With the intent of being a milestone document that sketches a research agenda for the next decade, the volume draws on the wisdom, ideas, and suggestions of many noted researchers who draw in turn from anthropology, communications, complexity science, computer science, defense planning, economics, engineering, health systems, medicine, neuroscience, physics, political science, psychology, public policy, and sociology. In brief, the volume discusses cutting-edge challenges and opportunities in modeling for social and behavioral science. Special requirements for achieving high standards of privacy and ethics.
