World Affairs 2015 Atlas:

An Atlas of World Affairs Andrew Boyd, 1970 **New Geographies of the Globalized World** Marcin Wojciech Solarz, 2018-01-29 Globalization has essentially come to an end. It is already a victorious revolution. It has profoundly restructured the relationships between people and the world, often recreating them in a new geographical image. This book discovers and describes these relationships of new geographies, providing a comprehensive spatial guide to the globalized world of the 21st century. It considers a number of timely and important themes and insights for the present and future world, exploring topics such as population trends and migration, development, the urban transportation religion, our endangered planet, wars, conflicts, and terrorism and disease. As such, it offers a cross-cutting synthesis of the modern world. It will be of interest to students and researchers in humanities and social sciences, including geographers, economists, political scientists, and IR specialists.

The Spatial Organisation of Urban Agriculture in the Global South Ada Górna, 2024-04-01 This book examines the role and position of urban agriculture in the spatial and functional structure of cities in the Global South. In the face of dynamic urbanisation and negative consequences of climate change, one of the key challenges is not only how to provide food for the ever-growing urban population but also how to achieve urban sustainability and simultaneously reduce the negative impact of cities on the natural environment. These problems are particularly urgent in the metropolises of the Global South that are experiencing the greatest population growth while struggling with increasing social inequalities and the resulting uneven distribution of resources. Examining the role that urban agriculture can play in addressing these challenges, this book draws on three case study cities: Havana, Singapore, and Kigali. The case studies, differing in socio-economic, spatial, political, and environmental terms, exemplify diverse characteristics of urban agriculture in different geographical conditions. Drawing on fieldwork conducted in each city, the book also provides a unique perspective on the constraints in the development of urban agriculture and the use of its full potential for urban sustainability. This book will appeal to students and scholars as well as decision makers interested in the issues of urban sustainability, food security, spatial development, and alternative food systems.

The Open World, Hackbacks and Global Justice A. Jean Thomas, 2023-01-13 This book explores the current impasse that global regulators face in the digital sphere. Computer technology has advanced human civilization tenfold, but the freedom to interact with others in cyberspace has made individuals, discrete communities, organizations, and governments more vulnerable to abuse. In consequence, political decision makers are seriously considering granting limited legal immunity to victims who decide to hack back. Many victims frustrated

by the slow pace of law enforcement in cyberspace have chosen to take the law into their own hands retaliating against those who have stolen valuable data and damaged network operations Political deliberations about limited immunity for hackbacks usually ignore global justice and moral justifications for active defense policies Typically cyber security policies balance deterrence against two different understandings of morality and the good life fairness or welfare This book proposes a third moral rationale for cyber security policies capability theory developed principally by Amartya Sen and Martha Nussbaum Properly formulated a capability based defense of retaliatory hackbacks can minimize attribution and cyber escalation risks deter bad behavior by casual computer users disingenuous security experts big tech companies criminals and rogue governments and satisfy calls for more retributive and distributive justice in the open world This book will appeal to legal theorists political philosophers social activists investors international relations scholars and businesspeople in the tech community

returns to explore today's ideological political and economic battles and asks whether radical change is possible. In these troubled times even the most pessimistic diagnosis of our future ends with an uplifting hint that things might not be as bad as all that: there is light at the end of the tunnel. Yet argues Slavoj Žižek it is only when we have admitted to ourselves that our situation is completely hopeless that the light at the end of the tunnel is in fact the headlight of a train that fundamental change can be brought about. Surveying the various challenges in the world today from mass migration and geopolitical tensions to terrorism the explosion of rightist populism and the emergence of new radical politics all of which in their own way express the impasses of global capitalism Žižek explores whether there still remains the possibility for genuine change. Today he proposes the only true question is or should be this: do we endorse the predominant acceptance of capitalism as fact of human nature or does today's capitalism contain strong enough antagonisms to prevent its infinite reproduction? Can we he asks move beyond the failure of socialism and beyond the current wave of populist rage and initiate radical change before the train hits? Žižek leaves no social or cultural phenomenon untheorized and is master of the counterintuitive observation. *The New Yorker* **The Oxford Handbook of Global Policy and Transnational Administration** Diane Stone, Kim

