The Letters of Vincent van Gogh Patrick Grant,2014-05-01 When he died at the age of thirty seven Vincent van Gogh left a legacy of over two thousand artworks for which he was justly famous But van Gogh was also a prodigious writer of letters more than eight hundred of them addressed to his parents to friends such as Paul Gauguin and above all to his brother Theo His letters have long been admired for their exceptional literary quality and art historians have sometimes drawn on some of the letters in their analysis of the paintings And yet to date no one has undertaken a critical assessment of this remarkable body of writing not as a footnote to the paintings but as a highly sophisticated literary achievement in its own right Patrick Grant s long awaited study provides such an assessment and as such redresses a significant omission in the field of van Gogh studies As Grant demonstrates quite apart from furnishing a highly revealing self portrait of their author the letters are compelling for their imaginative and expressive power as well as for the perceptive commentary they offer on universal human themes Through a subtle exploration of van Gogh s contrastive style of thinking and his fascination with the notion of imperfection Grant illuminates gradual shifts in van Gogh s ideas on religion ethics and art He also analyzes the metaphorical significance of a number of key images in the letters which prove to yield unexpected psychological and conceptual connections and probes the relationships that surface when the letters are viewed as a cohesive literary product The result is a wealth of new insights into van Gogh s inner landscape

What a Difference a Day Makes Steve Bergsman,2023-10-30 In What a Difference a Day Makes Women Who Conquered 1950s Music Steve Bergsman highlights the Black female artists of the 1950s a time that predated the chart topping girl groups of the early 1960s Many of the singers of this era became wildly famous and respected and even made it into the Rock n Roll Hall of Fame However there were many others such as Margie Day Helen Humes Nellie Lutcher Jewel King and Savannah Churchill who made one or two great records in the 1950s and then disappeared from the scene The era featured former jazz and blues singers who first came to prominence in the 1940s and others who pioneered early forms of rock n roll In a companion volume Bergsman has written the history of white women singers of the same era Although song styles were parallel the careers of Black and white female singers of the period ran in very different directions as the decade progressed The songs of African American vocalists like Dinah Washington and Etta James were segregated to the R B charts or covered by pop singers in the early and mid 1950s but burst into prominence in the last part of the decade and well into the 1960s White singers on the other hand excelled in the early 1950s but saw their careers decline with the advent of rock music In this volume Bergsman takes an encyclopedic look at both the renowned and the sadly faded stars of the 1950s placing them and their music back in the spotlight **The Distant Road in My Heart**I 〇〇〇,2025-09-30 This isn t a

Untaming the Frontier in Anthropology, Archaeology, and History Bradley J. Parker,Lars Rodseth,2016-04 Despite a half

century of attempts by social scientists to compare frontiers around the world the study of these regions is still closely associated with the nineteenth century American West and the work of Frederick Jackson Turner As a result the very concept of the frontier is bound up in Victorian notions of manifest destiny and rugged individualism The frontier it would seem has been tamed This book seeks to open a new debate about the processes of frontier history in a variety of cultural contexts untaming the frontier as an analytic concept and releasing it in a range of unfamiliar settings Drawing on examples from over four millennia it shows that throughout history societies have been formed and transformed in relation to their frontiers and that no one historical case represents the normal or typical frontier pattern The contributors historians anthropologists and archaeologists present numerous examples of the frontier as a shifting zone of innovation and recombination through which cultural materials from many sources have been unpredictably channeled and transformed At the same time they reveal recurring processes of frontier history that enable world historical comparison the emergence of the frontier in relation to a core area the mutually structuring interactions between frontier and core and the development of social exchange merger or conflict between previously separate populations brought together on the frontier Any frontier situation has many dimensions and each of the chapters highlights one or more of these from the physical and ideological aspects of Egypt's Nubian frontier to the military and cultural components of Inka outposts in Bolivia to the shifting agrarian religious and political boundaries in Bengal They explore cases in which the centripetal forces at work in frontier zones have resulted in cultural hybridization or creolization and in some instances show how satellite settlements on the frontiers of core polities themselves develop into new core polities Each of the chapters suggests that frontiers are shaped in critical ways by topography climate vegetation and the availability of water and other strategic resources and most also consider cases of population shifts within or through a frontier zone As these studies reveal transnationalism in today's world can best be understood as an extension of frontier processes that have developed over thousands of years This book's interdisciplinary perspective challenges readers to look beyond their own fields of interest to reconsider the true nature and meaning of frontiers
