Special Features of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy

the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model *Formalisation Through Taxation* Jonas Richter,2019-10-09 In developing countries such as Paraguay

informality remains a prevalent and persistent issue Many avoid formal registration with the authorities and evade tax payments However a growing academic literature argues for an interrelation between a broader tax base and a country s economic and democratic development A strand of this literature focuses on the means of taxing the informal sector and argues for positive revenue and growth effects This Palgrave Pivot analyses Paraguay s 2004 and 2012 tax reforms using both qualitative and quantitative data It illustrates that the country s personal income tax as well as other alterations in the tax system constitute an incentive and nudging mechanism that leads to a formalisation process of economic activity and consequently to a broader tax base Using interview and tax data the book demonstrates how the reform initiates a rising demand of formalised purchases from both customers and businesses It further suggests a potential way of how the taxpayers respond politically to the enhanced fiscal imperative **Transfer Pricing in SMEs** Veronika Solilova,Danuse Nerudova,2017-10-31 This book provides a detailed assessment of current approaches to transfer pricing in the context of small and middle sized enterprises SMEs including the newest update of Transfer Pricing Guidelines from 10 July 2017 It analyzes the transfer pricing rules for SMEs across the European Union EU and explores two alternative approaches as suitable solutions for current transfer pricing issues The authors evaluate and discuss alternative approaches like Safe Harbour and Common Consolidated Corporate Tax Base CCCTB Taking into account the prominent role of SMEs in the European Union s economy the book also puts forward policy recommendations to achieve the long term goals of the EU s 2020 agenda *Mergent International Manual* ,2009 **Tax Justice and Global Inequality** Krishen Mehta,Esther Shubert,Erika Dayle Siu,2020-10-29 In the wake of the Panama Papers scandal and similar leaks tax havens are now firmly in the spotlight Today roughly half of all global trade still passes through tax haven jurisdictions costing millions in lost revenue to countries around the world Such practices affect all of us but are most keenly felt by poorer people in developing countries where unfair tax practices have become a major obstacle to development and which have allowed multinational corporations to continue to exploit developing economies This collection argues that for developing countries to achieve social justice and

lasting prosperity they must take control of their own tax destinies and that this will also be crucial to achieving the Sustainable Development Goals Covering such topics as natural resource management representation in global tax institutions and effective strategies for building and protecting tax bases the collection brings together expertise from a variety of countries and disciplines It explores the options available to developing countries and provides a basis for concerted action by tax authorities policy makers academics and civil society experts to design tax systems that can sustain a just society

Transfer Pricing and Developing Economies Joel Cooper,Randall Fox,Jan Loeprick,Komal Mohindra,2017-01-05 Recent years have seen unprecedented public scrutiny over the tax practices of Multinational Enterprise MNE groups Tax policy and administration concerning international transactions aggressive tax planning and tax avoidance have become an issue of extensive national and international debate in developed and developing countries alike Within this context transfer pricing historically a subject of limited specialist interest has attained name recognition amongst a broader global audience that is concerned with equitable fiscal policy and sustainable development Abusive transfer pricing practices are considered to pose major risk to the direct tax base of many countries and developing countries are particularly vulnerable because corporate tax tends to account for a larger share of their revenue This handbook is part of the wider WBG engagement in supporting countries with Domestic Resource Mobilization DRM by protecting their tax base and aims to cover all relevant aspects that have to be considered when introducing or strengthening transfer pricing regimes The handbook provides guidance on analytical steps that can be taken to understand a country s potential exposure to inappropriate transfer pricing transfer mispricing and outlines the main areas that require attention in the design and implementation of transfer pricing regimes A discussion of relevant aspects of the legislative process including the formulation of a transfer pricing policy and the role and content of administrative guidance is combined with the presentation of country examples on the practical application and implementation of the arm s length principle and on running an effective transfer pricing audit program Recognizing the importance of transfer pricing regulation and administration for the business environment and investor confidence this handbook aims to balance the general objective of protecting a country s tax base and raising additional revenue with investment climate considerations wherever appropriate

Transfer Pricing and Value Creation Raffaele Petruzzi,Romero J.S. Tavares Esq.,2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD G20 BEPS Project a new somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti abuse provisions in international tax law The notion of Value Creation reframes the interpretation and application of the Arm s Length Principle ALP that is embedded in Articles 7 and 9 of the OECD Model Convention This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual

context is the aim of this book Here law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy Our LL M students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research

Transforming Public Services by Design Sabine Junginger, 2016-12-01 For policy makers and policy implementers design challenges abound Every design challenge presents an opportunity for change and transformation To get from policy intent to policy outcome however is not a straightforward journey It involves people and services as much as it involves policies and organizations Of all organizations perhaps government agencies are perceived to be the least likely to change They are embedded in enormous bureaucratic structures that have grown over decades if not centuries In effect many people have given up hope that such an institution can ever change its ways of doing business And yet from a human centered

design perspective they present a fabulous challenge Designed by people for people they have a mandate to be citizen centered but they often fall short of this goal If human centered design can make a difference in this organizational context it is likely to have an equal or greater impact on an organization that shows more flexibility for example one that is smaller in size and less entangled in legal or political frameworks Transforming Public Services by Design offers a human centered design perspective on policies organizations and services Three design projects by large scale government agencies illustrate the implications for organizations and the people involved in designing public services the Tax Forms Simplification Project by the Internal Revenue Service 1978 1983 the Domestic Mail Manual Transformation Project by the United States Postal Service 2001 2005 and the Integrated Tax Design Project by the Australian Tax Office These case studies offer a unique demonstration of the role of human centered design in policy context This book aims to support designers and managers of all backgrounds who want to know more about reorienting policies organizations and services around people
