Modern Trends in Diatom Identification Gabriel Cristóbal, Saúl Blanco, Gloria Bueno, 2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition

techniques for diagnostic tools e.g. environmental monitoring networks, early warning systems to improve the management of water resources and decision making processes. Describing the entire workflow of a bioindicator system from capture, analysis and identification to the determination of quality indices, this book provides insights into the current state of the art in automatic identification systems in microscopy.

Digital Technologies and the Evolving African Newsroom Hayes Mabweazara, 2016-04-14. African newsrooms are experiencing the disruptive impact of new digital technologies on the way they generate and disseminate news. Indeed, newsrooms are being forced to adapt in various ways, and there are clear dimensions of localized creativity and adaptations by journalists to the digital revolution. In the same way, the influences of digitization, Internet and social media are changing the informational needs of readers, including how they engage with news. These developments nonetheless remain on the margins of mainstream journalism research; very few researchers have sought to qualitatively capture the implications of developments in digital technologies on the routine practices of African journalists, especially in their natural habitat, the newsroom. In this light, this edited volume interrogates the changing ecology of newsmaking in Africa in the context of rapid technological changes in newsrooms, as well as in the wider social context of news production. It brings together six contributions drawn from five countries: Egypt, Mozambique, South Africa, Nigeria, and Zimbabwe, to explore practices, challenges, and professional normative dilemmas emerging with the adoption and appropriation of new technologies. While the studies point to dimensions of localized new technology appropriations as defined by the complex socio-political structures in which African journalists operate, they are not rigidly confined to Africa. They are expressly in dialogue with theoretical observations largely emerging from Western scholarship. In this sense, the book goes beyond simply mainstreaming African perspectives; it engages directly with dominant theoretical observations and offers a point of departure for developing what could loosely be branded as an African digital journalism epistemology. This book was originally published as a special issue of *Digital Journalism*.

Storm over South Africa Michael G.

Bergen, 2016-08-17. *Storm over South Africa* follows the lives and tribulations of a diverse group of characters through the Second Anglo-Boer War from 1899 to 1902 in South Africa. They belonged to different levels of the opposing societies, and the story follows their actual life and death experiences in this conflict. The characters include the seventeen-year-old son of a Boer president, a young shipbuilding dock worker, and his military nurse girlfriend from the industrial northeast of England, and a young Canadian soldier who volunteered for Canada's first campaign outside its borders. Involved too are such illustrious British participants as Winston Churchill, Field Marshal Frederick Roberts, and the generals Kitchener, Ian Hamilton, and Robert Baden-Powell, among others. Boer leaders involved include the generals Christiaan de Wet, Louis Botha, Koos de la Rey, and Jan Smuts. The reader is guided through the various twists and turns of the first major British conflict of the twentieth century from its beginning through to its end. The naivety and excitement of combatants in the lead up to and beginning of the Second Anglo-Boer War was contagious. It pulled many naive young men into the maelstrom of combat. The

failures frustrations disappointments disillusionments and suffering soon emerged It is a tale of imperial arrogance determination stubbornness innocence love and loss experienced in a rugged and alluring land far from the heart of the British Empire Deanship in the Global South Oliver J.J. Seale,2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration *Trade Unions and the Age of Information and Communication Technologies in Kenya* Eric E. Otenyo,2017-03-01 Trade Unions and the Age of Information and Communication Technologies in Kenya provides a comprehensive description of the use of ICTs within the trade union movement in Kenya In this book Professor Eric Otenyo explores the intersection between new technologies and union as key stakeholders in national governance and development The dearth of research on how trade unions can play a part in the new economy continues to undermine the effective use of ICTs in development This book brings to light the challenges that unions face while navigating the new economy and netstate characterized by a proliferation of ICTs and globalization **Advances in Parasitology** ,2023-01-25 Hybridisation in Parasites Disease Evolution by Saltation Volume 119 in the Advances in Parasitology Disease Evolution by Saltation the latest release in this ongoing series includes medical studies of parasites of major influence along with reviews of more traditional areas such as zoology taxonomy and life history Informs and updates on all the latest developments in the field of parasitology Includes medical studies of parasites of major influence Features reviews of more traditional areas such as zoology taxonomy and life history which help shape current thinking and applications **Students Must Rise** Ann Heffernan,Noor Nieftagodien,Sifiso Mxolisi Ndlovu,Bhekizizwe Peterson,2016-06-01 A detailed account of the incredibly influential Soweto Student Uprising of 1976 The Soweto Student Uprising of 1976 was a decisive moment in the struggle against apartheid It marked the expansion of political activism to a new generation of young activists but beyond that it inscribed the role that young people of subsequent generations could play in their country s future Since that momentous time students have held a special place in the collective imaginary of South African history Drawing on research and writing

by leading scholars and prominent activists Students Must Rise takes Soweto 76 as its pivot point but looks at student and youth activism in South Africa more broadly by considering what happened before and beyond the Soweto moment Early chapters assess the impact of the anti pass campaigns of the 1950s of political ideologies like black consciousness as well as of religion and culture in fostering political consciousness and organisation among youth and students in townships and rural areas Later chapters explore the wide reaching impact of June 16th itself for student organisation over the next two decades across the country Two final chapters consider contemporary student based political movements including RhodesMustFall and FeesMustFall and historically root these in the long and rich tradition of student activism in South Africa 2016 marks the 40th anniversary of the 1976 June 16th uprisings This book rethinks the conventional narrative of youth and student activism in South Africa by placing that most famous of moments the 1976 students uprising in Soweto in a deeper historical and geographic context
