and freedom of fishing but it must also be about living for the ocean living with the ocean and living through the ocean It is about securing the opportunity to fish on while meeting the economic and environmental challenges that lie ahead Revision Decisions Jeff Anderson,Deborah Dean,2014 Revision is often a confusing and difficult process for students but it s also the most important part of the writing process If students leave our classrooms not knowing how to move a piece of writing forward we ve failed them Revision Decisions will help teachers develop the skills students need in an ever evolving writing language and reading world Jeff Anderson and Deborah Dean have written a book that engages writers in the tinkering

playing and thinking that are essential to clarify and elevate writing Focusing on sentences Jeff and Deborah use mentor texts to show the myriad possibilities that exist for revision Essential to their process is the concept of classroom talk Readers will be shown how revision lessons can be discussed in a generative way and how each student can benefit from talking through the revision process as a group Revision Decisions focuses on developing both the writing and the writer The easy to follow lessons make clear and accessible the rigorous thinking and the challenging process of making writing work Narratives setup lessons templates and details about how to move students toward independence round out this essential book Additionally the authors weave the language reading and writing goals of the Common Core and other standards into an integrated and connected practice The noted language arts teacher James Britton once said that good writing floats on a sea of talk Revision Decisions supports those genuine conversations we naturally have as readers and writers leading the way to the essential goal of making meaning

Blue Ecocriticism and the Oceanic Imperative Sidney I. Dobrin, 2021-03-28 This book initiates a conversation about blue ecocriticism critical ethical cultural and political positions that emerge from oceanic or aquatic frames of mind rather than traditional land based approaches Ecocriticism has rapidly become not only a disciplinary legitimate critical form but also one of the most dynamic active criticisms to emerge in recent times However even in its institutional success ecocriticism has exemplified an ocean deficit That is ecocriticism has thus far primarily been a land based criticism stranded on a liquid planet Blue Ecocriticism and the Oceanic Imperative contributes to efforts to overcome ecocriticism s ocean deficit The chapters explore a vast archive of oceanic literature visual art television and film games theory and criticism By examining the relationships between these representations of ocean and cultural imaginaries Blue Ecocriticism works to unmoor ecocriticism from its land based anchors This book aims to simultaneously advance blue ecocriticism as an intellectual pursuit within the environmental humanities and to advocate for ocean conservation as derivative of that pursuit

Overfishing Therese M. Ecological Entanglements in the Anthropocene Nicholas Holm,Sy Taffel,2016-12-21 This edited collection explores the relationships between humans and nature at a time when the traditional sense of separation between human cultures and a natural wilderness is being eroded

The Anthropocene whose literal translation is the Age of Man is one way of marking these planetary changes to the Earth system. Global climate change and rising sea levels are two prominent examples of how nature can no longer be simply thought of as something outside and removed from humans and vice versa. This collection applies the concepts of ecology and entanglement to address pressing political, social and cultural issues surrounding human relationships with the nonhuman world in terms of working with nature. It asks: are there more or less preferable ways of working with nature? What forms and practices might this work take and how do we distinguish between them? Is the idea of nature even sufficient to approach such questions or do we need to reconsider using the term nature in favour of terms such as environments, ecologies or the broad notion of the non-human world? How might we forge perspectives and enact practices which build resilience and community across species and spaces, constructing relationships with nonhumans which go beyond discourses of pollution, degradation and destruction? Bringing together a range of contributors from across multiple academic disciplines, activists and artists, this book examines how these questions might help us understand and assess the different ways in which humans transform, engage and interact with the nonhuman world.

Sustainable and Democratic Education Sarah

Chave, 2020-12-20. In a world struggling with environmental and social problems resistant to current solutions, education needs to explore ways to enlarge the space of the possible rather than only replicate the existing possible. To respond to this challenge, this book troubles dominant Western philosophical conceptions which continue to have wide-ranging influence in education worldwide and which limit more sustainable ways to be in the world together. It argues for the importance of opening spaces in and through which unique subjects can emerge, bringing potential for new ways of being and as yet unimagined futures. The book makes a valuable contribution to international growing interest in Arendtian thinking, complexity and emergence, feminist thinking, the emerging field of anticipation studies, the posthuman and engagement with Indigenous scholarship and practices in ways which attempt to be non-appropriating. Sustainability continues to be a vital theme in education and the book responds to a desire to encourage education which invites more sustainable processes and ways of being in addition to education which limits itself to teaching about or for sustainability. Sustainable and Democratic Education will be of great interest to academics and practitioners working with sustainability, Indigenous scholarship, complexity theory and the posthuman and what these ideas can mean in and for education.
