Interactive lessons that scaffold students and build their capacity to read complex texts *Targeted Reading Interventions for the Common Core: Grades K-3* Diana Sisson,Betsy Sisson,2014-10-15 Interactive lessons that scaffold students and build their capacity to read complex texts Targeted Reading Interventions Joey Bland,2009-09-22 The Targeted Reading Intervention (TRI) Lynne Vernon-Feagans,Steve Amendum,Kirsten Kainz,Marnie Ginsburg,2009 The two studies presented in this report were designed to test the effectiveness of a new diagnostic based reading intervention for classroom teachers called the Targeted Reading Intervention TRI This TRI Tier 2 intervention stressed diagnostic teaching as the key to helping struggling readers make rapid progress in reading in the regular classroom In Study 1 the authors wanted to understand whether the intervention was effective for struggling readers and under what conditions and for whom was the intervention most beneficial In Study 2 the authors wanted to understand if their intervention could have an effect when it was delivered via technology using webcams that allowed real time consultation in the regular classroom where their consultants could see and hear the teacher working with individual children Study 1 included 6 elementary schools in two rural poor counties in the Southeastern United States Consistent with literature on rural schools the teachers in this study had many years of classroom experience but their advanced education was less than might be expected for their years of teaching Study 2 included two schools in rural Texas and two in rural New Mexico The teachers in this study had slightly less experience but more advanced degrees than in study 1 These studies suggest that professional development for classroom teachers in rural low wealth communities that focuses on diagnostic teaching in the regular classroom with struggling readers can make a dramatic difference in the gains these children make in one academic year With the help of a biweekly literacy consultant who worked with the teacher in the regular classroom the TRI Tier 2 intervention found effect sizes of almost 1 in Study 1 and effect sizes of about 0.5 in Study 2 when consultation was delivered by webcam technology In both studies there was no evidence that normally progressing children were suffering because of the time teachers used to work with the struggling readers In addition this study also suggests that this diagnostic approach appears to help all children equally with no evidence that boys African American children or low SES children gained less than other struggling readers In addition the interaction between rapid color naming and the intervention suggested that children with rapid color naming problems gained the most from the TRI providing evidence that this kind of deficit may be particularly addressed in a diagnostic teaching format Finally this study demonstrates that low cost effective teacher professional development can dramatically improve the reading of struggling readers by biweekly consultation in the regular classroom either face to face or by very cost effective web cam technology that allows teacher and consultants to see and hear each other in real time as they work with a struggling reader **The Targeted Reading Intervention** Lynne Vernon-Feagans,Kirsten Kainz,Amy

Hedrick, Marnie Ginsberg, Steve Amendum, 2010 The main objective of the overall Targeted Reading Intervention TRI was to help the classroom teacher acquire the key reading diagnostic strategies e g Cooter 2003 Desimone 2009 Garet et al 2001 Timperley Garet et al 2001 Guskey 2002 Joyce Penuel et al 2007 Taylor Pressley Pearson 2004 through the authors professional development program In the present study the authors employed an innovative distance technology model to deliver professional development and real time collaborative coaching to isolated rural schools Each experimental classroom received a laptop webcam and webconferencing software This technology was used with each experimental teacher so that the authors could see and hear her working with each of her struggling readers in real time and she could see and hear the literacy consultants at their university thousands of miles away Through this technology the literacy consultants could coach the classroom teacher in using the TRI strategies and also use the technology of grade level meetings and workshops throughout the year Findings of this study suggests that the Targeted Reading Intervention using webcam technology with classroom teachers in kindergarten and first grade can significantly help struggling readers progress more quickly in all of the basic word reading and comprehension skills over one year In addition for the basic word reading skills the TRI can actually help struggling readers catch up with their non struggling peers in the same classroom by the end of the school year Future work is needed to understand what actual teacher knowledge and practice constructs that might mediate the relationship between treatment and student outcomes Contains 1 figure and 3 tables *Targeted Reading Intervention ,*

Deegan,2018 70% of fourth grade students in the United States are either at or below the basic proficiency NAEP 2011 As support in the research literature for early intervention to prevent such outcomes continues burgeoning it is a necessity that schools have in place practices that are able to meet the needs of these struggling readers Considering that the skill of reading fluency is one of the best known early predictors of successful reading this seems like a particularly important academic skill to target NRP 2000 Adult led repeated reading interventions are effective methods to improve reading fluency but such interventions are costly to provide in terms of resources Therrien 2004 Already 6% of an average elementary school day is spent on Social Studies and Science 16% is spent on Mathematics and approximately 40% of the day is spent on literacy instruction US DOE 1997 In light of the number of students still needing reading support schools are in need of literacy programs that maximize effectiveness with minimal resources Through the literature indicates that such reading interventions can be provided in a small group there is a gap in the literature regarding whether the effectiveness of small group reading interventions would be impacted by altering the intervention focus from individual to group growth The purpose of the current study is to address that gap The current study

provided student dyads with a reading intervention that initially targeted individual reading growth After four weeks the treatment variable of having students work toward a group growth goal was implemented in a multiple baseline format over the course of twenty intervention sessions Taken together no significant differences were found in reading growth However across phases students did exceed expectations in reading growth indicating that the current intervention is likely to be efficacious regardless of goal orientation introduction
