Coombs,2017-09-15 Excerpt from Construction Accounting and Financial Management Although accounting principles do not change I think it is reasonable to say that their application to any particular industry and to any specific business in that industry usually requires careful analysis and sound judgment This statement is certainly true of the construction industry This book cannot take the place of detailed information nor of the experience with individual problems of any particular construction company It can however survey the problems peculiar to

the construction industry and indicate how to apply standard accounting techniques to arrive at sound solutions With operating conditions so varied and the individual contractor's circumstances likely to be so complex it is often necessary to go back and review basic accounting and business principles in relation to the specific conditions in a given company before management can use accounting as a true operational tool It is for this reason that this book is devoted more to the why than to the how of construction accounting Certainly among the techniques described the experienced accountant will find few if any that are basically unfamiliar to him but he may see them applied in ways that may be somewhat unexpected About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Construction Methods and Equipment* ,1962 *Journal of the Engineering Institute of Canada* ,1920 Vol 7 no 7 July 1924 contains papers prepared by Canadian engineers for the first World power conference July 1924
