The conference included a full day of tutorials and several keynote talks provided by world renowned experts. The program covered high quality scientific contributions within image analysis, human and action analysis, pattern and object recognition, color imaging and quality medical and biomedical applications, face and head analysis, computer vision and multispectral color analysis. The papers were carefully selected based on at least two reviews. Among 154 submissions, 79 were accepted, leading to an acceptance rate of 51%. Since SCIA was arranged as a single track event, 30 papers were presented in the oral sessions and 49 papers were presented in the poster sessions. A separate session on multispectral color science was organized in cooperation with the 11th Symposium of Multispectral Color Science (MCS 2009). Since 2009 was proclaimed the International Year of Astronomy by the United Nations General Assembly, the conference also contained a session on the topic Image and Pattern Analysis in Astronomy and Astrophysics. SCIA has a reputation of having a friendly environment in addition to high quality scientific contributions. We focused on maintaining this reputation by designing a technical and social program that we hope the participants found interesting and inspiring for new research ideas and network extensions. We thank the authors for submitting their valuable work to SCIA.
