Nodes in Transport Networks - Research, Data Analysis and Modelling Elżbieta Macioszek, Nan Kang, Grzegorz Sierpiński, 2020-01-06 The publication delivers numerous valuable guidelines particularly useful when making decisions related in the subject matter to road and rail nodes located in dense transport networks The know how displayed while discussing practical examples as well as the decision making support systems described in the publication will certainly attract the interest of those who daily face the challenge of seeking solutions to the operational and functional problems of transport nodes in contemporary transport networks and systems This publication is dedicated to local authorities involved in planning and preparation of development strategies for specific transport related issues in both urban and regional areas as well as to representatives of business and industry being those

who participate directly in the implementation of traffic engineering solutions The guidelines provided in individual chapters of the publication will make it possible to address the given problem in an advanced manner and simplify the choice of appropriate strategies including those related to synchronisation of road traffic streams improving the capacity road traffic safety analysis evaluation of changes in drivers behaviour on account of introducing countdown timers at signal controlled intersections using UAV data the influence of the type of traffic organisation on the behaviour of pedestrians at tram line crossings On the other hand since the publication also concerns the new approach to theoretical models including potential places of integration of public transport with the railway network or the speed adviser for pedestrians enabling them to choose the optimal path at signal controlled intersections it should also attract the attention of researches and scientists studying this body of problems The publication entitled Nodes in transport networks research data analysis and modelling contains selected papers submitted to and presented at the 16th Transport Systems Theory and Practice Scientific and Technical Conference organized by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology The conference was held on 16 18 September 2019 in Katowice Poland