Moloney, 2019-01-10 Global policy making is unfurling in distinctive ways above traditional nation state policy processes. New practices of transnational administration are emerging inside international organizations but also alongside the transgovernmental networks of regulators and inside global public private partnerships. Mainstream policy and public administration studies have tended to analyse the capacity of public sector hierarchies to globalize national policies. By contrast this Handbook investigates new public spaces of transnational policy making the design and delivery of global public goods and services and the interdependent roles of transnational administrators who move between business bodies government agencies international organizations and professional associations. This Handbook is novel in taking the concepts and theories of public administration and policy studies to get inside the black box of global governance. Transnational administration is a multi actor and multi scalar endeavour having manifestations depending on the policy issue or problems at the local urban sub regional sub national regional national supranational supra regional transnational international and global scales. These scales of local and global are not neatly bounded and nested spaces but are articulated together in complex patterns of policy activity. These transnational patterns represent a reinvigoration of public administration and policy studies as the Handbook authors advance their analysis beyond the methodological nationalism of the nation state.

Southeast Asian Nations ASEAN has become the premier regional institution in Southeast Asia. The 10 members are pursuing cooperation to develop the ASEAN Community and also sponsor wider dialogues that involve the major powers. Australia has been interested in ASEAN since its inauguration and was the first country to establish a multilateral link with the Association in 1974. Australia and ASEAN have subsequently engaged and cooperated on many issues of mutual concern including efforts to secure an agreement to resolve the Cambodia conflict signed in 1991, the initiation of the Asia Pacific Economic Cooperation grouping in 1989 and the ASEAN Regional Forum in 1994, the conclusion of the ASEAN Australia New Zealand Free Trade Agreement signed in 2008 and the development of the East Asia Summit from 2005. This book provides the first available detailed history of the evolution of Australia's interactions with ASEAN. It assesses the origins and phases of development of Australia's relations with ASEAN, the role ASEAN has played in Australian foreign policy since the 1970s, the ways in which the two sides have collaborated and at times disagreed in the pursuit of regional stability and security and the key factors that will influence the relationship as it moves into its fifth decade.

Russia's Role in World Politics Elias Götz, Neil MacFarlane, 2022-12-09. This book explores Russia's role in world politics. In recent years, Moscow has played an increasingly active and assertive role in geopolitics. Examples include Russia's takeover of Crimea and meddling in eastern Ukraine, Russia's military intervention in Syria and support for the Assad government, the Kremlin's alleged interference in the 2016 US presidential race, the pursuit of closer economic and diplomatic ties with China and Russia's ambitious military reforms and nuclear brinkmanship. Not surprisingly, Russia's role in world politics has become the object of a spirited debate among Western policymakers, think tank analysts and academics. Much of this debate focuses on one central question: What are the main drivers or causes of Moscow's recent assertiveness? The contributions gathered here address this question by focusing on the interplay of power, ideas and domestic influences. Previously published in *International Politics* Volume 56 issue 6 December 2019.

Pan-Caribbean Integration Patsy Lewis, Terri-Ann Gilbert-Roberts, Jessica Byron, 2017-12-14. A critical part of the history of regionalism in Latin America and the Caribbean is to be found in the widening of the economic and functional relationships among the English speaking Caribbean to embrace other countries in the Greater Caribbean. Bringing together a range of international experts to explain the broad thrusts of CARICOM's widening project and the opportunities and challenges it presents, the book pays particular attention to CARICOM's relations with the French Caribbean territories. Providing a review of the pan-Caribbean landscape, this volume notes the impact of these new relationships on internal CARICOM affairs, inter-regional South-South cooperation and political and legislative changes in European metropolises of the non-independent territories. It also contemplates recent developments in the region and globally such as political instability in Brazil and Venezuela, Britain's decision to leave the European Union and the policies of the Donald Trump administration. This edited collection will be an important resource for students and researchers in Latin American and Caribbean politics, economics, development, history and heritage.
