Exploring the Math and Art Connection Daniel Jarvis,Irene Naested,2012 Daniel Jarvis and Irene Naested highlight the natural association between math and art in a series of practical ideas for the classroom because when students understand the math art connection their understanding and confidence increase in both subjects Through innovative teaching strategies and more than 100 rich learning experiences Jarvis and Naested give teachers a wealth of engaging tools to explore the math art connection with their own students This connection is established through examinations of natural and human designed objects from how pine cone scales spiral out in a Fibonacci sequence to how geometric shapes combine in architecture to form some of the most beautiful structures on the planet The Early Childhood Curriculum Suzanne L. Krogh,Pamela Morehouse,2014-02-18 Based on research that demonstrates the powerful

advantages of integrating the curriculum while providing inquiry opportunities The Early Childhood Curriculum shows how to make such an approach work for all children preschool through the primary grades The text demonstrates how to confidently teach using inquiry based methods that address the whole child while also meeting and exceeding academic standards Offering a foundation in early childhood theory philosophy research and development the 2nd edition of this unique textbook helps future teachers as well as current educators understand the why of curriculum in early childhood and invests them with the skills they need to move from simply following a script to knowledgeably creating curricula on their own Since each curricular subject has its own integrity there is a chapter for each discipline grounding the reader in the essentials of the subject in order to foster knowledgeable and effective integration The 2nd edition of The Early Childhood Curriculum includes information on the most recent trends in national curriculum standards particularly in regard to the Common Core State Standards Initiative and the Next Generation Science Standards Coupled with this information are practical suggestions for meeting standards while still providing young learners with a truly child centered educational experience Chapters contain real life vignettes that demonstrate inquiry and integration in practice The entire text reflects the philosophy that the use of inquiry to seek and obtain information is one of the most valuable and powerful tools children can acquire along the way to becoming lifelong learners *Learning about Shapes , Beasts Before Us* Elsa

Panciroli,2021-06-10 For most of us the story of mammal evolution starts after the asteroid impact that killed the dinosaurs but over the last 20 years scientists have uncovered new fossils and used new technologies that have upended this story In *Beasts Before Us* palaeontologist Elsa Panciroli charts the emergence of the mammal lineage Synapsida beginning at their murky split from the reptiles in the Carboniferous period over three hundred million years ago They made the world theirs long before the rise of dinosaurs Travelling forward into the Permian and then Triassic periods we learn how our ancient mammal ancestors evolved from large hairy beasts with accelerating metabolisms to exploit miniaturisation which was key to unlocking the traits that define mammals as we now know them Elsa criss crosses the globe to explore the sites where discoveries are being made and meet the people who make them In Scotland she traverses the desert dunes of prehistoric Moray where quarry workers unearthed the footprints of Permian creatures from before the time of dinosaurs In South Africa she introduces us to animals once called mammal like reptiles that gave scientists the first hints that our furry kin evolved from a lineage of egg laying burrowers In China new complete fossilised skeletons reveal mammals that were gliders shovel pawed Jurassic moles and flat tailed swimmers This book radically reframes the narrative of our mammalian ancestors and provides a counterpoint to the stereotypes of mighty dinosaur overlords and cowering little mammals It turns out the earliest mammals weren't just precursors they were pioneers *Leonardo da Vinci for Kids* Janis Herbert,1998-10-01 The marriage of art and science is celebrated in this beautifully illustrated four color biography and activity book Kids will begin to understand the important discoveries that da Vinci made through inspiring activities like determining the launch angle of a

catapult sketching birds and other animals creating a map learning to look at a painting and much more Includes a glossary bibliography listing of pertinent museums and Web sites a timeline and many interesting sidebars *Meeting the Math Standards with Favorite Picture Books* Bob Krech, 2002-10 For each featured title you ll find a book summary as well as an easy to read list of primary content standards This book also includes related math vocabulary to share with students suggestions for sharing each story step by step activities to reinforce key math skills and concepts reproducible charts activities patterns and games suggestions for connecting to other areas of the curriculum and additional resources for learning more
